## INTRODUCTION

---

We are happy to present by the grace of God this edition of the Brihat Samhita of Sri Varahamihira with an English translation. A look at the table of contents will enable the reader to gauge the wonderful depth and wide range of the author's knowledge. (In this monumental work which can rightly be called a *Magnum Opus*, there is no subject which he has not treated of with dignity, beauty and grandeur. This work, in fine, is a valuable encyclopaedia, as it deals with an astonishing variety of subjects of exceptional interest and value. Albiruni, the Arabian astronomer who has translated the लघुजातक (Laghu Jataka) of our author into Arabic, eulogises this संहिता (Samhita) for its richness in details. It contains important astronomical data, geographical details, Architecture, Sculpture, Medicine, Psychology, Physiology, Physiognomy, Botany, Zoology, Prosody, figures of speech and other subjects. This work is unique in Sanskrit Literature. The author has made it extremely interesting in spite of its dealing with technical subjects. ) (The author is a poet of a high order. We can also observe here clear traces of the influence of the great poet Kalidasa on this author. In fact वराहमिहिर (Varahamihira) must have been an ardent admirer of Kalidasa. This fact probably led people to believe that our author was a contemporary of the illustrious poet. Moreover, in the ज्योतिर्विदाभरण (Jyotirvidabharana), its author, a Kalidasa, says that he wrote it in 3068 of Kali Yuga or 33 B. C. and that he is a contemporary of Varahamihira. This work bears internal testimony of

composition at a much later date. This pseudo-Kalidasa apparently wanted to pass off for the real one and called himself a contemporary of Varahamihira. Varahamihira's literary acknowledgment to Kalidasa will be apparent from the following extracts :—

यत्राकृतिसूत्र गुणा वसन्ति (Brihatsamhita LXX-23)

प्रायः शरीराकारानुवर्तिनो हि गुणा दोषाश्च भवन्ति

(Brihatsamhita II-2)

ते दुर्जना मे मनसो वितर्कः (Brihat Samhita LXXIV-5)

यस्मिन् मनो व्रजति तत्र गताऽयमात्मा (Brihat Samhita LXXV-3)

योऽयं विचिन्तयति याति स तन्मयत्वम् (Brihat Samhita LXXV-4)

and verses 7 and 8 (The whole chapter is excellent)

मनो हि मूलं हरद्वयमूर्तः (Brihat Samhita LXXVIII-14)

The verses 1 and 2 in Adhyaya LXXIV.

All these lead us to believe in the author's admiration for Kalidasa. The metres employed by him point to his mastery of poetics and command of language. He gives various kinds of दण्डक (Dandaka) and आर्या (Aryas).

✱ (The author is a staunch adherent of scientific principles in Astrology. Out of respect for the ancient sages or masters of this science, he quotes their views and then states his own confirmed decisions in unmistakable terms (*vide* III-1, 2, V-1.17, and IX-6). He belongs to the group of first-rank scholars in scientific astronomy such as आर्यभट (Aryabhata) ब्रह्मगुप्त (Brahmagupta) and भास्कर (Bhaskara). [The last two are posterior to him]. Varahamihira does not claim to be a pioneer in the field of Samhita. Before him, Parasara, Garga and others had

written Samhitas. He refers to them and sometimes quotes them and gives his views in addition, for the benefit of mankind (*vide* I-5). The पराशरतन्त्र (Parasara Tantra) is partly in prose and partly in verse of अनुष्टुप् (Anushtub) and आर्या (Arya) type. The geographical details given in Chapter XIV are taken with slight changes from this तन्त्र (Tantra). So, it can be said to be the geography of India at the time of Parasara. According to tradition, it was Varahamihira that fixed the sphere at the beginning of Aswini (*Cf.* III-1).

His style, though at times archaic, is simple, graceful and pithy, bearing the stamp of individuality and affinity to सुश्रुत (Susruta) and Kalidasa. That is the reason why he was ranked among the nine gems of the Court of Vikrama.)

1. The author was the son of आदित्यदास (Adityadasa) of Ujjain (इ. जा. XXVIII-9). The Astronomers of Ujjain have held that वराह (Varaha) belonged to the 427th year of Saka era or 505 A. D. This date is confirmed by Albi-runi also as that of the composition of his पञ्चसिद्धान्तिका (Pancha Siddhantika). But Dr. Bhau Daji declares that वराह (Varaha) died in 587 A. D. Hence it should be concluded that 505 A. D. is the date of his birth and not of his composition. Scholars hold that वराह (Varaha) quotes आर्यभट (Aryabhata) who was born in 476 A. D. This also points to the above conclusion regarding the date of his birth. About the statement made in the ज्योतिर्विदाभरण (Jyotirvidabharana) we can only say that it was not written by Kalidasa, the author of Raghu-vamsa, etc. Probably there were many Kalidasas and one such was the one belonging to the 6th century A. D.

For, the शत्रुञ्जयमाहात्म्य (Satrunjayamahatmya) mentions a king विक्रमादित्य (Vikramaditya) as having ascended the throne in 544 A. D. Probably वराह (Varaha) and this neo Kalidasa were contemporaries of this Vikrama. Similarly अमरसिंह (Amarasimha) who is identified with अमरदेव (Amaradeva) that built the Buddha Gaya temple in about 500 A. D. is said to be a contemporary of our author. This too will lead to the above conclusion of his date. Many scholars from the days of Colebrook, Davis, Sir William Jones, Weber and Lassen have done much research work on Varahamihira.

(According to Sage Garga, the Science of Astronomy-cum-Astrology was created by the creator himself for the sake of the twice-born as ancillary to the Vedas. It was handed down to Garga by Brahman, and from him, other sages got it and thus its knowledge was disseminated throughout the world.)

It is but right that we draw here the attention of the readers to the erroneous judgment of many a western orientalist regarding Astrology and Greek influence. On the other hand, (it is the Greeks who freely borrowed or learnt the various scientific truths from the Aryans of India. Clement of Alexandria calls Pythagoras, the celebrated Greek, a pupil of the Brahmanas. The Swami Vivekananda, the great spiritual and intellectual giant of modern India, has ably refuted the false theories of the Western Orientalists. He says :—

“There may be, it is true some similarity between the Greek and Indian terms in astronomy and so forth, but the westerners have ignored the direct Sanskrit etymology and sought for some far-fetched etymology from the Greek. That

such shallow and biased learning has been manifested by many orientalist in the West is deplorable. From a single Sanskrit Sloka that reads, 'The Yavanas are Mlechchas; in them, this Science is established; therefore, even they deserve worship like Rishis.....' in the west, they have gone so far as to declare that all Indian sciences are but echoes of the Greek; whereas a true reading of the Sloka may show that the Mlechcha disciples of the Aryans are herein praised in order to encourage them to a further study of the Aryan Sciences.....".

Only a sage can comprehend this Science, says our author (II-4). The present author does pay homage to the ancient authorities on this subject. He also just alludes to the various theories regarding creation propounded by the Sankhyas, Vaiseshikas, Meemamsakas and others and passes on to the subject on hand. The Science consists of three Skandhas or branches, *viz.* Ganita, Hora and Sakha (*vide* I-9). The treatment of the whole subject in all its details is said to be *संहिता* (Samhita) which itself means a collection. Accordingly Garga says that the Great Brahman who is well-versed in these three branches is said to be an expert in Samhita. But our author points out that he has already done justice to two of the branches, *viz.*, Ganita (गणित) and Jataka (जातक) in his पञ्चसिद्धांतिका (Panchasiddhantika) and बृहज्जातक (Brihat Jataka) respectively (*vide* I-10). He gives in the 2nd Chapter the details of the *संहिता* (Samhita) thereby indicating that the term Samhita is independently used for the Sakha also by itself. But he gives a resume of the first two Skandhas also.

(It has been stated (CVII-13) that this work consists of 100 Adhyayas, in Slokas 3900 when converted into

अनुष्टुप् (Anushtub) metre.) Out of the 107 Adhyayas now printed in this book, the chapters on (1) वृत्तचक्र, (2) रजो-लक्षणं, (3) अङ्गविद्या, (4) पिटकलक्षणं, (5) विवाहपटल (6) नक्षत्र जातक and (7) शास्त्रानुक्रमणी are apparently not his. These have been noted in their respective places.

The qualifications of an astrologer (Adh. II) are really very high and not within easy reach of ordinary mortals. The author says that a king should employ a chief astrologer assisted by 4 others. He is of opinion that no good people should live in a country where there are no good astrologers. The esteem in which the author holds them is indeed very great. He is equally strong in condemning pseudo-astrologers.

The chapters on Omens give a great deal of useful information. If man is careful in noting them when he goes out, he will be forewarned about the results of his efforts. The author says that (XLVI-2) the evil omens are the results of man's Karma in previous births and that they are intended to warn him.

There is a whole chapter giving various types of the आर्या (Arya) metre containing their Ganas and Yatis and also many varieties of Dandakas. Verse (LXVIII-112) is an example of good poetry.

The verse आसन्मघासु मुनयः is very useful in finding the time that has elapsed since the reign of the Pandavas. But here there is a doubt in the next line of the verse, where he says so many years intervene between Yudhishtira and the commencement of the Saka era. Some hold different views regarding this शक. Some say that it

refers to the **विक्रमशक** and others to the **शालिवाहनशक**. But in our opinion, it points to the latter.

The chapter entitled **विवाहपटल** was composed by one **विन्ध्यवासी**. **दकांगल** forms part of the **मनुसंहिता**. Manu is said to be one of the 18 ancient authors of Samhita. In **गर्गसंहिता** itself, Manu's authority is recognised. This shows that Manu was a very ancient sage.

The author quotes a number of authorities in this Science: Parasara, Garga, Vriddha Garga, Kasyapa, Narada, Pitamaha Siddhanta, Saura Siddhanta, Paulisa Siddhanta, Vasishta Siddhanta, Romaka Siddhanta, Vishnugupta, Asita, Devala, Rishiputra, Sukra (Bhrigu or Usanas), Maya, Brihaspati, Saka, Garutman, Saptarshi, Badarayana, Nagnajit, Saraswata, Savitra (a work), Shashtyabda (a work?), Manu, Viswakarman, Vajra, Sri Dravyavardhana, Bharadwaja, Kapila and Kanabhuk. In other works of his, the author quotes the following : Satyacharya or Bhadatta, Manittha, Devaswamin, Siddhasena, Yavanacharya, Jeevasarman, Latacharya, Simhacharya; and Aryabhata.

Some hold the view that Garga and Vriddha Garga are one and the same person. But in XIII-2 and XLVIII-2, he mentions Vriddha Garga by name. The quotations of Bhattopala, the commentator, also prove that they are different persons. Cf. XXXI. Vriddha Garga is referred to in the Mahabharata also. We are of opinion that they are different. The **गर्गसंहिता** which is otherwise known as **बृहद्गर्गीय** contains almost the same chapters with the same titles. In this work, there is a chapter entitled **युगपुराण** dealing with the Yugas. Asita

who was a great astronomer cast the horoscope of the Buddha according to Hieuntsang. Kasyapa also was a very ancient sage, who does not mention the Romakas at all.

From this work, it appears quite clear that वराह had already written his पञ्चसिद्धान्तिका and the बृहज्जातक (I-10). According to him, the होरा (Hora) should treat of horoscopy, questions about journey and marriage. The पञ्चसिद्धान्तिका which is based on the five Sidhantas has been published with an English translation by G. Thibaut in 1888. He seems to have written two other big works, namely Brihat Yatra and Brihat Vivahapatala. He has also written three smaller editions of these, viz (लघु ?) स्वरज्जातक, लघुयात्रा and लघुविवाहपटल. The Brihat Jataka is very famous. Bhattopala has commented upon it. One महेश्वर also seems to have written a commentary on it. Albiruni speaks of a commentary on it by बलभद्र (Balabhadra). This Balabhadra has written an independent astrological work from which extracts are quoted in the pages of Jatakaparijata. The लघुजातक which is also commented upon by Bhattotpala has been translated into Arabic by Albiruni as already stated above. Only two chapters of this लघुजातक are now available. The यात्रा according to Utpala contains 14 chapters. Dr. Kern has said that a manuscript copy of this work was with him. The copy now available has only 7 chapters and goes under the name of योगयात्रा. It is not complete either. Hence we may conclude that it might be the लघुयात्रा.

We know nothing about the author's विवाहपटल. Owing to its utter absence, the commentator has probably in-

roduced a chapter by विन्ध्यवासी\*. The author has written a समाससंहिता which is known to us only from the quotations of the learned commentator.

The author's son पृथुयस (Prithuyasas) was also a great astrologer. He has written the षट्पञ्चाशिका and होरासार as far as we know. The latter is a very useful work giving many new ideas and has been utilised by Mantreswara in his Phaladeepika especially in respect of Ashtaka Varga (*vide* page 265 of that work).

The present work has the commentary of Bhattot-pala which is very exhaustive and helpful. It gives valuable quotations from many ancient authorities and the other works of the author. At the end of his commentary on the Brihat Jataka, he says that he finished his commentary on Thursday, the 5th day of the Bright half of the month of Chaitra in 888 of the Saka era-956 A. D. He has commented upon the योगयात्रा and also the षट्पञ्चाशिका of पृथुयस. His scholarship was deep and vast. He seems to have written a work भट्टेत्पलहोराशास्त्रम् in 75 stanzas. He has also written a work-वास्तुविद्या (see P. 439). He was well acquainted with all the ancient works on Astrology, Astronomy, Poetics, etc. He is very frank. Where he is ignorant, he openly owns that. For example, in perfumery, he says his knowledge is very meagre. He holds our author in the highest esteem. Scholars all over the world should be grateful to this commentator for his having preserved by his quotations

\*According to one tradition, this is Varahamihira, himself as he was living in the Vindhya before he went to the Royal Court.

many authors in this field whose works are now lost. We are not pioneers in presenting an English translation of this great work. Before us, Dr. Kern and Chidambara Iyer have translated it. But those editions are not available now. Moreover, they are deficient in some respects. They do not also give the translation by the side of the text.

We too might have nodded in certain places in spite of our care and scrutiny ; for, we are also human beings and this is a very big work whose publication has necessarily extended over a long period. We have given notes under the translation wherever necessary and not grouped the notes in an appendix to avoid the reader being put to inconvenience by referring to the concerned pages.

The author says at the end of the work, the course of the work and the Slokas it contains. Here Sloka means a **श्लोक** or 32 syllables.

It may not be out of place here if we tell the readers that in spite of the heavy cost of printing and paper, the price of this book has been kept sufficiently low in order to enable all classes of readers to have easy access to it. We take this opportunity to record our heartfelt thankfulness to Mr. V. B. Srikantaiya, Proprietor, Messrs. V. B. Soobiah & Sons, Printers, for printing this huge work promptly in a spirit of cordial co-operation and service to the Goddess of Learning, in spite of the scarcity of labour and consequent hardships.

# BRIHAT SAMHITA

उपनयनाध्यायः ॥१॥ Introductory.

जयति जगतः प्रसूतिर्विश्वात्मा सहजभूषणं नभसः ।

द्रुतकनकसदृशदशशतमयूखमालार्चितः सविता ॥१॥

*Sloka 1.*—The Sun who is the procreator of the Universe, who is the supreme being (soul of the Universe), who is the natural ornament of the sky and who is adorned with rows of thousands of rays that resemble molten gold, is flourishing supreme.

प्रथममुनिकथितमवितथमवलोक्य ग्रन्थविस्तरस्यार्थम् ।

नातिलघुविपुलरचनाभिरुद्यतः स्पष्टमभिधातुम् ॥२॥

*Sloka 2.*—Being convinced of the correctness and truth of the voluminous science expounded by Brahma (the first sage), I now begin to write this scientific work explaining clearly its ideas in a way which is neither too brief, nor too copious.

मुनिविरचितमिदमिति यच्चिरन्तनं साधु न मनुजग्रथितम् ।

तुल्येऽर्थेऽक्षरभेदादमन्त्रके का विशेषोक्तिः ॥३॥

*Sloka 3.*—Simply because this ancient work was composed by a sage, it should be good, while that written by an ordinary man of the present day could not be so. When the sense conveyed in both the cases is the same, while the words used alone are different, why should

there be any distinction between the two as it is a non-Vedic subject ?

The translation of a Vedic passage into any language is not as sanctified as the original though the sense may be the same as the former lacks the शब्द (Sabda) or the sound of the original.

क्षितितनयदिवसवारो न शुभकृदिति यदि पितामहप्रोक्ते ।

कुजदिनमनिष्टमिति वा कोऽत्र विशेषो नृदिन्यकृतेः ॥४॥

*Sloka 4.*—It has been declared by our grand father (Sage Brahma) that the day of the week belonging to Mars—that is Tuesday—is not auspicious. People of our generation have also stated that the week day of Mars will not prove good (for beginning or doing any function). Wherein is the special merit in the two declarations of man and God ?

आब्रह्मादिविनिःसृतमालोक्य ग्रन्थविस्तरं क्रमशः ।

क्रियमाणकमेवैतत्समासतोऽतो ममोत्साहः ॥५॥

*Sloka 5.*—Looking into the vastness of the science that has emanated from Brahma and others and its being epitomised gradually by successive sages, I also take pleasure in writing this work in a brief manner.

This science *viz.*, Astronomy-cum-Astrology was created by Brahman himself as ancillary to the Vedas. It was handed down from him to गर्ग (Garga) and other sages.

*Cf.* गर्गः

स्वयं स्वयम्भुवा सृष्टं चक्षुर्भूतं द्विजन्मनाम् ।

आसीत्तमः किलेदं तत्रापां तैजसेऽभवद्द्वैमे ।

स्वर्भूशकले ब्रह्मा विश्वकृदण्डेऽर्कशशिनयनः ॥६॥

*Sloka 6.*—Originally, there was only darkness pervading throughout the universe. Then came water. From it sprang a blazing golden egg consisting of the two parts of the shell, *viz.*, the earth and the firmament. Out of this, it is said, arose Brahman, the creator, with the Sun and the Moon for his eyes.

*Cf.* मनुः

*Sloka 7.*—Sage Kapila has declared प्रधान-Pradhana (the unmanifested Prakriti) to be the material cause of the universe, while Sage Kanada—who was the founder of the atomic theory relating to the origin of the Universe—has described the Dravyas—the nine substances—as the material cause. Some have opined that time is the cause of the universe. There are others who say that the universe was produced and is sustained by the natural and necessary action of substances according to their inherent properties (and not by the agency of a supreme being). Lastly, there are people who state that the actions—good or bad—of the beings are the cause of the universe.

तदलमतिविस्तरेण प्रसङ्गवादार्थनिर्णयोऽतिमहान् ।

ज्योतिःशास्त्राङ्गानां वक्तव्यो निर्णयोऽत्र मया ॥८॥

*Sloka 8.*—Enough of this incidental discourse on a polemical and vast subject, and which, if it were to be discussed, would swell to a very great length and be of no avail to us for the present. I am now going to treat in a decisive manner of the principles of the science of Astrology—Jyotissastra—and the ancillary topics.

होराभ्योऽङ्गविनिश्चयश्च कथितः स्कन्धस्तृतीयोऽपरः॥९॥

*Sloka 9.*—The science of Astrology consists of various branches and is in three sections or Skandhas—*viz.*, गणित-Ganita, होरा-Hora and शास्त्र-Sakha, and the treatment of the subject in its entirety is termed by sages

संहिता-Samhita (compilation or collection). The first स्कन्ध or section where the exact movements, etc., of the planets in the several signs of the zodiac are ascertained through mathematical computation is otherwise known as तन्त्र-Tantra. Horoscopy is another section ; अङ्गविनिश्चय-Angavinischaya or locating precisely the correct position of the Lagna, etc., which is the first step in जातककर्म-Jatakakarma is the 3rd.

होरागतं विस्तरतश्च जन्मयात्राविवाहैः सह पूर्वमुक्तम् ॥१०॥

*Sloka 10.*—By me have been treated in detail in the करणग्रन्थ (Karana Grantha) पञ्चसिद्धान्तिका (Pancha Siddhanthika), of retrograde and direct motions of the several (non-luminous) planets from Mars onwards, their disappearance (eclipse) through proximity to the Sun, and their reappearance or emerging after conjunction with the Sun, their state of being at war or planetary fight. All things connected with horoscopy along with births, journeys, marriages, etc., have been already treated of in my previous works.

This shows that Varahamihira had already written Brihat Jataka, Yatra, etc.

प्रश्नप्रतिप्रश्नकथाप्रसङ्गान् खल्पोपयोगान् ग्रहसम्भवांश्च ।

सनत्यज्य फल्गूनि च सारभूतं भूतार्थमर्थैः सकलैः प्रवक्ष्ये ॥११॥

*Sloka 11.*—Omitting queries and their respective answers which are not highly useful for our purpose, and also the origin of the planets and other unessential discussions, I am going to treat of real facts—the quint-essence of everything that is useful.

## सांवत्सरसूत्राध्यायः । ॥२॥ The Astrologer.

### १. अथातः सांवत्सरसूत्रं व्याख्यास्यामः ।

We shall now comment upon the aphorisms relating to an astrologer :—

२. तत्र सांवत्सरोऽभिजातः प्रियदर्शनो विनीतवेषः सत्य-  
वागनम्रयकः समः सुसंहितोपचितगात्रसन्धिरविकलश्चारुकरचरण-  
नखनयनीचबुकदशनश्रवणललाटभूतमाङ्गो वपुष्मान् गम्भीरोदात्त-  
घोषः । प्रायः शरीराकारानुवर्तिनो हि गुणा दोषाश्च भवन्ति ।

2. The astrologer should be of noble descent, good-looking, modest in disposition, truthful, free from malice, impartial, with well-proportioned limbs all perfect and unimpaired, strong joints, undeformed, with fine hands, feet, nails, eyes, chin, teeth, ears. forehead, eye-brows and head, with handsome physique and a voice deep and sonorous. For, merits and demerits are generally the reflections of good and bad physical features.\*

\* Cf. Kumara Sambhava-Canto V—36.

यदुच्यते पार्वणि पापवृत्तये न रूपमित्यव्यभिचारि तद्वचः ।

तथा हि ते शीलमुदारदर्शने तपस्विनामप्युपदेशतां गतम् ॥

३. तत्र गुणाः । शुचिर्दक्षः प्रगल्भो वाग्मी प्रतिभानवान्

दैवात्ययात् । ग्रहगणितसंहिताहोराग्रन्थार्थवेत्तेति ।

3. The following are the good qualities of an astrologer. He must be clean and active, bold and

eloquent, have readiness of wit, fully conversant with the details of the place and time and sincere in disposition. He should not be timid in an assembly, should not be overpowered by his fellow students, must be well-trained, should understand the heart of others, should be free from vices, must be conversant with the art of propitiation, with hygiene, magic and ablutions, should be engaged in the worship of the Devas, should be an observer of fast and penance, should be endowed with great power resulting from the wonderful achievements of his scientific knowledge, should be capable of answering questions put by others, and voluntarily suggesting palliatives and remedies regarding things other than the visitations of God. He should also be thoroughly conversant with works dealing with calculations of the positions, etc., of planets, Samhita, Horoscopy and their several details.

४. तत्र ग्रहगणिते । पौलिशरोमकवासिष्ठसौरपैतामहेषु पञ्चस्वेषु सिद्धान्तेषु युगवर्षायनर्तुमासपक्षाहोरात्रयामघूर्तनाडी-प्राणत्रुटिब्रुह्याद्यवयवादिकस्य कालस्य क्षेत्रस्य च वेत्ता ।

4. In that astronomical science, there are five schools, *viz.*, Paulisa (belonging to Pulisa), Romaka (a Siddhanta, probably derived from the Romans), Vasishtha (belonging to Vasishtha), Saura (belonging to Surya), Paitamaha (or Brahma Siddhanta), that is Siddhanta by Brahmagupta. In these are treated of all about Yuga, year, Ayana, Ritu, Masa, Paksha (fortnight), Day, Night, Yama, Muhurtha, Nadee, Prana, Thruti and its further subdivisions of time, and the astrologer should be conversant with all these and also with the ecliptic.

#### ५. चतुर्णां च मानानां सौरसावननाक्षत्रचान्द्राणामधिमस- कावमसंभवस्य च कारणाभिज्ञः ।

5. He should also be familiar with the four kinds of measurements of time, *viz.*, सौर-solar ; सावन, a duration (day) intervening between the first rising of any particular planet or star and its corresponding next rising ; नाक्षत्र stellar calculation in terms of lunar months, Tithis, etc., with the occurrence of Adhimasa or intercalary lunations and intercalary days.

A सौर day is the interval between one sun-rise and the succeeding one. A सावन or terrestrial day is the interval between two contiguous risings of the Sun at the Equator. Thirty such days constitute a सावन month, नाक्षत्रदिन is the time taken by the Moon to clear a Star. A चान्द्रमास consists of 30 lunar Tithis and is a period intervening between two successive conjunctions of the Moon with the Sun. An Adhika Masa is a period of a lunar month occurring between two solar Sankramanas in the same Rasi. For this and अवम, see Suryasiddhanta.

#### ६. षष्ठ्यब्दयुगवर्षमासदिनहोराधिपतीनां प्रतिपत्तिच्छेदवित् ।

6. He should be familiar with the computation of the commencement and termination times of the 60 year-period, the Yuga (5 year-period), a year, a month, a day, an hour and also of their respective lords.

There are 12 Yugas or five-year periods in a cycle of 60 years and their lords are stated as follows :

विष्णुः सुरेज्यो ब्रह्मभिर्भुताशस्त्वष्ट्रोत्तरप्रोष्ठपदाधिपश्च ।

क्रमाद्युगेक्षः पितृविश्वसोमशक्रानलाख्याधिभगाः प्रदिष्टाः ॥

#### ७. सौरादीनां च मानानामसदृशसदृशयोग्यायोग्यत्वप्रति- पादनपटुः ।

In the case of the several systems of measurements of time, *viz.* Solar, Savana, Lunar, etc., he must be able to distinguish what are similar and what are not similar; and also be conversant with the aptness or otherwise of each for (being used for) any particular purpose.

८. सिद्धान्तभेदेऽप्ययननिवृत्तौ प्रत्यक्षसममण्डललेखासंप्रयोगाभ्युदितांशकानां छायाजलयन्त्रदृग्गणितसाम्येन प्रतिपादनकुशलः ।

8 In cases of difference of opinion among the Siddhantas regarding the actual termination of an Ayana, he should be able to reconcile them by showing the agreement between accurate calculation and what has been actually observed in the circle drawn on the ground through shadow and water-appliances.

९. सूर्यादीनां च ग्रहाणां शीघ्रमन्द्याभ्योत्तरनीचोच्चगतिकारणाभिज्ञः ।

9. He should also be conversant with the causes that lead the planets from the Sun onwards to proceed in different kinds of motions—rapid, slow, southerly, northerly, towards apojee, perijee, etc.

*Vide Sripatipaddhati—P. 48.*

१०. सूर्याचन्द्रमसोश्च ग्रहणे ग्रहणादिमोक्षकालदिक्प्रमाणस्थिति-विमर्दवर्णादेशानामनागतग्रहसमागमयुद्धानामादेशः ।

10 In the matter of the Solar and Lunar eclipses, he should be able to predict by calculation the times of their commencement, cessation, direction, magnitude, duration, intensity and color as well as the Moon's prospective conjunctions with the non-luminous planets and their warfare.

११. प्रत्येकग्रहभ्रमणयोजनकक्ष्याप्रमाणप्रतिविषययोजनपरि-  
च्छेदकुशलः ।

11. He should in the case of every planet be able to calculate its distance (in Yojana) from the Earth, the length of its orbit, etc.

१२. भूमगणभ्रमणसंस्थानाद्यक्षावलम्बकाहर्व्यासचरदलकाल-  
राश्वुदयच्छायाणादीकरणप्रभृतिषु क्षेत्रकालकरणेष्वभिज्ञः ।

12. He should be familiar with the Earth's rotation (in its own axis) round the Sun and also with its revolution in the stellar firmament, its shape (संस्थान) and the like, the latitude (of a place) and its complement, the difference in the lengths of the day and night, the Chara Khandas of a place, the rising periods of the several signs at any place, the methods of conversion from shadow to time and time to shadow, to find the exact period—elapsed ghatikas since Sun-rise or Sun-set—at any required time from the position of the Sun or from the Lagna as the case may be.

For Charakhandas, see Sripatipaddhati PP-157-160.

१३. नानाचोद्यप्रश्नभेदोपलब्धिजनितवाक्सारो निकषसन्तापा-  
भिनिवेशैः कनकस्येवाधिकतरममलीकृतस्य शास्त्रस्य वक्ता तन्त्रज्ञो  
भवंति ।

13. He is a true astrologer who is able to understand the objections and points of differences and meet them in clear and convincing language thus proving the truth of the science in its pristine purity in the same way as separating pure gold by bringing it under the touch-stone, fire, hammer, etc., and enabling it to retain its pure value.

न प्रतिबद्धं गमयति वक्ति न च प्रश्नमेकमपि पृष्टः ।

निगदति न च शिष्येभ्यः स कथं शास्त्रविज्ञेयः ॥१॥

*Sloka 1.*—How could one who is not able to understand the ideas contained in the Sastras (incorrectly interprets the same), nor cares to answer any question that may be put to him, nor explains his views to his students, be termed an Astrologer that has grasped the essence of the science ?

ग्रन्थोऽन्यथाऽन्यथार्थं करणं यश्चान्यथा करोत्यबुधः ।

स पितामहमुपगम्य स्तौति नरो वैशिकेनार्याम् ॥२॥

*Sloka 2* —He is only a fool whose interpretation is quite opposed to the spirit of the text and whose calculations are also wrong. This is just like his approaching his grand father or God Brahman and praising before him his grand mother or Saraswati attributing the qualities of a courtesan to her.

तन्त्रे सुपरिज्ञाते लग्ने छायाम्बुयन्त्रसंविदिते ।

होरार्थे च सुरुद्धे नादेष्टुर्भारती वन्ध्या ॥३॥

*Sloka 3.*—When the astrologer has well-understood the mathematical portion, and has arrived at the correct Lagna by means of shadow, water-appliances, etc., and has acquired a firm grasp of the science his predictions and teachings will never prove void of effect.

उक्तं चार्यविष्णुगुप्तेन—

दासादयेदनिलवेगवशेन पारम् ।

न त्वस्य कालपुरुषाख्यमहार्णवस्य

गच्छेत्कदाचिदनृषिर्मनसापि पारम् ॥४॥

The revered Vishnugupta says :

*Sloka 4.*—It may be possible for a man trying to cross the ocean even to reach the other shore through the force of the wind. But it is not at all possible for a person who is not a sage to reach even mentally the other shore of the vast ocean of Kalapurusha, *i. e.*, Astrology.

१४. होराशास्त्रेऽपि च राशिहोराद्रेष्काणनवांशकद्वादशभागत्रिंशद्भागबलबलपरिग्रहो ग्रहाणां दिक्स्थानकालचेष्टाभिरनेकप्रकार-बलनिर्धारणं प्रकृतिधातुद्रव्यजातिचेष्टादिपरिग्रहो निषेकजन्मकाल-विस्मापनप्रत्ययादेशसद्योमरणायुर्दायदशान्तर्दशाष्टकवर्गराजयोगचन्द्रयोगद्विग्रहादियोगानां नाभसादीनां च योगानां फलान्याश्रय-भावावलोकननिर्याणगत्यनूकानि तत्कालप्रश्नशुभाशुभनिमित्तानि विवाहादीनां च कर्मणां करणम् ।

14. And the science of horoscopy comprises the following : the several divisions, *viz.*, Rasi, Hora, Drekkana, Navamsa, Dwadasamsa, Trimsamsa, the ascertainment of their strength or weakness, the calculation of the Balas of the planets due to दिक्, स्थान, काल, and चेष्टा in their various (Vargas) divisions, the humours of the planets, the constituent elements of the body represented by them, the substances pertaining to them, their castes, their characteristics, etc., the time of Nisheka (impregnation) and actual birth, extraordinary cases of birth and their prediction, the time of one's immediate death, the years contributed by the planets for one's life, the Dasa and its sub-divisions, Ashtakavarga, Raja yogas, the Chandra or lunar yogas, conjunctions of two or more planets, Nabhasa and other yogas and their effects, the effects of planets due to their occupation of

a Rasi, Bhava, etc., and the effects of their aspects on them, one's exit from the world, the region to which the deceased had belonged in his previous birth and the region to which he goes, the effects on queries—good or bad—at any time, good or bad omens, the performance of marriage and other rituals.

All the above subjects are treated of in Brihat Jataka and Vivaha Patala—विवाहपटल. This latter work is not by Varahamihira but by one author called विन्ध्यवासि, another great astrologer, who has written on Muhurta for marriage and so on. [See Adhyaya 103 *infra*]

१५. यात्रायां तु तिथिदिवसकरणनक्षत्रमुहूर्तविलग्नयोगदेहस्पन्दनस्वप्नविजयस्नानग्रहयज्ञगणयागाग्निलिङ्गहस्त्यश्वेज्जितसेनाप्रवादचेष्टादिग्रहषाङ्गुण्योपायमङ्गलामङ्गलशकुनसैन्यनिवेशभूमयोऽग्निवर्णामन्त्रिचरदूतादिकानां यथाकालं प्रयोगाः परदुर्गोपलम्भोपायश्चेत्युक्तं चाचार्यैः।

15. And in the work यात्रा too, the seers have declared all about Tithis, week days, Karanas, asterisms, Muhurta (48'), Lagna, Yoga, the throbbing of the body, dreams, baths for success in battle, sacrifices performed for the propitiation of planets, the worship of the Yakshas 7 days prior to the day of starting on a journey, prognosis through the movement—clockwise or otherwise—of the flame of the Sacrificial fire, the correct understanding of the feelings of the elephants and horses through the movements of their limbs, military proclamations and tendencies, omens, etc., the suitability through the help of the planets of any of the six expedients in foreign politics, *viz.*, (1) सन्धि-peace or alliance (2) विग्रह-war (3) यान-march or expedition (4) स्थान or आसन-halt (5) संशय-seeking shelter and (6) द्वेष-duplicity; the four

means of success against an enemy. *viz.*, (1) सामन्-conciliation or negotiation (2) दान-bribery (3) भेद-sowing dissensions and (4) दण्ड-punishment (open attack)—to be judged by the omens (good or bad) when setting out on a journey; nature of the camping ground—lands for the location of the army—, the colors of (ceremonial) fires, the procedure of employing at the proper time ministers, spies, envoys, foresters, instructions for besieging and capture of fortresses belonging to others.

जगति प्रसारितमिवालिखितमिव मतौ निष्कृतमिव हृदये ।  
शास्त्रं यस्य सभगणं नादेशा निष्फलास्तस्य ॥५॥

*Sloka 5.*—He who has got a clear grasp of the astrological science inclusive of the mathematical portion as if it were spread before his eyes in the world and engraved in his intellect and imbedded in his heart, the predictions made by him will never prove ineffective.

१६. संहितापारगश्च दैवचिन्तको भवति ।

16. It is only he who has made a complete and thorough study of the Samhita that becomes fit to divine the past, present and future—a true Astrologer.

१७. यत्रैते संहितापदार्थाः ।

17. The undermentioned subjects are treated of in the Samhita.

The movements of the Sun and other planets, their nature and extent of change if any, their magnitude, color, rays, brilliancy, their form or figure, their setting and rising, their route, the nature of their motion on the way, retrograde and direct, upwards and downwards, conjunction with a star or planet and of their course among the stars and the like, their effects, the nine triads of stars (divided like a tortoise) and their effects in the countries, the Agasthya Chara (the course of Canopus), the time of its rise (which ushers the Sarat Season when every thing on earth assumes a lively appearance), the course of the seven (sages मरीचि, अत्रि, अङ्गिरस, पुलस्त्य, पुलह, ऋतु and बलिष्ठ) stars, the constellation called Ursa Major and their effects, the assignment of countries, substances and living beings to the planets and also to

the stars, the ascertainment of the good effects resulting from planets occupying all the three houses, *viz.*, 1st, 5th and 9th, effect of planets being at war, their conjunction with the Moon, the planet presiding over the year and the effect caused thereby, monsoonish indications of the weather, the Moon's conjunction with the stars, Rohini, Swati, Purvashadha and Uttarashadha, symptoms for immediate rain, predicting good or bad effects through the growth of flowers and fruits, the misty halo round the Sun and the Moon, line of clouds crossing the Sun at Sunrise or Sunset, of the winds, fall of meteors, apparent outbreak of fire in the quarters, earthquakes, redness of the sky just before Sunrise or after Sunset, clouds taking the appearance of a City, of dust-storms, portent of thunderbolts, variation in value of commodities, the growing of corn, fruits, etc., Indradhwaja or banner worshipped by kings, rainbow, architecture, the science of foretelling good or evil by the movements of limbs, or by the cawing of crows, Antarachakra omens, phenomena connected with the deer, dogs, winds blowing in the 8 directions, royal mansions, construction of temples, casting of images, installation or consecration of an idol, herbalistic treatment, finding of sources of water, ceremony of general purification by water (done by kings, etc.), flight of the Khanjana (wagtail), expiation of evil caused by unusual phenomena boding calamity, Mayura Chitraka घृतकंबल or पुष्पस्नान (coronation ceremony when the Moon is in पुष्य), of swords, tiara or diadem, all about the features, etc. of कृकवाकु-a cock, tortoise, cow, rain, horse, elephant, a man and a woman, about the harem, breaking out of boils, injuries to shoes and clothes, on chowries, staffs, beds and

seats, examination of gems and precious stones, lamps, materials derived from tusks, wood, etc., good and bad omens which are common to all the people of the world inclusive of the King and the ordinary individual. And all the above should be divined by an astrologer every moment with a single-minded devotion. And it is not possible for a single person to comprehend all these occurring day and night. Hence an astrologer in the employ of a king should engage four efficient assistants for the task, each to be in charge of two directions, thus: one to observe east, and south-east, a second for the south and south-west, a third for the west and north-west, and the fourth for the north and north-east. By this, it will be possible for noting clearly the fall of meteors and the like which is sudden in its nature and one's good and bad effects have to be predicted through the form, color, viscosity, size, etc., of these falling bodies and as to how they dash or strike against the other planets and stars.

शृङ्गाटक (Sringataka) yoga. If at a birth all the three houses viz., 1st, 5th and 9th are occupied by planets, Sringataka yoga is formed. The yoga and its effect are thus described by Varahamihira in his Brihatjataka :

*Slokas 2-3.*—At present, one course of the Sun begins from the commencement of Karkataka and the other from the beginning of Makara. That it is different from what has been stated above can easily be ascertained by direct observation.

By marking every day the position of an object situated at a distance at the time of the rising or setting of the Sun, or watching the entry and exit of the brim of the shadow of a stick placed at the centre of a big circle drawn on the Earth, the difference in the Sun's course may be detected.

प्रकृति is interpreted by Bhattotpala as agreement between calculation and actual observation in the Sun's change of course.

Much worse will be the effect they produce when they are in the Sun's disc.

*Slokas 12-16.*—Wherever these Thamasa Keelakas show themselves in the Sun's disc, there will be distress and misery to the kings ruling over these countries. And even sages, emaciated being stricken with hunger, forsaking their usual religious duties and good conduct will be emigrating with great difficulty to other countries, having in their arms infants—mere skeletons—without flesh due to want of food. Good men will be robbed of their entire wealth by thieves and will be heaving long sighs ; and their eye-lids will be drooping and bodies, languid ; and their eyes will be obstructed by tears due to sorrow. Feeling weak and disgusted on account of trouble caused not only by their own Government but also by other (bordering) kings, people will begin to speak in disdain

about the behaviour of their own kings and will not attribute their suffering to their previous Karma. Clouds though thick with full quantity of water will not let loose the same to fall on the earth. Rivers will become attenuated and crops will be found only here and there (only in a few places).

Now the author speaks of the effect of the several shapes of these portents.

*Sloka 17.*—If there should appear in the Sun's disc Thamasakeelaka in the form of a stick, it portends the death of the sovereign ; if the object appear like a body without the head (headless), there will be outbreak of diseases ; if the form be that of a crow, there will be danger from thieves, and if the form be that of a Keelaka (wedge), there will be famine.

*Sloka 18.*—If the Sun's disc be obscured by obstacles in the form of a king's paraphernalia such as umbrella, chowrie, banner, etc., it indicates a change of a sovereign. If the Sun be hidden by sparks of fire, smoke, etc., it forebodes the destruction of people.

*Sloka 19.*—If there should be one single object in the Sun's disc, it denotes the advent of famine. If there be two or more, it indicates the destruction of the sovereign. And should the objects referred to above be

of the colours, white, red, yellow and black, the destruction of the following classes in their order, *viz.*, Brahmins, Kshatriyas, Vaisyas and Sudras is indicated.

दृश्यन्ते च यतस्ते रविबिम्बस्योत्थिता महोत्पाताः ।

*Sloka 20.*—And these portents appearing on the Sun's disc bring danger from these directions to the people that behold them. People will get troubles from that very quarter in which these portents make their appearance on the Sun's disc.

*Slokas 21-22.*—If the Sun be with upward rays of copper (red) colour, it denotes the ruin of the commander. If the colour be yellow, it betokens the destruction of the king's son ; if it be white, the preceptor will die. If the colour of the Sun's upward rays be variegated or misty and if there should be no immediate rain following, it causes chaos and disaster to the country through thieves, clash of weapons, etc.

Now he speaks of the Sun's colour in the different seasons :

ताम्रः कपिलो वार्कः शिशिरे हरिकुङ्कुमच्छविश्च मधौ ।

आषाण्डुकनकवर्णो ग्रीष्मे वर्षासु शुक्लश्च ॥२३॥

प्रावृद्काले स्निग्धः सर्वर्तुनिभोऽपि शुभदायी ॥२४॥

*Slokas 23-24.*—During the Sisira Ritu, the colour of the Sun will be like that of copper or tawny; it will be of greenish yellow or saffron colour in the Vasantha Ritu. In Greeshma Ritu, it will be almost pale or golden. In the Varsha Ritu, it will be whitish; in Sarad Ritu, the colour will be that of the interior of the lotus; and in the Hemanta Ritu, it will be blood-red, and the effect on mankind will be all auspicious. In the rainy season the Sun being glossy or showing the colours of other seasons a so is auspicious.

Simhika begged of Sage Kasyapa at an unseasonal hour for progeny. Enraged at this untimely request, he gave her a son who was dreadful like Yama. This son came to be called Rahu. As soon as he was born, he fought and sustained a defeat at the hands of the son of Aditi. Humiliated by this, he performed severe penance for 10,000 divine years on the summit of the Himalayas. He asked God Brahma to confer on him the status of a planet, immortality, victory over the Gods and power to devour the two luminaries. At this, the Lord spoke smilingly thus : " You will find it extremely hard to digest these two ; still, be it so." So saying, the Lord vanished. Then Rahu rushed at them. *Sloka 12.*—In the case of a lunar eclipse, the concealing agency is very big, while in that of the solar, it is small. Hence in semi-lunar and semi-solar eclipses, the luminous horns are respectively blunt and sharp.

*Slokas 14-15.* The following boon has been conferred by Brahman on Rahu, the Demon : "You shall have to live and rest satisfied with whatever gifts and oblations that may be given at the time of an eclipse." During that period his presence is recognised. There are two places or nodes for the Moon caused by her deviation south or north and this is ascertained by astronomical calculation. The ascending node is termed Rahu.

*Sloka 17.*—It is not correct to say that an eclipse cannot occur unless five planets combine ; it is also incorrect for the learned to suppose that on the previous Ashtami day the eclipse and its characteristics can be guessed by examining the appearance of a drop of oil poured on the surface of water.

*Sloka 18.*—The magnitude of the Sun's eclipse is to be determined by the Moon's deflection (parallax). The direction in which the eclipse commences has to be found out through the deflection and angles of the Moon known as अयनवलन and अक्षवलन (Ayanavalana and Akshavalana). The actual time of the eclipse has to be found out by noting the exact time of conjunction of the Sun and the Moon. These have been described in detail in my astronomical work Pancha Siddhantika.

*Slokas 20-23.*—During the Parvan presided over by Brahman, the Brahmins and cattle will prosper. The whole period will be marked by happiness, health and abundance of corn. In the Moon's Parvan, there will be similar prosperity for the Brahmins and the quadrupeds; but the learned will suffer and there will be drought. In the six-month period owned by Indra, there will be quarrel among kings; crops of the autumnal season will fail and there will be no happiness. In the period owned by Kubera, rich people will suffer loss of wealth, but there will be general prosperity in the land. In Varuna's period there will be no happiness for the kings, but people will be happy and there will be abundance of corn. In the six-month-period swayed by Agni—also known as Mitra—there will be plenty of crops; the people will be immune from disease and there will be abundance of water. During Yama's period, there will be no rain; people will suffer from famine and there will be a general destruction of crops. In the event of an eighth Parvan occurring next to this owing to unusual causes or phenomena, there will be general suffering due to hunger, death and drought.

*Sloka 25.*—The effects of eclipses occurring a bit earlier or later than the actual time calculated have been described as stated above simply because they have been so stated in the ancient Sastras. However, the time calculated by a true astrologer will in no case prove inaccurate.

Note here Varahamihira's bold and dogmatic assertion that calculations done on proper lines will never be false. Consequently, there is absolutely no chance of there being any difference between the actual occurrence of an eclipse and the calculation.

(If the visible portion of the sky be divided into seven equal divisions and if such an event happen in the first division, those that earn their livelihood with the help of fire such as gold-smiths, virtuous men, Brahmins and hermits will suffer. Agriculturists, heretics, traders, the Kshatriyas, leaders of the army, these will be destroyed, if the eclipse happens in the second division.) The eclipse that occurs in the third division will bring on distress to artisans, artists, the Sudras, the Mlechchas and ministers. (When the eclipse happens in mid-day, *i. e.*, the central or fourth division, the king and the central country will be destroyed; corn will sell at fair rates.) Quadrupeds, ministers, people in the harem and Vaisyas will perish when the eclipse occurs in the 5th division of the sky. The eclipse in the sixth division will destroy the womankind and the Sudras; while thieves and people living in the border countries will be annihilated when the eclipse occurs at the setting time. When Saturn is the planet that is aspecting, rains will fail, famine and risk from thieves will result:

These are explained in detail in Adhyaya 67 of the मत्स्यपुराण-Mathsya Purana. *Sloka 16.*—Jupiter is beneficent when he transits two asterisms in the course of the year. The effect will be medium when he passes through 2½ lunar mansions. If he should perchance go through more than this, he would destroy all the crops.

*Slokas 17-18.*—If Jupiter has the colour of fire, there will be risk from fire ; if the colour be yellow, diseases will break out ; if it be dark, a battle will be impending ; if it be green, there will be danger from thieves ; if it be red, there will be trouble from weapons ; if it be smoky, there will be drought. If Jupiter be visible in the day, there will be regicide. If his disc appear big and clear at night and he be posited in an auspicious lunar mansion, the whole world will be happy.

In Sloka 18, नृपाः is another reading for प्रजाः

*Sloka 19.*—The asterisms Kritika and Rohini constitute the body of the संवत्सरपुरुष-Samvatsarapurusha ; the two Ashadhas (Purva and Uttara) form the navel ; Aslesha, the heart ; and Magha, the flower. When these lunar mansions are devoid of malefics, the effect will be auspicious. If the body be afflicted by malefics through conjunction or aspect, there would be danger from fire and wind. If the navel be afflicted, there will be risk from famine. If the flower be afflicted roots and fruits would be destroyed. When the heart is afflicted, there will be the inevitable destruction of crops.

*Slokas 20-21.*—Find out the number of years that have elapsed since the commencement of the Salivahana era. Multiply this by 44. Add 8539 to the product and divide the result by 3750. To the quotient thus obtained, add the Saka years. Divide this by 60 and the remainder thereof by 5. The quotient represents the five-year-periods ruled by Vishnu and others, and the remainder denotes the number of years that have elapsed in the particular lustrum.

एकैकमन्दिषु नवाहतेषु दत्त्वा पृथग्द्वादशकं क्रमेण ।

हत्वा चतुर्भिवसुदेवताद्यान्युद्गुनि शेषांशकपूर्वमन्दिम् ॥२२॥

*Sloka 22.*—Place the years of Jupiter obtained in the previous Sloka separately in two places. Multiply the first by 9 and divide the other by 12. Add the above product (in the first case) and the quotient (in the second case). Divide the result by 4. The quotient will reveal the particular asterism reckoned from Dhanishta. The remainder will denote the Padas (पाद) in the next star that have been traversed by Jupiter.

In a Mahayuga (the period comprising the four Yugas),  
the number of solar years is  $4320000 = 3750 \times 1152$  \* 43706+0  
That of Jupiter for the same period is as per Surya  
 $4370688^* = 3794 \times 1152$  Siddhanta.

So that for every 3750 solar years we have 3794 years of Jupiter.  
Therefore 1 solar year =  $1 + \frac{44}{3750}$  years of Jupiter.

To find out the number of Jupiter years that had elapsed (in Kaliyuga) at the time of the commencement of the Salivahana era, we have to proceed thus :

The number of solar years that have passed from the beginning of Kaliyuga till the commencement of the Saka era is 3179. This converted into Jupiter years will be  $\frac{3794}{3750} \times 3179$  or  $3216 \frac{1126}{3750}$

Now it is known that Kaliyuga commenced in the year Vijaya (the 27th year from Prabhava, which is the first year in a cycle of 60 years of Jupiter).

Therefore,  $3216 \frac{1126}{3750} + 26$  or  $3242 \frac{1126}{3750}$  being divided by 60, the remainder will give the particular year of Jupiter (in his cycle of 60 years) from Prabhava at the time of commencement of the Saka era, and this remainder is  $2 \frac{1126}{3750}$  which is the 3rd year or the year Sukla of the cycle.

Coming down to the period subsequent to the commencement of the Saka era, say the present time (वर्तमान शक-Vartamana Saka 1868 April 1945), the number of Jupiter years that have elapsed will be  $1867 + \frac{44 \times 1867}{3750} + 2 \frac{1126}{3750}$  from the beginning of Prabhava or  $1867 + 21 \frac{3398}{3750} + 2 \frac{1126}{3750}$  or  $1891 \frac{774}{3750}$  which indicates that it is the 32nd year of the cycle or Vilambi. But actually, it is Hemalamba. The reason is that the figures for Jupiter's years as given by Aryabhatta or as per Surya-siddhanta are a bit more than that of Varahamihira. His figure 8589 appearing in Sloka 20 is different from 8626 that we got above. Calculating backwards from 8589, we find the number of siderial revolutions of Jupiter according to Varahamihira to be 364190000. This is probably the correct figure.

Sloka 22 gives a clue to find out the particular lunar mansion in which Jupiter may happen to be at any given time.

Taking the current Saka year 1868, we have the Saka years that have elapsed as 1867. The number of Jupiter years that have elapsed as calculated in the penultimate paragraph of page 96 will be  $1891 \frac{774}{3750}$ . This when divided by 60 gives a quotient 31.

As per Sloka 22, we have to multiply the above quotient 31 by 9; then we get 279; and by dividing the same quotient by 12 we get  $2\frac{7}{12}$ . Adding these two figures we get  $281\frac{7}{12}$ . Dividing this result by 4 we get 70 and odd, thus indicating the asterism traversed by Jupiter, as the 17th. This when reckoned from Dhanishta is Uttaraphalguni.

The next year known as Tharana gives copious rain. The year Parthiva is declared to yield luxuriant crops.) The fifth year, namely Vyaya, will prove auspicious. Love reigns supreme and festivities will be the order of the day.

The commentator Bhattotpala adopts the reading नत्तं च instead of न तच्च in Sloka 35, and interprets नत्त to be the name of the third year instead of Tharana. In the next sloka, he adopts Tharana as the fourth omitting Parthiva. Accordingly he adopts the reading सुदितानिपार्थिवम्. This is not convincing as it is against our tradition.

low the four years Pramadi, Ananda, Rakshasa and Anala.) In the year Paridhavi, the middle country will suffer, and a king will die. There will be dearth of water and trouble from fire. In the year, Pramadi, people will be lazy ; there will be war, and red flowers and red seeds will be destroyed. The next year Ananda will bring joy to all. The two years Rakshasa and Anala will produce a general decay ; the former will be marked by the growth of summer crops and the latter by the outbreak of fires and epidemics.

*Sloka 5.*—It has been declared by other sages that just as there are the three courses in the starry firmament, even so, the asterisms have their positions defined as northern, central and southern according to their situation in respect of the ecliptic. Similarly, if Venus transits north of a star, he is said to be in his northerly course, etc.

Similarly the effects have to be pronounced to be even, middling and slightly bad, when Venus traverses the next three routes. If after the rising of Venus in this मण्डल-Mandala another planet should pass over him, the latter will destroy the kings of the tribes Bhadrāswa, Surasena, Yaudheya and Kotivarsha.

But he will be unfavourable to the Brahmin class, especially so to those that commit cruel deeds. If Venus is overpowered in this मण्डल-Mandala by another planet, he will cause distress to the Mlechchas, foresters eaters of dog's flesh and cowherds, the people of Gonarda, low-class people, Sudras and the people of Videha.

Kshatriyas, and the growth of crops, but creates misunderstanding among friends. If Venus be overpowered (by another planet) in this Mandala, death overtakes the Kirata-chieftain, and the Ikshvakus will be crushed. So also will be the cave-men, people of Avanti, Pulindas, Tanganas and Surasenas.

Utpala gives in a quotation the definition of the cleaving, *alias* occultation, of the junction star of Magha by a planet :

भेदलक्षणं गणितकारैरुक्तम् ।

छादयति योगतारां मानार्द्धनाधिकाद्भ्रवक्षेपान् ।

स्फुटविक्षेपो यस्यः धिकोनको भवति समदिक्स्थः ॥

The definition of the occultation of the star in question according to the scientific astronomers, is as follows : “A planet occults the junction star of Magha (Regulus) when its own rectified latitude, being in the same direction (north), is more than half the latitude, and less than one and a half the latitude of the star” From this we may deduce that the author of the stanza, whoever he may have been (probably Brahmagupta), had a still more accurate knowledge of the real latitude of Regulus than the Surya Siddhanta has, in which the latitude is stated to be 0. Another stanza defines the latitude of the Moon when causing the occultation of certain stars :

After touching the Seven Sages (Great Bear)—Vasishta and others—and also the Pole Star (Dhruva) and the star Abhijit he returns after travelling half the sky and sets in the south. When this comet appears, people in the region beginning from the banks of the Prayag and extending to the town of Ujjain and Pushkara forest will be destroyed. Those living in the north as far as the Devika river and the whole of the middle country will be wiped out. Other countries also will suffer from diseases and famine here and there. These effects will happen in the course of ten months. Others say it will be felt for 18 months.

NOTE.—Compare (with the above) what modern science has to say on the subject of comets :

“What then is a comet according to the latest scientific researches ? The spectroscope has pretty well solved the query. It consists, first, of a more or less solid nucleus of fire, blazing and glowing ; second, of vast masses of incandescent gas, constituting the luminous head ; third, solid materials, constituting the tail, which are ponderable, which reflect the Sun's light and are carried along by the influence of the nucleus ; fourth, an immense prolongation of the tail in the nature of attenuated volumes of gas. The solid materials of a comet, it is believed, consist of stones and sand, particles ground by ceaseless attrition. The proof of this is the concession of most astronomers that meteoric showers are shreds and patches of cometic matter, dropped from the tail, and these meteors are stones. The genesis of comets is found to be in the explosion of planetary bodies, a theory not without good scientific authority.

Arago estimates that there are 17,000,000 of these fiery wanderers within the orbit of Neptune, and Lambert regards 500,000,000 as a moderate estimate for those in the solar system. All the astronomers agree that they are scattered through space as profusely as the fish in the seas. The Orbit of the Earth is overwhelmed in a fine net work of cometary orbits, and our globe is like a lost child in a forest full of wild beasts.”

*Slokas 2—7.*—Listen ! ye, now, to the description of the appearance of the Sage, who, in days of yore, suddenly heightened the splendour of the ocean by the drying up of its waters through the mountains situated in the interior whose summits were scooped out by the claws of crocodiles and which had streams of water in the form of choice gems and jewels falling upon them along with pearls, putting to shame as it were the Gods having a limited number of gems on their diadems,

He, by whom the ocean though deprived of its watery contents, was made more beautiful by means of the mountains shorn of their trees and decked with gems, jewels and corals and through the serpents that emerged from them in long rows,

He by whom the great ocean though brought to grief being drained off, was raised to divine glory since it displayed glittering whales, water-elephants and serpents, also heaps of gems scattered about,

The Commentator interprets the first two compounds as applying to Devaloka also.

Though the water is taken away, the ocean filled with floundering whales, pearl-oysters and conch-shells,

still possesses the splendour of a lake in autumn with its waves, lotuses and swans,

He who converted the ocean (the lord of the rivers) into the sky, as it had white clouds in the form of whales, stars in the form of gems, the Moon in the form of crystal gem, the autumnal lustre in the form of the waterless bed and Ketu or comets in the form of the rays of the gems on the hoods of serpents,

And he who stemmed the Vindhya Mountain which was bent upon obstructing the course of the Sun's carriage and so had moving peaks, and which was adorned by the flags hoisted aloft in the form of clothes on the bodies of the Vidyadharas, who clinging to the shoulders of their confused lovers eagerly seated them on their own laps ; which possesses streams inside the caves occupied by lions whose heads are covered with bees following the fragrance caused by the tasting of the blood mixed with ichor on the heads of the elephants and are wearing ornamental wreaths of 'Vana' flowers as it were on their heads ; which was scratching as it were, the firmament with its uplifted peaks which had the deep sound of humming of the swarms of the intoxicated bees that were scattered by the shaking of the trees in bloom by the elephants and which (peaks) were the abodes of hyenas, bears, tigers and monkeys ; which is embraced in private by the Rewa river (Narmada) having the Madana trees on her banks just as one is embraced in amorous sport by one's beloved, in whose gardens dwell the Gods and which is accompanied by sages who subsist on water, nothing, roots and air ; such was the Vindhya, when he was stemmed by Agasthya. Listen ! ye, now, to the singing of that sage.

On the contrary, Utpala expressly intimates that the rising of Canopus when the Sun stands in Hasta, is contrary to science, and only repeated by the author out of deference for the Ancients. He says किलेत्यागमसूत्रे, which is quite true ; where our author uses किल, it is so much as *relata refero* यद्यत्रापि गणितसाम्यं न भवति तथाप्याचार्येण पूर्वशास्त्रदृष्टत्वात् कृतम् । The three periods of rising are

enumerated by Parasara, as quoted by Utpala. Here part of the passage:

*Slokas 1-2.*—I shall describe according to the theory of Sage Vriddha Garga, the course of the Seven Seers, by whom the northern region has a lord as it were, through whom she shines as if adorned with a necklace of pearls, like a maiden with a joyful countenance wearing a wreath of white lotuses ; the seers by whose circular movements, the northern region seems verily dancing at the instruction of the Pole-Star, the leader.

*Sloka 3.*—The Seven Sages were in the lunar mansion—Magha—when King Yudhishtira was ruling over the earth, the period of that King being 2526 years before the commencement of the Saka (Vikramarka?) era.

The assumption made by certain commentators that शक should invariably refer to Vikrama Saka (56 B. C.) does not seem to be altogether correct. For, it is said in the Mahabharata that Kali set in soon after Krishna's departure. This should be 3102 B. C. Hence the age of Yudhishtira should be somewhere at the earlier part of the 32nd century before Christ. Subtracting 2526 from this figure we find that the Saka referred to in the Sloka should be in the 7th Century B. C. (far earlier than the age of the Buddha—5th century B. C.). Hence the above remark.

### कूर्मविभागाध्यायः ॥१४॥ Kurma Vibhaga.

With reference to our Puranas, it can be ascertained that जम्बूद्वीप-Jambudweepa (one of the seven continents surrounding the mountain Meru) was divided into nine sub-continents each being termed a वर्ष-Varsha. These nine divisions are (1) कुरु-Kuru (2) हिरण्मय-Hiranmaya (3) रम्यक-Ramyaka (4) इलावृत-Ilavrita (5) हरि-Hari (6) केतुमाला-Ketumala (7) भद्राश्व-Bhadraswa (8) किन्नर-Kinnara and (9) भारत-Bharata. The name of the Adhyaya suggests in itself that the word कूर्म-Kurma instead of being literally translated as 'tortoise' should be construed to mean 'Globe.' This is further supported by the first Sloka of the chapter which starts with nine divisions of the 27 lunar mansions—each division consisting of 3 stars commencing from Krittika. The reader will note that the original divisions of the zodiac started from the first quarter of Krittika, the star owned by the Sun, the lord of the nine planets.

That our ancient authors went hand in hand with a thorough knowledge of the 18 Puranas is another reason for us to interpret कूर्म as Globe. For जयदेव-Jayadeva, the poet, in his गीतगोविन्द-Gitagovinda, while describing the 10 incarnations of Vishnu as

वेदानुद्धरते जगन्निबद्धते भूगोलमुद्विभ्रत  
 दैत्यं दारयते बलिं छलयते क्षत्रक्षय कुर्वते ।  
 पौलस्त्यं जयते हलं कलयते कारुण्यमातन्वते  
 म्लेच्छान्मूर्च्छयते दशकृतिकृते कृष्णाय तुभ्यं नमः ॥

observes the कूर्मावतार as 'जगन्निबद्धते' (one who carries the Globe on his back) and this interpretation is now taken advantage of.

Also compare the following सुभाषित —

 युक्तां सर्वैः समुद्रैर्हिमगिरिकनकप्रस्थमुत्थैर्नगैर्द्वैः ।  
 एतद्ब्रह्माण्डमस्यामृतघटसदृशं भाति वंशे सुरारिः  
 पायाद्वः कूर्मदेहः प्रकटितमहिमा माधवः कामरूपी ॥

The following remarks of Dr. H. Kern on the subject will also be of interest :

"The word *Kurma* is the specific Sanskrit form of a word once common to all Indo-European tongues, viz, *Kurma*, Lat. *culmus*, Teuton. *holm*, etc. It does not originally denote the 'tortoise' itself, but its back, for the proper meaning is "mound, buckle, half-globe, holm." Even in Sanskrit, in such compounds as *Kurmonnata*, the word signifies the form of the back of the tortoise. At the time when the word *Kurma Vibhaga* became current, *Kurma* was taken in its proper sense. Yet in later times, they wholly mistook the meaning and made an absurd drawing, representing a tortoise, as if *Kurma* could denote a level! The rendering by 'Globe' is not wholly exact, since properly only a half-globe, a *holm* is supposed to be raised above the waters."

"The *Apasavyam* or *Asavyam* *Yuddham* takes place when the interval is somewhat less than a degree; at a greater interval there is no conflict at all."

Dr. Kern.

अंशुविरोधे युद्धानि भूमृतां शस्त्ररुक्क्षुद्रवमर्दाः ।

युद्धे चाप्यपसव्ये भवन्ति युद्धानि भूपानाम् ॥५॥

*Slokas 4-5.*—At the occurrence of an occultation, rains will fail and discord will prevail among friends and powerful families. When planets graze each other, there is danger from the sword, dissensions among royal councillors and dearth of food. At a clashing of the rays, there will be war between kings and desolation by sword, disease and famine. At the अपसव्य-*Apasavya* conflict, their will be hostile encounters between monarchs.

Utpala says : अपसव्यः प्रदक्षिण उच्यते । समं कृत्वा दक्षिणोत्तरा-  
वस्थानमपसव्यमुच्यते । आचार्येण चन्द्रग्रहसमागमे अपसव्यलक्षणं कृ ।  
शशिनं फलमुदकस्य इत्यादि । (XVIII-8 *infra*.)

Dr. Kern adds—"This is not difficult to understand, for the Moon leaving, in her eastward course, a planet or star at her own right (*i. e.* standing north from the planet or star), may be said to make a *pradakshina*; standing to the south, *i. e.*, leaving a planet or star at her left, she makes an *apasavya*. Thus *Apasavya* means "from the left, at the left," and, in a special application, "at the south side;" but from this, it does not necessarily follow that *apasavya* originally was simply the opposite of *Savya*, "left". Yet it cannot be doubted that they have taken *apasavya* as the reverse of *Savya*, or, in other words, that *apa* was understood to mean, not "from the side," but "not;" therefore *asavya* was considered to be simply synonymous with *apasavya*. Moreover, *Savya* has got the meaning of "right," precisely the reverse of its most common acceptance, *vis*, "left."

Not to be confounded with this acceptance of *Savya* is its use in augury. Applied to augural birds, etc., *Savya* is strictly and properly "left," but as birds first appearing from the left of the observer move in the direction of his right, and keep him at their own right, *savya*, "left," and *pradakshina*, "moving to the right," imply the same, without being the same. Utpala remarks ;

सर्व एव शकुनादयो यातुर्वामपार्श्वोदग्रत आगत्य दक्षिणपार्श्वेणाक्रामन्ति  
यत् तत्प्रदक्षिणं सव्यञ्च । एतद्विपरीतं दक्षिणपार्श्वोद्ग्रामपार्श्वगमनं यत्तदपसव्यम् ।

In astronomical works, *Savya* "moving (revolving) toward the right" and *Apasavya* "moving toward the left, is common enough ; *e. g.* Surya Siddhanta xii—55 ; Siddhanta Siromani, Goladhyaya 3—51, Arya Bhatiya IV—16.

*Slokas 6-7*—The Sun when standing in the meridian is called आक्रन्द-Akranda, *i. e.*, an ally coming to the rescue ; when in the east, he is a पौर-Paura, *i. e.*, a king staying in town ; in the west, he is a यायी-Yayee, a king who marches off. Mercury, Jupiter and Saturn are always Pauras, while the Moon is always Akranda. Keta, Mars, Rahu and Venus are marching planets.. All the planets known as the Akranda, Yayee, and Paura when hurt, will destroy severally kings coming to the rescue, marching and staying in town. In the case of their being victorious, they bestow victory on their own class of kings.

पौरे पौरेण हते पौराः पौरान् नृपान्विनिघ्नन्ति ।

*Sloka 8*.—When a पौर-Paura planet is overpowered by another of the same description, kings keeping the town will kill others in the same predicament. The same

applies to वायि and आक्रन्द planets and kings. In case of a conflict between पौर and वायि planets, that which is victorious will bestow victory on its own class of kings.

It will thus be seen that Varahamihira fulfils the promise he had made above (in the Panchasiddhantika), by 'treating of this subject in the present work. Dr. Kern remarks in his foot notes:—

"It is not known which source has been chiefly used by our author in this particular instance ; thus much, however, is certain, that long before his time Greek horoscopy had been introduced into India."

By मुनिप्रणीतं, Varahamihira certainly refers to Garga, Parasara and a host of other Hindu astrologers [as he] has consistently been doing in all his works. No doubt, Yavana lived before Varahamihira and that Greek astrology was not unknown in India in his time. But to say that this idea about Varsha and Masa Phalas has been introduced into India by Yavana is 'certainly incorrect as sages who lived in India ages before have freely spoken about these. It may safely be said that ancient sages of India like

Garga, Parasara, etc., have known all about these and that Varahamihira perfected all these things in his Samhita as promised, knowing also that Yavanacharya also has known all about these.

It may not be out of place to bring to the notice of the readers that Maharshi Parasara, the father of the celebrated Vyasa, popularly known as वेदव्यास-Vedavyasa, existed far before the advent of Kali (कलि), that is, the fourth millennium B. C., and that for a sage of this repute, it is not correct to conclude that Parasara had to learn everything from 'the West. What I want to impress is that our ancient sages who were founders of the Six Angas (षडङ्ग) of the Vedas, did not require any foreign agency to put them in the way, but that they were in themselves, each a mine of knowledge. Further, to support my statement that Indian culture existed earlier than the Greeks, I quote below the following line from Raghuvamsa :—

*Slokas 1-3.*—The state of things in a year, month or day presided over by the Sun will be as follows : everywhere, the earth is covered with very little crop, the

forests are infested with voracious tusked animals as a visitation ; very little water flows in the rivers ; medicines do not show their usual potency. Even in winter, the Sun burns scorchingly ; clouds, though big as mountains, do not pour forth sufficient rain. The Moon and the cluster of stars in the sky lose their brilliance. Groups of hermits and cattle languish. Monarchs with irresistible forces consisting of elephants, horses and foot-soldiers, with their followers and with an excellent armament of bows, swords and clubs go about destroying the lands by war.

*Slokas 4-6.*—During the year presided over by the Moon, the sky will be covered with clouds which resemble moving mountains, which show the dark hue of snakes, collyrium, bees and buffaloes' horn, and which fill the whole earth with pure water and the quarters with a deep sound that creates pangs of separation in the minds of lovers. The water-sheets are decked with lotuses and lilies, the trees are blossoming and the bees humming in the parks ; the cows yield abundant milk, and charming ladies increasingly delight their handsome lovers with amorous sports. (Kings rule over the earth rich in wheat, paddy, barley, Kalama rice and plantations of sugarcane), and in towns and mines marked with sacrificial altars and resounding with the noise of great and small sacrifices.

The clouds, although bulky in appearance and piled up will not let loose anywhere much water. Even the crops that grow in the low-lying lands wither out. Even if it should bear fruit, it will be forcibly taken away by robbers. Kings do not attend whole-heartedly to their governing duties. Bilious diseases prevail ; there will be trouble from snakes. Rearing of cattle, trade, and husbandry will thrive through honesty. / Vedic studies will be in a state of perfection. Justice will be administered scrupulously by kings as by Manu himself. of robbers, will be deprived of cattle and properties and whole families will cry piteously owing to the murder of their near and dear ones and be oppressed by fell diseases and hunger. The sky will be bereft of clouds being chased by the wind ; all the trees with their branches broken down will cover the earth. The sky will not be illuminated by the rays of the Sun and the Moon, since it is covered with a dense mass of dust. Tanks and lakes will dry up ; and the rivers will become very shallow. When a stationary planet associates with another stationary planet, or one on march with another of the same type, the conjunction is named समाज or meeting. When some other planet joins the party made up of Jupiter and Saturn, there is कोश or fellowship. If two planets, one rising heliacally in the east and the other in the south (a little behind), it is called सन्निपात or an encounter. *Slokas 9-12.*—The foetuses formed in the beginning of Margasirsha and Pushya are of little consequence. Those formed in the dark half of Pushya may come out in the bright half of Sravana. Similarly, those that are formed in the bright half of Magha will see the light of the day in the dark fortnight of Sravana. The former part of Bhadrapada may be fixed upon as the time of birth corresponding to the dark half of Magha. Those that are formed in the first half of Phalguna may be said to come out in the latter half of Bhadrapada. But those in the dark fortnight of Phalguna will be born in the bright half of Aswayuja. The clouds that are formed in the first half of Chaitra will yield water in the latter half of Aswayuja ; and those that are formed in the latter half of Chaitra will rain in the first half of Kartika.

*Slokas 14-18.*—The good symptoms at the time of the conception of clouds are the following : a delightful

and cool breeze from the north, north-east, or east ; a clear sky ; the Sun and the Moon surrounded by a glossy, bright and thick halo ; the sky covered with large, bulky, smooth, needle-like or razor-like, red clouds or having the colour of the crows-eggs or a peacock's neck when the Moon and the stars shine brightly ; a good twilight—morning or evening—accompanied by a rain-bow, good rumbling of thunder, lightning and a mock Sun ; groups of birds and animals crying pleasantly in the north, north-east or east ; the planets being large beaming brightly moving to the north (of the asterisms) and unhurt ; trees with their sprouts unimpaired, and men and quadrupeds happy ; these symptoms nourish all the embryos. There are however some special rules tending to the growth of the embryos and arising from the particular nature of the season which I am now propounding.

*Sloka 3.*—If those four days of retention (धारणा-Dharana) be of the same type, the result will be auspicious. If, unlike, they prove disastrous and are said to engender danger from thieves. The following is the authority of sage Vasishtha.

*Slokas 4-8.*—The days of retention of the foetus will be favourable if they be accompanied by lightning, water-drops, dust-storm, and the Sun and the Moon screened by the clouds. If on the same day there be rain with dust or if children engage themselves in happy sports, the cries of birds be pleasant and their sport be in dust, water or the like, if the Sun and the Moon be encircled by halos which are glossy and not broken, then, there will be rain tending to the growth

of all crops. If the clouds be glossy, collected together and moving in a clockwise manner, there will be a heavy rain favouring the growth of all crops.

### रोहिणीयोगाध्यायः ॥२४॥ The Moon's Conjunction with Rohini

*Slokas 1-3.*—I shall now try to expound briefly the good and bad effects arising from the Moon's conjunction with Rohini, having duly taken cognisance of them as explained by Garga, Parasara, Kasyapa and Maya to their hosts of pupils and as instructed by Brihaspati to Narada in the park on the summit of the Meru, which resounds with the humming of the bees clinging to the flowers of the trees in the caves of the golden rocks, which rings with the twitterings of

numerous birds and which has the melodious strains of music of celestial damsels.

Rohini Yoga is the period of a day when the Moon passes through the star Rohini in the dark half of the lunar month of Ashadha.

In this connection, Mr. Chidambara Iyer, very aptly remarks :  
 "These prefatory remarks clearly shew that what follow are important scientific truths in the eyes of Hindu astronomers: that the weather indications of one single day in a year should form the subject of so much calculation with the Hindus in determining the future agricultural prospect of the land while to the inexperienced eye of a western man of science, the day appears as indifferent or otherwise as any other day of the year argues that modern science is still far behind in her investigations of the laws of nature."

*Slokas 4-5.*—An astronomer should carefully observe the Moon's conjunction with Rohini in the dark half of Ashadha and then predict its good or bad effects to mankind according to the tenets of the Sastras. How a future conjunction of the Moon with the asterism should be foretold has been explained by me in my work Panchasiddhantika under the head of "Conjunction with Fixed Stars". The effects, however, must be declared as deduced from the Moon's size, brightness, colour, direction and from portents at the time and the winds.

He must occupy the bare ground strewn with the Darbha grass, decked at the four corners with water-pots containing gems, water and herbs, covered above with the sprouts of trees and not blackened at the bottom and kept clean and anointed.

If the wind blows round from east to south and so on (*i. e.* in the प्रदक्षिण order), it indicates prosperity to the world. When two contrary winds are blowing, that which shows firmness is more powerful, and it is from this wind alone prediction should be made.

If it rains in the first part of the day, there will be excellent rain during the year. In the second, the effect will be the same coupled with insects and snakes; and

in the third part, the rain will be moderate. If there rain both day and night, there will be very good rain.

The commentator Bhattotpala is of opinion that this Sloka is spurious (not belonging to the text).

Thus ends the 25th Adhyaya on "the course of the Moon's Conjunction with Swati."

### आषाढीयोगाध्यायः ॥२६॥ The Moon's Conjunction with Ashadha.

Ashadhee Yoga means the period of a day when the Moon passes through the asterism of Uttarashadha in the lunar month of Ashadha.

आषाढ्यां समतुलिताधिवासितानामन्येदुर्यदधिकतामुपैति बीजम् ।

*Sloka 1.*—At the time of the full Moon in Ashadha, take equal weights of several kinds of seeds and keep them for a night being sanctified with the Mahavrata hymn. Such seeds as increase in weight will flourish and such as have diminished will not thrive. The hymn in praise of the balance that is used for the purpose of weighing is the following :

*Slokas 2-5* —The balance should be invoked through the following hymns: "As the Goddess of speech is verily Truth, you will show yourself situated in truth, being of the Vow of Truth. May that Truth appear here, the Truth by which the Sun and the Moon the planets and the hosts of stars rise in the east and set in the west, the Truth which exists in all the Vedas, in the vedic scholars and in all the three worlds You are the daughter of Brahman, well-known by the name of Aditya, by the family of Kasyapa and by the popular name of Balance.

*Sloka 6.*—The scale-pans should be of silken cloth six inches long and wide fastened with four strings 10 inches long, and the cord by which the balance is held between the two scales is 6 inches in length.

*Slokas 7-8.*—Gold should be placed in the right hand pan while all other articles as well as water in the left hand one for purposes of weighing. Weigh severally the waters of wells, rivers and lakes. The rain will be meagre, moderate and copious according as well, river and lake water proves the heaviest. The value of elephants is determined by the amount of ivory they have ; of cows, horses and the like, by their hair ; of kings, by the amount of gold in their treasuries ; of Brahmins, Kshatriyas, etc., as well as of countries, years, months and quarters, by beeswax ; and of other substances, by their actual weight.

*Sloka 9.*—A golden balance is the best ; one of silver is middling. In the absence of the above two, it shall be made of खदिर Khadira (Acacia catechu) wood, or it shall be made of a shaft by which a man is wounded. The length of the balance should be twelve inches.

An inch is the space covered over by 8 grains of barley placed side by side—or that of three grains of barley placed lengthwise. It is also the breadth of the human finger.

*Sloka 10.*—Such substances as, again being weighed prove to have diminished in weight, will be lost ; such as have increased will thrive ; such as continue in the same condition will be indifferent. This is called the secret of weighing treasures with the balance. This applies equally to the Moon's conjunction with Rohini also.

*Sloka 1.*—If on the day of the full-moon in Ashadha an easterly wind blows from heaven, being tossed by the stroke of the tops of the billows of the eastern ocean and mingled with the mass of the mane-like rays of the Sun and the Moon, the whole earth will shine being enriched by the splendid vernal and autumnal crops and being covered overhead with groups of dark clouds every-where.

*Sloka 3.*—When at the above conjunction a very rough and howling south-wind blows, making the monkeys dance through the leaves of palm-trees, bowers of creepers and trees, the clouds rising like the elephants which are struck and pricked by the goad shed a few drops of water like miserly persons.

*Sloka 8.*—If the sky be without the rays of the Sun, the Moon and the stars, and if there be no rain, then, I think it cannot be called Bhadrāpada.

Thus ends the 27th Adhyaya on the Wind Circle.

*Sloka 1.*—If, at a query regarding rain, the Moon be posited in the Lagna which is a watery sign (Kataka, Makara, Kumbha or Meena) or in the 4th, 7th or 10th house in the bright fortnight, there will be plentiful rain ere long in the monsoon, provided she is aspected by benefics. If she be aspected by malefics in the

above Yogas, there will be very little rain. In predicting rain, Venus should be treated on a par with the Moon during the rainy season.

The commentator asks the question :—When the Lagna is a Kendra already, what is the meaning of केन्द्रगः ? Does it mean a Kendra other than the Lagna ? Yes, it does. The idea of the author is this : There will be rain, etc., in the dark half when the Moon is in Lagna Kendra alone and not elsewhere, while in the other half, even in another Kendra, it is all right.

*Sloka 3-7.*—In days of yore, the earth, being shaken severely by the winged mountains which flew up and down, spoke bashfully to the creator in the assembly of the Gods—"My lord, the name that has been given to me by you—namely अचला-immoveable—is not quite right, for it is falsified by the flying mountains and I am unable to put up with this misery." Hearing these words of Mother Earth who was choked with tears, whose lower lip quivered slightly, and observing her face hanging down with tears trickling down from her eyes, the Creator spoke thus: "Indra, remove this humiliation felt by Mother Earth; throw your thunderbolt and chop off the wings of the mountains." At this, Indra saying 'So be it', comforted her with the word "Don't you fear; but Wind, Fire, myself and Varuna will shake you in the four parts of the Day and Night put together respectively in order to reveal the good and bad effects to the world."

*Slokas 8-11.*—The circle presided over by the Wind-God consists of the seven asterisms, *viz.*, Uttara, Hasta, Chitra, Swati, Punarvasu, Mrigasiras and Aswini, (that is, whenever an earthquake occurs in any one of these stars, it has to be construed that it is due to the Wind Circle). The following symptoms of this circle will be revealed a week in advance: the quarters are covered with smoke; a wind blows lashing with the dust of the earth and breaking trees; and the Sun does not cast bright rays. During an earthquake of the Wind Circle the decay of crops, water, forest and herbs, the outbreak of swellings, asthma, madness, fever, phlegmatic affections and trouble to the trading community will ensue. So also, concubines, warriors, physicians, women, poets, singers, traders, artisans, the Saurashtras, Kurus, Magadhas, Dasarnas and Mathsyas will suffer.

They are the following : the sky is covered with the fall of stars and meteors ; owing to the fire in the horizon, the sky appears to be illuminated ; the fire with the aid of wind rages over the land. During an earthquake of the ' Fire Circle ', the clouds will be destroyed ; lakes and tanks will dry up ; kings will be at loggerheads with one another ; herpes, scab, fever, erysipelas and jaundice will prevail ; men of great valour, hot-tempered persons, the Asmakas, Angas, Bahleekas, Tanganas, Kalingas, Vangas, Dravidas and hill-men of various tribes will be affected.

The following is the token: the clouds resembling moving mountains, sending forth loud peals of thunder, containing flashes of lightning and appearing like buffaloes' horn, swarm of bees and serpents, pour down rain. An earthquake of Indra's Circle will ruin men of celebrated families and castes, famous persons, kings and heads of corporations. It produces dysentery, swelling of the neck, diseases in the face and violent vomiting. It will also bring trouble to the people of Kasi, Yugangdhara, the Pauravas, Kiratas, Kiras, Abhisaras, Halas, Madras, Arbudas, Saurashtrians and Malwas. But it will give desirable rain.

An earthquake of this circle will kill those that are dependent upon the seas and rivers; it will yield excessive rain. People will forget their mutual hatred. Any other phenomenon which is contrary to nature and its effects should be included in the above circles.

Garga says; persons in whose Nakshatras earthquakes and the like Utpatas occur will suffer miseries; they shall therefore perform expiatory ceremonies in honor of the particular Deva under whose influence the occurrences take place.

Similarly the earthquakes of Varuna's circle counteract one born of the Fire-period and *vice versa*. Thus, the earthquakes of particular periods and circles as stated above cancel each other.

Garga says that if an earthquake is connected with two Nakshatras, division with respect to time of day takes precedence-

*Sloka 1.*—An aerial city seen in the four quarters beginning with the north is harmful to the royal priests, kings, commanders of armies and the Yuvaraja respectively. Similarly, one with white, red, yellow or dark colour tends to the annihilation of the Brahmins, Kshatriyas, Vaisyas or Sudras as the case may be.

नागरनृपतिजयावहृद्ग्विदिक्ष्यं विवर्णनाशाय ।

शान्ताशयां दृष्टं सतोरणं नृपतिविजयाय ॥२॥

*Sloka 2.*—An aerial city seen in the north confers victory on the kings defending towns; in the intermediate quarters, it is for the destruction of persons of mixed castes; and one with triumphal arches in a quarter not facing the Sun, for the victory of kings.

सर्वदिगुत्थं सततोत्थितं च भयदं नरेन्द्रराष्ट्राणाम् ।

शौराटविकान् हन्याद्भूमानलशक्रचापामम् ॥३॥

*Sloka 3.*—One arising in all directions and at all times bodes ill to the kings and countries; and one resembling smoke, fire and rainbow, destroys robbers and foresters.

गन्धर्वनगरमुत्थितमापाण्डुरमशनिपातवातकरम् ।

दीप्ते नरेन्द्रमृत्युर्वामेऽरिभयं जयः सव्ये ॥४॥

*Sloka 4.*—One of faded colour occasions the fall of thunderbolts and storm ; if it is in a blasted region (facing the Sun), a king will die ; if to the left, it produces menace of enemies ; and if to the right, it confers victory.

For दीप्त, refer to Adhyaya LXXXVI-12, *infra*.

अनेकवर्णाकृति खे प्रकाशते पुरं पताकाध्वजतोरणान्वितम् ।

यदा तदा नागमनुष्यवाजिनां पिबत्यसृग्भूरि रणे वसुन्धरा ॥५॥

*Sloka 5.*—When a multi-coloured aerial city, taking various shapes, shines in the sky with streamers, banners and gateways, the Earth will drink in plenty the blood of elephants, human beings and horses in battle.

प्रतिस्ूर्यकः प्रशस्तो दिवसकृद्दिवर्णसंग्रहः स्निग्धः ।

वैदूर्यनिभः खच्छः शुक्लश्च क्षेमसौमिधः ॥१॥

*Sloka 1.*—A mock-Sun is auspicious, if it is glossy and possessing the colour appropriate for the Sun in the season (vide Adh. III—23 & 24 *supra*.); if it possesses the lustre of beryl, is white or bright, it causes happiness and plenty.

पीतो व्याधिं जनयत्यशोकरूपश्च शुक्लकोपाय ।

प्रतिस्ूर्याणां माला दस्युभयातङ्कनृपहन्त्री ॥२॥

*Sloka 2.*—A yellow mock-Sun produces disease ; one of the colour of the Asoka blossom (red) leads to the clash of weapons ; and a row of mock-Suns tends to danger from robbers, to disease and destruction of kings.

दिवसकृतः प्रतिघ्नर्यो जलकुदुंदक्षिणे स्थितोऽनिलकुत् ।

उभयस्यः सलिलभयं नृपमुपरि निहन्त्यधो जनहा ॥३॥

*Sloka 3.*—When a mock-Sun appears to the north of the Sun, it gives rain ; to the south, a strong wind ; on both sides, danger from water ; the same appearing above the Sun, destroys the king ; and below, the people.

This sloka has already appeared in the 3rd Adhyaya as Sloka 37.

In the morning for about three hours, when there are thin clouds near the Sun, there appears another Sun as it were, on account of the Sun's rays (reflected in the clouds). This is called a mock-Sun. This may happen likewise in the evening also.

*Sloka 1.*—They say that a king will be slain when all the quarters are screened by dust, resembling the mass of pitch darkness, so as to make the mountains, cities and trees indistinguishable,

*Sloka 4.*—Dust appearing prominently, covering, as it were, the sky completely at Sunrise for a day or two successively, augurs terrible disaster.

अनवरतसञ्चयबहं रजनीमेकां प्रधाननुपहन्तु ।  
क्षेमाय च शेषाणां विचक्षणानां नरेन्द्राणाम् ॥५॥

*Sloka 5.*—Dust appearing in a mass throughout a night brings about the death of leading sovereigns, but bestows prosperity on other clever kings.

रजनीद्वयं विसर्पति यस्मिन् राष्ट्रे रजोधनं बहुलम् ।

परचक्रस्यागमनं तस्मिन्नपि सन्निबोद्धव्यम् ॥६॥

*Sloka 6.*—When a thick cloud of dust spreads over a kingdom for two nights successively, it should be understood that the country will be the victim of foreign invasion.

निपतति रजनीत्रितयं चतुष्कमप्यन्नरसविनाशाय ।

राज्ञां सैन्यक्षोभो रजसि भवेत् पञ्चरात्रमवे ॥७॥

*Sloka 7.*—If dust falls continuously for three or even four nights, food-grains and liquid-substances will be destroyed ; and if for five nights, there will be mutiny in the forces of kings.

केत्वाद्युदयविमुक्तं यदा रजो भवति तीव्रभयदायि ।

शिशिरादन्यत्रर्चो फलमविकलमाहुराचार्याः ॥८॥

*Sloka 8.*—Dust augurs terrible danger only when it is independent of the rise of Ketu, etc. The sages declare that the effects will be fully realised only in seasons other than winter.

Thus ends the 38th Adhyaya on 'Haze.'

*Sloka 1.*—On the authority of Sage Badarayana are stated the following Yogas, planetary configurations—both good and bad—for the growth of summer and autumnal crops at the time of the Sun's entry into Vrischika and Vrishabha respectively.

भानोरलिप्रवेशे केन्द्रैस्तसाच्छुभग्रहाक्रान्तैः ।

*Sloka 2.*—If at the time of the Sun's entry into Vrischika, the Kendras from him are occupied by benefics or he is aspected by (or conjoined with) strong benefics, summer crops will thrive splendidly.

*Sloka 4.*—When Venus or Mercury, or both, are posited in the second house from the Sun (in Vrischika), or similarly in the 12th house, summer corn will grow well. If the Sun in addition be aspected by Jupiter, the growth will be splendid.

*Sloka 5.*—When Vrischika, wherein is posited the Sun, is surrounded on either side, *i. e.*, the 2nd and the 12th, by benefics, *i. e.*, Mercury and Venus, and when the 7th house from the Sun is occupied by Jupiter and the Moon, there will be excellent growth of corn. When the Sun is posited in the initial part of Vrischika and Jupiter in the second house from it, the growth will be only half.

*Sloka 6.*—When Venus, the Moon and Mercury are posited in their order in the 11th, 4th and 2nd from the Sun in Vrischika, corn will thrive well. If in the above Yoga, Jupiter is posited in the 10th, the great prosperity of cattle also is assured.

कुम्भे गुरुर्गवि शशी सूर्योऽलिमुखे कुजार्कजौ मकरे ।

*Sloka 7.*—If at the time of the Sun's entry into Vrischika, Jupiter be posited in Kumbha, the Moon in Vrishabha, Mars and Saturn in Makara, there is great prosperity of corn ; but later, there will be danger from hostile invasion and disease.

मध्ये पापग्रहयोः सूर्यः सस्यं विनाशयत्यलिगः ।

*Sloka 8.*—The Sun in Vrischika, being surrounded on both sides (2nd and 12th) by malefics, destroys crops. If there be a malefic in the 7th house from Vrischika, crops will be destroyed even though they grow well.

*Sloka 10.*—Mars and Saturn posited in the 7th and another Kendra house from the Sun in Vrischika destroy crops ; and if aspected by benefics, they do not destroy corn everywhere.

*Sloka 13.*—When the Sun, posited in Mesha, Vrishabha or Mithuna, is cojoined with or aspected by benefics (Mercury, Jupiter and Venus), summer corn will fetch good price, will be free from pests and be entirely useful.

Note the other reading उभयोपयोग्यं -fit for this as well as the other world.

कार्मुकमृगघटसंस्थः शारदसस्यस्य तद्देव रविः ।

सङ्ग्रहकाले ज्ञेयो विपर्ययः क्रूरदृग्योगात् ॥१४॥

*Sloka 14.*—Similarly, the Sun posited in any one of the signs Dhanus, Makara and Kumbha and aspected by or conjoined with the benefics, makes the autumnal crops

flourish and fetch fair price, etc. But at the time of harvest, if the Sun be aspected by or conjoined with the two malefics, effects, quite contrary to the above should be understood to happen (*i. e.* the corn will be very costly, useless and infested with pest. But for sale, the period will be all right.)

Thus ends the 40th Adhyaya on 'Growth of Crops.'

So does Mercury, when posited in the 2nd, the 11th, the 10th, the 5th or the 8th house therefrom. You are without birth, imperishable, eternal, of immutable form, all-pervading, the great Boar, ancient being, the God of Death, the destroyer of all things, fire, thousand-headed, Indra and adorable. I invoke the seven-tongued seer; *viz.*, Fire, who is the protector; I invoke the mighty Indra, the ruler of the Gods, the destroyer of Vritra and leader of a mighty army, who protects us carefully. *Sloka 59.*—The King should raise the banner to the accompaniment of the unceasing shouts of crowds drowning all inauspicious sounds through the auspicious benedictions and invocations, the loud sounds of drums, tabors, conchs, kettle-drums, etc., and through the repeated chantings of Vedic hymns by Brahmins.

*Slokas 62-66.*—The wise declare that there is great danger in store for the King if a carcass-eating bird, owl, dove, crow or vulture sits on the Banner. If it be a blue jay, the danger is for the Yuvaraja ; an eagle sitting on it, will deprive the King of his eyes. The King will die if the umbrella on the banner breaks or falls down. If honey-bees cling to it, there will be danger from thieves ; a meteor falling on it augurs the preceptor's death ; a lightning, that of the queen. The fall of a flag denotes the queen's death, while that of an ornament augurs drought. If the staff should break in the middle, top and bottom, the ministers, the King and the citizens will respectively meet with their end. When the staff is covered with smoke, there is danger from fire ; when with darkness, mental aberration will be the result. The ministers will be destroyed if the figures of the snakes fall or break. If portents are observed in the north and other quarters, Brahmins and other castes will suffer. If any of the staffs called 'Indra's daughters' break, courtezans will die. If the ropes should give way, children will suffer. If the prop at the bottom breaks, it indicates trouble to the King's mother. Whatever good or bad is done by boys or actors will have corresponding effects.

The King adorned with jewels of various colours, diamonds, crown, ear rings and armlets and brightened by the rays

*Sloka 1.*—I mean expounding in this chapter the effects enunciated by ancient sages as pertaining to the first sight of the bird called Wagtail.

One which is dark from the face to the neck and termed 'Sampurna' (full) fulfils one's ambition. The one called 'Rikta' or empty has dark spots on the neck and white cheeks. It leads to disappointment. The one called Gopeeta which is yellow in colour produces trouble when sighted.

उत्पाताध्यायः ॥४६॥ Portentous Phenomena.

*Sloka 1.*—I shall now treat of portents emanated by Atri and expounded by Ganga after him. The following is a summary of them: Anything contrary to nature is termed a portent or Utpata.

तथा च समालोक्षितं यत्नम् ॥

यः प्रकृतिविपर्ययः सर्वः सङ्केपतः स उत्पातः ।

क्षितिगगनदिव्यज्जाले यश्चेत्तरं गुरुतरं भवति ॥

संमुख्यन्ति दिव्यान्तरिक्षमौमास्त उत्पातः ॥२॥

*Sloka 2.*—Sins accumulate as a result of wrongful actions committed by men; and troubles arise from them as a consequence. The three kinds of portents, *viz*, celestial, atmospheric and terrestrial, foreshadow such troubles.

"It does not behove Varahamihira, being noted for brevity, to repeat the same subject," so some will find fault with him. But those in the know of this science should not say that this chapter is a repetition of the effects already dealt with, because this chapter, entitled 'Barhi Chitraka'—Peacock's colours—is a well-known chief section of this Samhita (collection) [or "since this is an important section of the Samhita, men of science should not repeat the subject] and it is but the nature of this section to reiterate what has been once recounted. *Sloka 27.*—Auspicious is a twilight that is clear, resounding with the cries of birds and beasts, not facing the Sun, and having gentle breeze; while one spoilt by dust, coarse or blood-like brings about the destruction of the country.

यद्विस्तरण कथितं मुनिभिस्तदस्मिन् सर्वं मया निगदितं पुनरुक्तवर्जम्  
श्रुत्वापि कोकिलरुतं बलिभृग्विरौति यत्तत्स्वभावकृतमस्य पिकं न जेतुं

*Sloka 28.*—Here have I expounded without any repetition all that the ancient sages have treated of in great detail. That the crow caws even after hearing the warbling of the cuckoo, is entirely due to its innate nature and not to its desire of vanquishing the cuckoo.

The following notes of Mr. Chitambara Iyer relating to the phenomena of nature culled from other works are requoted :

“There will be famine as long as the course of Jupiter and that of Saturn lie through the end of the signs Mesha and Vrischika and through the middle of Vrishabha and Simha.

During the period when Jupiter and Saturn occupy a single sign of the zodiac, there would be pestilence, cholera and death among the people.

As long as Jupiter and Venus continue together in a state of disappearance, mankind will suffer from devils, diseases, thieves and enemies.

If the course of Saturn or the retrograde motion of Mars should lie through the signs of Dhanus, Mesha, Vrishabha, Meena or Simha, there would be such deaths among men and animals that only a third of mankind, of elephants, horses, cows and other animals of birds and of creatures of water would survive.

If the motion of Mars should be an accelerated one, there would be fear from destructive fires ; if he should retrograde and enter another sign, the people would suffer from heat and many families would suffer, and if his course should be through a sign longer than the calculated period, there would be drought in the land and rulers will be at war.

If Jupiter should retrograde or if his motion should be an accelerated one, and if in this state he should enter another sign, the rivers would not be full ; the kings would lose their glory and suffer from diseases.

If Saturn should, after a long direct course, begin to retrograde or have an accelerated motion and in this state enter another sign, there would be diseases, famine and drought in the land and vehicles will suffer destruction.

If, when Jupiter should enter another sign when in his accelerated motion, Saturn should be in his slow motion, Venus should have disappeared, and Mercury should have reappeared, the country would perish.

If Saturn, Mars and Jupiter should be within sight of each other, men with their children would suffer from hunger and from weapons.

If, while the course of the Sun lies through the end of the signs Vrishabha, Mithuna, Vrischika and Simha, Jupiter and Mars should be in conjunction with it, mankind would suffer from famine, and the deaths would be so many that in the cremation grounds of villages and towns, Pisachas might be seen with hundreds of dead bodies in their mouths.

If two, three or four planets should meet together, people would suffer from death and famine. If five planets should meet, there would also be famine; if six, the chief ruler would run away from his kingdom, and if seven, humanity would come to an end.

If the course of Mars and Saturn, through the signs of Karakataka, Simha and Meena should be retrograde or re-retrograde, there would be much suffering on earth. There would also be a scarcity of water and wars in the land; grains would be destroyed and mankind would suffer from robbers.

If Saturn and Rahu should meet, crops would be injured; commodity would become scarce; husbands and wives would be at strife, there would be drought and famine in the land; cows would suffer death and men would become exceedingly lazy.

If the course of the Sun and the Moon, both of brilliant discs, should lie through the seven asterisms from Kritika, Madhyadesa would suffer miseries.

If the course of the Sun, the Moon, Mars and Venus should lie through the seven asterisms from Magha, there would be grief and disease among men and the God of Death would be busy in his wide work of destruction in the southern countries.

If the course of Jupiter, the Moon and Mercury, all of brilliant discs, should lie through the seven asterisms from Anuradha, the western countries, as far as the sea, as well as the western sea itself with its creatures would suffer miseries.

If the course of the Sun, Venus and Mars should lie through the seven asterisms from Sravishta, the northern countries would suffer miseries. If the benefic planets should appear of the colour of gold, the Brahmins, the Kshatriyas, the Vaisyas and the Sudras would all attend to their respective duties and would become happy."

Thus ends the 47th Adhyaya on "Motley Miscellany."

*Slokas 24-28.*—In that place, a circle should be drawn by the priest and filled with varieties of gems, and places kept apart for worshipping the different deities, viz., Serpents, Yakshas, Gods, Manes, Gandharwas, Nymphs, Sages and Siddhas. The learned priest should draw with various coloured powders the figures of the planets with all the stars, Rudras, the Mothers (7 in number), Skanda, Vishnu, Visakha, the protectors of the quarters and divine ladies, and duly worship them with perfumes, garlands, scented paste, eatables and food of various kinds and varieties of roots, fruits and meat and attractive drinks such as toddy, milk and wine.

*Slokas 29-33.*—Now I shall explain the mode of worshipping the deities drawn in the circle. As for the planets, the same method as given in the यन्त्रा in connection with planetary sacrifices should be followed. The Danavas, Daityas and Pisachas are to be worshipped with flesh, rice, liquor, etc. ; the Manes with oil bath, collyrium, sesamum, meat and rice ; the sages with hymns from Sama, Yajus and Rig Vedas, perfumes, incense and garlands ; the serpents with unmixed colours and the triple sweet—honey, ghee and sugar ; the Gods with incense, ghee, oblations, garlands, gems, invocations and salutations ; the Gandharwas and the nymphs with fine perfumes and sweet-smelling garlands ; the remaining deities with multi-coloured offerings. All the deities should be worshipped and also strings dipped in saffron-paste, cloths, flags, ornaments and sacred threads should be placed in their respective compartments.

On the circle should be placed earthen plates filled with ghee and Payasa and with these materials, worship should be done on the western altar, as this is the one recommended for the royal ablution.

They should be filled with water containing the herbs prescribed for the ablution, and gems and then the materials for the ablution enumerated by Sage Garga as hereunder (*vide* next two *Slokas*), should be collected.

इत्येतैश्चान्यैश्चाप्यथर्वकल्पाहितैः सरुद्रगणैः ।

कौष्माण्डमहारौहिणकुबेरहृद्यैः समृद्ध्या च ॥७१॥

*Sloka 71.*—With these hymns and others prescribed in the books on rituals belonging to the Atharva Veda, Rudragana (11 Anuvakas), Kausmanda (six anuvakas), Maharauhina, Kubera Hridaya and the Samridhi Rik, the above anointing ceremony should be done.

आपोहिष्ठातिसुभिर्हिरण्यवर्णेति चतसृभिर्जप्तम् ।

कार्पासिकवस्त्रयुगं विभृयात्स्नातो नराधिपतिः ॥७२॥

*Sloka 72.*—After a bath, the King should wear a pair of cotton cloths, sanctified by the three verses of the hymn commencing with आपोहिष्ठा and by the four beginning with हिरण्यवर्णा.

पुण्याहशङ्खशब्दैराचान्तोऽभ्यर्च्य देवगुरुविप्रान् ।

छत्रध्वजायुधानि च ततः स्वपूजां प्रयुञ्जति ॥ ७३॥

*Sloka 73.*—Then the King sipping water, while the sounds of conchs and chanting of Punyaha hymns flourish, should worship Gods, Preceptors, Brahmins, his royal umbrella, banner and weapons and lastly his own guardian deity (or his usual worship to be done).

आयुष्यं वर्चस्यं रायस्पोषाभिर्ऋग्भिरेताभिः ।

परिजप्तं वैजयिकं नवं विदध्यादलङ्कारम् ॥७४॥

*Sloka 74.*—Then the King should wear new ornaments conducive to victory, sanctified by the verses आयुष्यं, वर्चस्यं, रायस्पोष, etc.

*Slokas 75-76.*—Going to the second sacrificial altar, the King should sit on the skins which are to be placed one over another in this manner—first, the skin of a bull is placed, over this, that of a cat, over this, that of an antelope, over this, that of a spotted deer, over these, the lion's, and lastly, the tiger's over them.

त्रिनयनशक्रबृहस्पतिनारायणानित्यगातिर्ऋग्भिः ॥७७॥

*Sloka 77.*—In the chief place (right side), the priest should make offerings of sacrificial twigs, sésamum, ghee, etc., into the fire with hymns addressed to Siva, Indra, Brihaspati, Narayana and Vayu.

इन्द्रध्वजनिर्दिष्टान्यग्निनिमित्तानि दवविहूयात् ।

*Sloka 78.*—The astrologer should tell the auguries, of Fire, explained in the chapter on ' Indra's Banner ' (Adh. XLIII. P. 324, *Supra*). The priest having finished all the rites, should recite the following with folded palms :

यान्तु देवगणाः सर्वे पूजामादाय पार्थिवात् ।

सिद्धिं दत्त्वा तु विपुलां पुनरागमनाय च ॥७९॥

*Sloka 79.*—" May all the groups of Gods depart and come back on another occasion, having now received worship at the hands of the King, and bestowed great success on him ".

नृपतिरतो दैवज्ञं पुरोहितं चार्चयेद्बहुभिः ।

पुष्याद्विनार्धफलदा पौषी शान्तिः परा प्रोक्ता ॥८२॥

*Sloka 82.*—Should the King perform this ceremony every time the Moon is in Pushya, he would get increased happiness, fame and wealth. If it be performed at any other time, it would yield only half the benefits mentioned. For, the expiatory ceremony done during the Full Moon in the month of Pushya is declared to be the foremost.

राष्ट्रोत्पातोपसर्गेषु राहोः केतोश्च दर्शने ।

ग्रहावमर्दने चैव पुष्यस्नानं समाचरेत् ॥८३॥

*Sloka 83.*—The royal ablution should be performed when a kingdom is afflicted with portents and disasters (like epidemics), when there is an eclipse, when Ketu is sighted and when there is a planetary war.

*Sloka 85.*—This ceremony is highly commendable at a king's coronation, when he aspires for the sovereignty over an empire and longs for the birth of a son.

महेन्द्रार्थमुवाचेदं बृहत्कीर्तिर्बृहस्पतिः ।

*Sloka 86.*—For the sake of Indra, Brihaspati of great renown taught this Ablution, which confers unique longevity, increase of offspring and happiness.

अनेनैव विधानेन हस्त्यश्वं स्नापयेत्ततः ।

तस्यामयविनिर्मुक्तं परां सिद्धिमवाप्नुयात् ॥८७॥

*Sloka 87.*—The King who afterwards bathes his horses and elephants in the same manner, will see them free from illness and attain great success.

Thus ends the 48th Adhyaya on "Royal Ablution."

पट्टलक्षणम् ॥४९॥ Royal Crowns.

विस्तरशो निर्दिष्टं पट्टानां लक्षणं यदाचार्यैः ।

तत्सङ्क्षेपः क्रियते मयाऽत्र सकलार्थसम्पन्नः ॥१॥

*Sloka 1.*—In this chapter, I am giving a summary containing all the ideas of the characteristics of royal diadems that have been treated of at length by the ancient seers (such as Kasyapa).

पट्टः शुभदो राज्ञां मध्येऽष्टावङ्गलानि विस्तीर्णः ।

सप्त नरेन्द्रमहिष्याः षड् युवराजस्य निर्दिष्टः ॥२॥

चतुरङ्गलविस्तारः पट्टः सेनापतेर्भवति मध्ये ।

द्वे च प्रसादपट्टः पञ्चैते कीर्तिताः पट्टाः ॥३॥

*Slokas 2-3.*—The crown of a King, should, to be auspicious, have an expansion of eight digits in the

middle ; that of the queen, of seven digits ; that of the Yuvaraja, of six ; that of the commander of the army, of four ; and that of the royal protege, of two digits. These are the five kinds of crowns that have been mentioned.

सर्वे द्विगुणा यामा मध्यादर्धेन पार्श्वविस्तीर्णाः ।

सर्वे च शुद्धकाञ्चनवेनिर्मिताः श्रेयसो बृहद्वै ॥४॥

*Sloka 4.*—All these crowns must have a length double their respective expansion, while the expansion on the sides is half that of the middle. All these made of pure gold increase prosperity and happiness.

पञ्चशिखो भूमिपतेस्त्रिशिखो युवराजपार्थिवमहिष्योः ।

एकशिखः सैन्यपतेः प्रसादपट्टो विना शिखया ॥५॥

*Sloka 5.*—A royal crown has five crests ; that of the Yuvaraja and the Queen, three ; that of the commander, only one ; and that of the royal protege is without any crest.

क्रियमाणं यदि पत्रं सुखेन विस्तारमेति पट्टस्य ।

बृद्धिजयौ भूमिपतेस्तथा प्रजानां च सुखसम्पत् ॥६॥

*Sloka 6.*—When the gold sheet for the crown expands easily while it is being prepared, it augurs prosperity and victory to the King and great happiness to the subjects.

जीवितराज्यविनाशं करोति मध्ये व्रणः समुत्पन्नः ।

मध्ये स्फुटितस्त्याज्यो विघ्नकरः पार्श्वयोः स्फुटितः ॥७॥

*Sloka 7.*—A dent or hole in the middle of the crown, when it is under preparation, produces loss of life and kingdom. If it breaks in the middle, it should be discarded. One that breaks in the sides produces obstacles,

किंवा माणं वदा पत्रं मध्ये स्फुटति भिद्यते ।

तदा नृपभयं प्रोक्तं यस्यार्थे वा प्रकल्पितम् ॥

सुलक्षणं प्रमाणस्थं सुकरं च हितावहम् ।

अशुभनिमित्तोत्पत्तौ शास्त्रज्ञः शान्तिमादिशेद्राज्ञः ।

शस्तनिमित्तः पट्टो नृपराष्ट्रविबुद्धये भवति ॥८॥

*Sloka 8.*—At the appearance of evil symptoms, a man learned in this science should prescribe expiatory rites to the king. A crown attended with commendable signs tends to the prosperity of the King as well as of the kingdom.

Thus ends the 49th Adhyaya on “Royal Crowns.”

खड्गलक्षणम् ॥५०॥ Signs of Swords.

अङ्गुलशतार्धमुत्तम ऊनः स्यात्पञ्चविंशतिः खड्गः ।

अङ्गुलमानाज्ज्ञेयो व्रणोऽशुभो विषमपर्वस्यः ॥१॥

*Sloka 1.*—A sword of the best type measures fifty inches, while one of the smallest type, twenty five. A dent in an odd inch in the measurement of the sword is to be considered as foreboding evil.

श्रीवृक्षवर्धमानातपत्रशिवलिङ्गकुण्डलान्जानाम् ।

सदृशा व्रणाः प्रशस्ता ध्वजायुधस्वस्तिकानां च ॥२॥

*Sloka 2.*—Dents resembling in shape a Bilva tree, Vardhamana figure, umbrella, Siva's emblem, ear-ring, lotus, flag, weapon and Swastika mark are auspicious.

कुल्लासकाककङ्ककव्यादकबन्धवृश्चिकाकृतयः ।

खड्गे व्रणा न शुभदा वंशानुगताः प्रभूताश्च ॥३॥

*Sloka 3.*—The dents resembling a lizard, crow, heron, carcass-eating bird, truncated body and scorpion and many dents in the upper part of the sword are not auspicious.

स्फुटितो ह्रस्वः कुण्ठो वंशच्छिन्नो न दृष्टानोऽनुगतः ।

अखन इति चानिष्टः प्रोक्तविपर्यस्त इष्टफलः ॥४॥

*Sloka 4.*—A sword that has a breach, is too short, blunt, cut at the top, not appealing to the eye and the mind, and without resonance betokens misery ; whereas one with characteristics contrary to the above will yield good results.

कणितं मरणायोक्तं पराजयाय प्रवर्तनं कोशात् ।

खयमुद्गीर्णे युद्धं ज्वलिते विजयो भवति खड्गे ॥५॥

*Sloka 5.*—The sounding of a sword by itself forebodes the owner's death ; its not coming out of its sheath, defeat : its coming out of the sheath by itself indicates war ; and its blazing leads to victory.

*Sloka 6.*—The King should not unsheath the sword without any reason, nor brandish it, nor see his own face in it, nor mention its price, nor tell the place of its origin, nor measure it, nor, without purity, touch the blade.

गोजिह्वासंस्थानो नीलोत्पलवंशपत्रसदृशश्च ।

करवीरपत्रशूलाग्रमण्डलाग्राः प्रशस्ताः स्युः ॥७॥

*Sloka 7.*—The best swords are those that are shaped like a cow's tongue, blue-lily petal, bamboo-leaf, and

Karaveera leaf, as well as those that have a pointed and round tip.

निष्पन्नो न च्छेद्यो निकषैः कार्यः प्रमाणयुक्तः सः ।

मूले त्रियते स्वामी जननी तस्याग्रतश्छिन्ने ॥८॥

*Sloka 8.*—If a sword that has been made is too long, the surplus length should not be cut off, but it should be made to have the required length by rubbing it against a file. If it is cut at the bottom, the owner will die ; and if at the tip, his mother.

*Sloka 9.*—An injury in a particular part of the hilt shows a similar one in the corresponding part of the sword, just as a mole on the face of ladies does the existence of a similar one in their private parts.

अथवा स्पृशति यदङ्गं प्रष्टा निस्त्रिशभृत्तदवधार्य ।

कोशस्थस्यादेश्यो व्रणोऽस्ति शास्त्रं विदित्वेदम् ॥१०॥

*Sloka 10.*—Noting the particular limb touched by a swordsman who questions a diviner about injuries in the sword, the latter should declare the injury to exist in the particular part of the sword kept in the sheath, by understanding the following rules thereon.

To find out if there are dents at all on the sword, one should find out the Lagna at the time: if there are malefics in the Kendras, surely there will be some flaw in the sword.

*Slokas 16-19.*—The effects that have to be predicted of the dents in the first five digits of the sword are severally, death of sons, acquisition of wealth, loss of wealth, all round prosperity and confinement; in the next eight digits (up to 13th) severally, birth of sons, quarrel, acquisition of elephants, death of sons, incoming of wealth, death, acquisition of wives and mental affliction: in the next eight (from 14th to 21st) severally, (14) acquisition of wealth, (15) loss of money, (16) acquisition of women, (17) death, (18) increase of wealth, happiness, etc., (19) death, (20) happiness and (21) loss of money; and in the last nine (21 to 30), they are respectively (22) getting

*Sloka 20.*—If there be defects beyond the thirtieth digit, the effects thereof are negligible ; but in the odd and even digits, they prove auspicious and harmful respectively ; while according to some sages (*e. g.* Parasara) the injuries beyond the thirtieth inch up to the end have no effects whatsoever.

*Slokas 21-22.*—A sword having the smell of the Kara-veera flower, the blue-lily, elephant's ichor, ghee, saffron, round jasmine or Champaka, indicates prosperity, whereas one with the smell of cow's urine, salt or fat bodes evil. Similarly, one with the smell of tortoise, marrow, blood or salt produces danger and misery, and one with the lustre of beryl, gold or lightning leads to victory, health and prosperity.

*Slokas 23-24.*—The following are the drinks prescribed by sage Usanas for the sword : one wishing for very great wealth should give a drink of blood by the sword ; for begetting a virtuous son, a drink of ghee ; for inexhaustible wealth, one of water ; for the acquisition of money by sinful means, one of the milk of mare, camel or elephant ; and for cutting the trunks of elephants, one of fish-bile, deer-milk, horse-milk, and goat-milk, mixed with the toddy of palm trees.

*Sloka 25.*—A sword rubbed with gingelly oil and then smeared with an unguent prepared with the milky juice of Arka plant, the cleaned powder of goat's horn and the excreta of doves and mice must be given any of the drinks mentioned in the previous two verses, and afterwards whetted; such a sword will not break against stones.

Thus ends the 50th Adhyaya on "Signs of Swords."

## अङ्गविद्या ॥५१॥ Prediction through Limbs.

This chapter is probably spurious. So says Bhattotpala. But it will be seen that the author has himself referred to this subject, *viz*, Anga Vidya, in Adhyaya II *supra* (P. 15, lines 2, 3).

*Sloka 1.*—An astrologer should predict good and bad effects on observing carefully the direction, speech, place and articles brought at the time, also taking into consideration the behaviour of the limbs of the questioner with reference to himself or to another person and the particular time of his query. For, Time which is Omniscient, All-powerful, and All-seeing, on account of its being the Soul (sustainer) of all beings—moveable and stationary—shows good and bad effects through the bodily movements and utterances of the querists.

*Sloka 2.*—The place favourable for a query is one which is even (without depressions and elevations), covered with the shade of trees that smile with flowers, are laden with fruits, have glossy barks and leaves, are devoid of ill-omened birds and bear auspicious names; which is the abode of Gods, sages, Brahmins, virtuous men and Siddhas, which is endowed with fragrant

flowers and crops, which pleases the heart through the limpidity of its sweet water and which is covered with beautiful green grass.

### वास्तुविद्या ॥५३॥ House-building.

वास्तुज्ञानमथातः कमलमवान्मुनिपरम्परायातम् ।

क्रियतेऽधुना मयेदं विदग्धसांवत्सरप्रीत्यै ॥१॥

*Sloka 1.*—I shall now expound for the delectation of learned astrologers the science of building houses, handed down by the creator through an unbroken succession of sages.

Dr. Kern remarks as follows :

"According to Utpala, Garga, etc., more explicit is the statement in a work bearing the title of श्री ब्रह्मोक्तविश्वकर्माप्रकाशिका, where we read,

इति प्रोक्तं वास्तुशास्त्रं पूर्वं गर्गाय धीमते ।

गर्गात्पराशरः प्राप तस्मात्प्राप बृहद्रथः ॥

बृहद्रथाद्विश्वकर्मा प्राप्तवान्वास्तुशास्त्रकम् ।

सकलसुरगणानां सूत्रधारः कृतात्मा भवननिवसतां सञ्ज्ञास्त्रमेतच्चकार ॥

This passage, with many others, shows that Garga, Parasara, and the like, are mere mythological beings, of exactly the same

historical value with Brahman, Viswakarman, Vasudeva. In the opening stanzas of the विश्वक, we find,

यदुक्तं शम्भुना पूर्वं वास्तुशास्त्रं पुरातनम् ॥  
 पराशरः प्राह बृहद्रथाय बृहद्रथः प्राह च विश्वकर्मणे ।

 विश्वकर्मोवाच ।  
 वास्तुशास्त्रं प्रवक्ष्यामि लोकानां हितकाम्यया ।

The Viswak seems to be a compilation, for most of the passages quoted by Utpala, either from what he terms किरणख्यतन्त्र or from Garga, from Brihaspati, Viswakarman himself, Kasyapa etc., recur in the Viswak, a copy of which is in the translator's possession."

That was suddenly caught hold of and placed topsy-turvy by the multitude of Gods, who became the presiding deities of the several limbs of the Being that were touched by them. The creator ordained that Being to be the House-God of the nature of Gods.

*Slokas 39-41.*—A house with only a western and a southern hall is termed Siddhartha ; one with a western and a northern hall, Yamasurya ; one with a northern and an eastern hall, Danda ; one with an eastern and a southern hall, Vata ; one with an eastern and a western one, Graha-Chulli ; and one with a southern and a northern one, Kacha. The first kind of house leads to the acquisition of wealth ; the second, to the death of the house-holder ; the third, to punishment and death ; the fourth, to grief from quarrel ; the fifth, to loss of money ; and the sixth, to hatred among kinsmen.

There are many writers on architecture such as Viswakarman, Maya, Kama and Hiranyagarbha. The last one mentions 64 or 120 varieties of houses. Great kings can have mansions of  $8\frac{1}{2}$  storeys ; Brahmins, of  $7\frac{1}{2}$  ; Kshatriyas, of  $6\frac{1}{2}$  ; Vaisyas, of  $5\frac{1}{2}$  ; and Sudras, of  $3\frac{1}{2}$ . The height of Sudra's house ought not to exceed 20 moderate cubits ; that of Vaisya's, 40 cubits ; that of Kshatriya's, 60 cubits ; that of Brahmin's, 80 cubits ; and that of king's, 100 cubits. The last is the maximum limit for the height of human habitations.

According to the same authority, the height of the foundations of best houses is to be  $2\frac{1}{2}$  cubits.

There is restriction regarding the height of the storeys of buildings with two, three and four halls. In a house of a single hall, the height is equal to its breadth.

According to another authority, *viz* Sakra, the width of single-halled houses is not restricted ; but it should not exceed the length. Should it exceed the length, such houses would be called Utsargas. But single-halled houses are not prescribed for Brahmins, etc. Such houses are not conducive to longevity, but if made of straw, they can be permitted (Garga).

Viswakarman speaks of three kinds of digits, *viz.*, major, moderate and minor. The first is the length of eight of full-grown barley grains ; the second, of seven ; and the third, of six.

They are respectively called Prasaya, Sadharana, and Sama. It appears our author refers here to the last kind of digit. Viswakarman opines that in the construction of houses, etc., the first kind of digit should be adopted; of beds, eating plates, vehicles, etc., the last variety.

The combination of old and new bricks, baked and raw ones, etc., is forbidden. But Hiranyagarbha says: if necessary, raw bricks should be used below, and then baked ones. Maya objects to this and states:—There are five things to be done for houses; *viz.*, Katima, Granthima, Dayima, Ripima and Khatima. Hiranyagarbha says: There are different kinds of houses according to the materials used in the construction. One built of stone is called Mandira; of baked bricks, Vastu; this is the best; of raw bricks, Sumanta; of mud, Sudhara; of wooden logs, Manasya; of bamboos, Nandana; of canvas for kings, Vijaya; of varieties of straw, Kalima.

For house-holders the best houses are those made of gold, silver, copper and iron. They are respectively called Pushkara, Sribhava, Suryamanta and Chanda. There are also four other varieties, *viz.*, those made of lac, Anila, tin and Varibandhaka (वारिवन्धक). Thus there are fourteen varieties of houses in all categories.

*Slokas 51-54.*—This House-God has his head turned towards the north-east and face hung down. Agni is situated on his head; Apa, on the face; Aryaman, on the breast; Apavatsa, on the chest; Parjanya, Jayanta, Indra and Surya of outer compartments, on the eye, ear, chest and shoulder respectively; Satya, Bhriśa, Antariksha, Anila and Pushan, on the arm; Savita and

Savitra on the hand ; Vitatha and Brihatkshata, on the side ; Vivasvan, on the stomach ; Yama, Gandharva, Bhringaraja and Mriga on the thigh, knee, shank and buttock respectively. *Slokas 55-56.*—Or, drawing nine lines across and nine vertically and thus getting 64 squares, diagonals should be drawn from corner to corner. Of this area, Brahman rules over the central four squares ; and the eight deities situated along the diagonals in the corners near him over half a square (*viz.*, Apa, Apavatsa, Savita, Savitra, Vibudhadhipati, Jayanta, Rajayakshma and Rudra) ; in the outer corners, Sikhi, Antariksha, Anila, Mriga, Pitru. Papayakshma, Roga and Diti, over half a square ; those that are on both sides of these, over one and a half squares (Parjanya, Bhriśa, Bhringaraja, Dauvarika, Sosha and Nagadhipathi, *i. e.*, Ahi) ; and the remaining twenty, over two squares.

Though the author speaks of only quadrangular houses here, elsewhere, he speaks of hexangular, octangular, circular, etc. houses).

*Sloka 57.*—The meeting points of the longer diagonals and the exact middle points of the squares should be considered as the vulnerable points which a wise man ought not to hurt.

Utpal seems to have written a work on architecture; for he says:

तथा चास्मदीयवास्तुविद्यायाम् ।

*Sloka 58.*—If the above vulnerable points be hurt by impure materials, nails, pillars, pegs, etc., they would give trouble to the owner of the house in the corresponding limbs of his body.

अशुभं भवेन्निमित्तं विकृतेर्वाग्नेः सशल्यं तत् ॥५९॥

*Sloka 59.*—If, at the time of a query, the house-owner scratches a limb, there will be some hurt in the corresponding part of the house. Or at the time of fire-worship, if there is any evil omen or unnatural behaviour of the fire in any particular aspect of it, the corresponding limb of the House-God will be faulty through a nail or peg.

*Slokas 60-62.*—If the thorn is wooden, the owner will sustain loss of wealth; if it is made of bone, there will be trouble to his cattle and danger from disease [if it be of metal, there will be danger from weapon

and if it be skulls or hair, there will be death. If it be charcoal, there is danger from thieves ; if it be ashes, there will be constant risk from fire. The dart, unless it be of gold or silver, will prove disastrous on a vulnerable point. A heap of husk or chaff whether found in a vulnerable spot or any other, retards the acquisition of wealth ;] even an ivory peg situated in a vulnerable part will lead to misery.

*Slokas 63-64.*—The nine points of intersection of the lines connecting Roga and Anila, Pitru and Anila, Sosha and Vitatha, Mukhya and Bhrista, Jayanta and Bhringa, and Aditi and Sugriva are considered to be the most vulnerable parts. The measure of the vulnerable part is an eighth part of a square.

वंशव्यासोऽध्यर्धः शिराग्रमाणं विनिर्दिष्टम् ॥६५॥

*Sloka 65.*—A diagonal has in breadth as many digits as each square numbers cubits. The breadth of a line (running east to west and north to south) is one and a half times that of the diagonals.

*Sloka 69.*—In the same manner are deities situated in the different parts of houses, towns and villages. To Brahmins and others in the above, proper divisions of these should be allotted.

In these also, vulnerable points should be kept clean.

*Sloka 75.*—On the north, they are death or captivity, increase of enemies, acquisition of wealth and sons,

possession of all virtues, getting sons and wealth, enmity with one's own son, faults in wife and poverty.

In other Sasrtras, eight presiding deities are spoken of. Each has his own asterism. Similarly, the 32 doors also have their stars. By the agreement of the Moon and the stars, houses and doors are to be constructed. The 8 Vastunaras with their stars and deities are:

*Slokas 105-106.*—When entering a finished or half-finished house, the architect should look for the sign such as where (in which part of the house-God) the owner is standing, and which limb he is touching. If a bird heated by the Sun, cries harshly at the time, it may be predicted that on the spot there is a bone of a member corresponding to the limb touched.

The meaning of 'heated by the Sun' is—in the first watch of the day, the north-east is full of embers ; the east is 'scorched', south-east, 'smoky', and the rest are calm ; in the second watch, the east is 'full of embers', south-east, 'scorched', south 'smoky', and the rest calm ; in the third, south-east, 'full of embers', south, 'scorched', south-west, 'smoky', and the rest calm ; in the last watch of the day, the south is 'full of embers', south west, 'scorched', west, 'smoky' and the rest, 'calm' ; and so on.

*Slokas 1-2.*—I shall now explain the science of 'Water-finding' which leads to religious merit and renown, for, it helps men to ascertain the existence of water. Just as there are veins in the human body, even so do they exist, some higher up, others lower down, in the earth. The water that falls from the sky with the same colour and taste, assumes various colours and tastes owing to the difference in the nature of the earth. Hence it should be examined in relation to its environments.

*Slokas 3-5.*—The divine lords of the eight quarters beginning with the east are in their order, Indra, Agni, Yama, Nirriti (demon), Varuna, Wind, the Moon and Siva. The veins in the different quarters are known by the names of their respective lords. There is a ninth, called 'The Great Vein', in the middle of these. There are hundreds of veins branching off from these and bearing distinct appellations. A vein that comes up from the nether world is good ; so are those in the four directions. But those in the intermediate quarters are not auspicious. Hereafter I shall explain the characteristics of the veins.

The remaining four, *viz.*, Vritta-round, Chatushkona-quadrangular, Shodasasri-one with 16 angles, and Ashtasri-with 8 angles have significant names and are dark inside. All these have only one storey and one cupola, except the Chaturasra which has five domes.

These dark ones do not have external light entering the interior. There should be walls close by all round the temple and the entrance is to be on the western side. The walls are so constructed that they look part and parcel of the temple structure and not apart from it. The outer gate being on the north, the door of the temple should be made in the east (front) The idol in the temple should be made of gems, by whose lustre, there will be ample light inside.

*Sloka 9.*—In the four corners of a cloth, dwell Gods ; in the middle part of the broad sides, men ; and the remaining three divisions belong to the devils. The same rule applies to couches, seats and sandals.

पुष्टं नवेऽप्यल्पतरं च शुक्रे पापं शुभं चाधिकपुत्तरीये ॥१०॥

*Sloka 10.*—When a cloth is stained with ink (soot), cowdung, mud and the like, when it is cut (slit), singed

or torn, one ought to know that the effects, good or bad, will be full, when it is new ; middling, when used for a short time ; and almost nil, when it is old. These effects are greater in the case of upper cloths.

**रुप्राक्षसांशेष्वथवापि मृत्युः पुंजन्मतेजश्च मनुष्यभागे ।**

**भागेऽमराणामथ भोगवृद्धिः प्रान्तेषु सर्वत्र वदन्त्यनिष्टम् ॥११॥**

*Sloka 11.*—A slit, etc., in the divisions of devils bode disease or death of the wearer ; in those of men, birth of a son and power ; in those of Gods, increase of enjoyments ; and in the borders, it is said to be invariably harmful.

**कङ्कपुवोलूककपोतकाकक्रव्यादगोमायुखरोष्ट्रसर्पैः ।**

**छेदाकृतिर्देवतभागगापि पुंसां भयं मृत्युसमं करोति ॥१२॥**

*Sloka 12.*—A slit in the form of a heron, pelican (?), owl, pigeon, crow, bird of prey, jackal, donkey, camel or snake, though happening in a division belonging to Gods, causes among men a danger amounting to death.

**छत्रध्वजस्त्रिकवर्धमानश्रीवृक्षकुम्भाम्बुजतोरणाद्यैः ।**

**छेदाकृतिर्नैर्ऋतभागगापि पुंसां विधत्ते न चिरेण लक्ष्मीम् ॥१३॥**

*Sloka 13.*—A slit of the shape of an umbrella, banner, Swasthika, Vardhamana, Bilwa tree, water-pot, lotus, arch-way, etc., though found in a division of devils, brings fortune immediately to men.

**विप्रमतादथ भूपतिदत्तं यच्च विवाहविधावभिलम्बम् ।**

**तेषु गुणै रहितेष्वपि भोक्तुं नूतनमम्बरमिष्टफलं स्यात् ॥१४॥ .**

*Sloka 14.*—A new cloth, even at an unlucky asterism, will give good effects, when it is worn with the

permission of Brahmins, or when it is a gift from the king or when it is presented at a marriage occasion.

The idea is the same as in Sloka 8 *supra*.

Thus ends the 71st Adhyaya on "Omens from Slits of Garments."

### चामरलक्षणम् ॥७२॥ Signs of Chowries.

*Sloka 1.*—They say that the Gods created the Chamar deer in the caves of the Himalayas for the sake of their hair (tails). The hairs growing on their tails are some yellowish, some black, and some white.

स्नेहो मृदुत्वं बहुवालता च वैशद्यमलपास्थिनिबन्धनत्वम् ।

शौक्यं च तासां गुणसम्पदुक्ता विद्वाल्पलुप्तानि न शोभनानि ॥

*Sloka 2.*—The excellences of the chowries are declared to be glossiness (gloss), tenderness, density of the hair, brightness, being connected with a slender bone and whiteness. Those that are pieced, small or broken off, are inauspicious.

काष्ठाच्छुभात्काञ्चनरूप्यगुप्ताद्रत्नैश्च सर्वैश्च हिताय राज्ञाम् ॥३॥

*Sloka 3.*—The handle of the chowrie must measure one cubit, or one and a half, or even smaller cubit, (with the fist closed). One made of auspicious wood, decked with gold or silver, and set with all kinds of gems, is favourable to kings.

यष्ट्यातपत्राङ्कुशवेत्रचापवितानकुन्तध्वजचामाणाम् ।

व्यापीततन्त्रीमधुकृष्णवर्णा वर्णक्रमेणैव हिताय दण्डाः ॥४॥

*Sloka 4.*—The handles of clubs, umbrellas, goads, canes, bows, canopies, spears, banners and chowries of Brahmins, Kshatriyas, Vaisyas and Sudras, being of the colours, yellow, yellowish-red, honey colour and dark respectively, are favourable to the persons of the respective classes.

आदिभिर्द्विकविवर्धितैः क्रमात् द्वादशान्तविरतैः समैः फलम् ॥५॥

*Sloka 5.*—The above objects with an even number of joints (knots), viz., two, four, six, eight, ten and twelve, produce respectively, loss of mother, land, wealth, family, disease and death.

बुद्धिः पशूनामभिवाञ्छितासिस्त्र्याद्येध्वयुग्मेषु तदीश्वराणाम् ॥६॥

*Sloka 6.*—If the joints are odd, viz., three, five, seven, nine, eleven or thirteen, the effects for the owners are respectively, victory in the marching (success in the journey), destruction of enemies, abundant profits, acquisition of lands, increase of domestic animals and the accomplishment of the desired objects.

Thus ends the 72nd Adhyaya on "Signs of Chowries."

उत्रलक्षणम् ॥७३॥ Signs of Umbrellas.

निचितं तु हंसपथैः कृकवाकुमयूरसारसानां वा ।

दौकृत्येन नवेन तु समन्ततश्छादितं शुक्लम् ॥१॥

मुक्ताफलैरुपचितं प्रलम्बमालाविलं स्फटिकमूलम् ।

 नृपतेस्तदातपत्रं कल्याणपरं विजयदं च ॥३॥

*Slokas 1-3*—A white umbrella of the following description brings all round happiness and victory to a king. It is to be made of the feathers of swans, cocks, peacocks or cranes ; it must be covered all round with a fresh, white silken cloth. It must be adorned with pearls and have garlands of pearls suspended all round from its edges ; its handle is made of crystal ; the rod of a single wood is six cubits in length, covered with pure gold and having seven or nine joints. The extent or diameter is 3 cubits. It should be well-knit all over and adorned with gems.

*Sloka 4*—The rod of the umbrella of a Yuvaraja, Queen, Commandant of the army and a General is  $4\frac{1}{2}$  cubits in height and  $2\frac{1}{2}$  cubits in extent or diameter.

अन्येषामुष्णन्नं प्रसादपट्टैर्विभूषिताशिरस्कम् ।

*Sloka 5*.—The umbrella of other officers of the state should be formed with pea-cock feathers so as to ward off the Sun's heat and having wreaths of gems hanging all round ; its top being adorned with gold fillets as a token of royal favour.

अन्येषां तु नराणां शीतातपवारणं तु चतुरस्रम् ।  
 समदण्डदण्डयुक्तं छत्रं कार्यं तु विप्राणाम् ॥६॥

*Sloka 6.*—The umbrella of ordinary persons should be of a square form, capable of warding off cold and heat. That of Brahmins should be circular and have a cylindrical rod.

Probably the author means that the rod of private persons' umbrellas should be square and that for Brahmins, cylindrical.

Thus ends the 73rd Adhyaya on the "Signs of Umbrellas."

### स्त्रीप्रशंसाध्यायः ॥७४॥ Praise Of Women.

जये धरित्र्याः पुरमेव सारं पुरे गृहं सन्ननि चैकदेशः ।

तत्रापि शय्या शयने वरा स्त्री रत्नोज्ज्वला राज्यसुखस्य सारः ॥१॥

*Sloka 1.*—When a country is conquered, the most important thing there is only a city whereof the essential part is a mansion, and in this the most desirable portion is only a room ; and even here the most beautiful thing is a couch, whereon an excellent damsel, adorned with gems and gold ornaments, is the pith and essence of the happiness accruing from the possession of a kingdom.

This reminds one of Valmiki's statement "त्रैलोक्यराज्यं सकलं सीताया नाप्नुयात् कलाम् ।" This chapter is on a par with Bhartrihari's Sringara Sataka (शृङ्गारशतक) and will have great attraction for people of widely differing tastes as "नाट्यं भिन्नरुचेर्जनस्य बहुधाप्येकं सभाराधनम्." Some of the statements in this chapter sound rather frivolous and light-hearted. The purpose is most probably to please the patron-sovereign of the author, who requires the pleasure of the company of a sweet-heart after a strenuous career of wars of conquest.

रत्नानि विभूषयन्ति योषा भूष्यन्ते वनिता न रत्नकान्त्या ।

येतो वनिता हरन्त्यरत्ना नो रत्नानि विनाज्जनाङ्गसङ्गम् ॥२॥

*Sloka 2.*—Damsels beautify gems and they are not adorned by the lustre of the latter ; for they captivate the heart even without the aid of gems ; but the gems do not without their association with beautiful maidens.

The last quarter can be interpreted as —What are gems (the greatest things) but union with damsels ?

आकारं विनिगूहतां रिपुबलं जेतुं समुत्तिष्ठतां  
तत्त्वं चिन्तयतां कृताकृतशतव्यापारशाखाकुलम् ।  
मन्त्रिप्रोक्तनिषेविणां क्षितिभुजामाशङ्किनां सर्वतो  
दुःखाम्भोनिधिवर्तिनां सुखलवः कान्तासमालिङ्गनम् ॥३॥

*Sloka 3.*—The embrace of a sweet-heart affords a bit (an iota) of pleasure to the kings who have to suppress their feelings, who strive to vanquish the forces of their foes, who deeply ponder over diplomatic methods that are replete with the ramifications of hundreds of things that are done and not done, who act upon the advice given by their ministers, who apprehend danger from every quarter (suspect every body) and who are consequently plunged, so to say, in the ocean of misery.

“ Uneasy lies the head that wears a crown ’ ; so in the midst of his miserable and care-worn life, the company of a sweet partner gives a king at least some pleasure for some time. This of course for the poor soul should not be grudged by the people, lest his life should be a burden and a liability.

श्रुतं दृष्टं स्पृष्टं स्मृतमपि नृणां ह्लादजननं  
न रत्नं स्त्रीभ्योऽन्यत् कचिदपि कृतं लोकपतिना ।  
तदर्थं धर्मार्थौ सुतविषयसौख्यानि च ततो  
गृहे लक्ष्म्यो मान्याः सततमबला मानविभवैः ॥४॥

*Sloka 4.*—Nowhere has the creator designed any gem other than women ; for, this gem gives delight

to men, when heard of, seen, touched or even remembered ; for its sake are done righteous deeds and wealth amassed ; from that do men derive worldly pleasures and offspring. Such damsels are the goddesses of fortune. Hence they should always be honoured at home with respect and wealth.

This reminds one of Manu's dictum "यत्र नार्यस्तु पूज्यन्ते रमन्त तत्र देवताः" i e., Gods dwell with pleasure in a house where ladies are treated with respect.

येऽप्यङ्गनानां प्रवदन्ति दोषान् वैराग्यमार्गेण गुणान् विहाय ।  
ते दुर्जना मे मनसो वितर्कः सद्भावाक्यानि न तानि तेषाम् ॥५॥

*Sloka 5.*—It is my conviction that those who, following the path of renunciation or detachment, overlook the virtues of and traduce ladies, are indeed wicked and cynical. For they do not mean what they say.

प्रब्रूत सत्यं कतरोऽङ्गनानां दोषोऽस्ति यो नाचरितो मनुष्यैः ।  
धाष्ट्येन पुम्भिः प्रमदा निरस्ता गुणाधिकास्ता मनुनात्र चोक्तम् ॥

*Sloka 6.*—Tell me the truth, what fault is there in women that is not committed by men ? Men have traduced women as being impudent (or men have out-done women in impudence). They are indeed superior to men in respect of merits. And the following are the statements of Manu on this point.

सामस्तासामदाच्छौचं गन्धर्वः शिक्षितां गिरम् ।  
अग्निश्च सर्वमक्षित्वं तस्मान्निष्कसमाः स्त्रियः ॥७॥

*Sloka 7.*—The Moon gave them (women) purity (cleanliness); Gandharva, cultured and sweet speech ; the Fire, the capacity to eat all sorts of food. Hence women are like unto pure gold.

ब्राह्मणाः पादतो मेध्या गावो मेध्याश्च पृष्ठतः ।

अजाश्चा मुखतो मेध्याः स्त्रियो मेध्यास्तु सर्वतः ॥८॥

*Sloka 8.*—Brahmins are pure at the feet ; cows at the back ; goats and horses, at the face (mouth) ; and women are pure all over.

स्त्रियः पवित्रमतुलं नैता दुष्यन्ति कर्हिचित् ।

मासि मासि रजो ह्यासां दुष्कृतान्यपकर्षति ॥९॥

*Sloka 9.*—Being objects of matchless purity, never are women defiled. For the menses remove their blemishes every month.

जामयो यानि गेहानि शपन्त्यप्रतिपूजिताः ।

तानि कृत्याहतानीव विनश्यन्ति समन्ततः ॥१०॥

*Sloka 10.*—Those houses that are cursed by respectable ladies (daughters-in-law) being not properly treated, will totally perish, as if destroyed by witchcraft.

जाया वा स्याज्जनित्री वा सम्भवः स्त्रीकृतो नृणाम् ।

हे कृतघ्नास्तयोर्निन्दां कुर्वतां वः कुतः शुभम् ॥११॥

*Sloka 11.*—Whether it is the wife or the mother, men are brought into being only by women. What good can you expect, O ungrateful men, from censuring them?

तज्जाया भवति यस्यां जायते पुनरिति श्रुतिः । जाया स्त्री माता । स्त्रीकृतः सम्भवः । अङ्गासम्भवति हृदयादभिजायते । आत्मा वै पुत्रनामासि त्वं जीव शरदां शतमिति श्रुतिः ।

दम्पत्योर्व्युत्क्रमे दोषः समः शास्त्रे प्रतिष्ठितः ।

नरा न तमवेक्षन्ते तेनात्र वरमङ्गनाः ॥१२॥

*Sloka 12.*—It has been established in the moral code that the guilt of husband and wife will be equal, if both

go astray. But men do not pay any heed to their sins. Hence women are better in this respect.

बहिलोम्ना तु षण्मासान् वेष्टितः खरचर्मणा ।  
दारातिक्रमणे भिक्षां देहीत्युक्त्वा विशुध्यति ॥१३॥

*Sloka 13.*—A man guilty of going astray in matters sexual will be absolved of the sin by begging alms for six months, wearing a donkey's hide with its hair exposed.

न शतेनापि वर्षाणामपैति मदनाशयः ।  
तत्राशक्त्या निवर्तन्ते नरा धैर्येण योषितः ॥१४॥

*Sloka 14.*—Even when men complete a centum of years, their sexual craving does not subside; but they refrain from the act only through incapacity, whereas women do so by conviction and courage.

अहो धाष्ट्र्यमसाधूनां निन्दतामनघाः स्त्रियः ।  
मुष्णतामिव चौराणां तिष्ठ चैरेति जल्पताम् ॥१५॥

*Sloka 15.*—How impudent are the immoral fellows that slander blameless women! They are like the thieves actually found stealing and yet crying—"Thief, stop!"

The aforesaid quotations amply prove Manu's great regard for women and how they were treated in ancient India, where there was no necessity for women to fight for equality.

पुरुषश्च दुलानि कामिनीनां कुरुते यानि रहो न तानि पश्चात् ।  
सुकृतज्ञतयाङ्गना गतासूनवगूह्य प्रविशन्ति सप्तजिह्वम् ॥१६॥

*Sloka 16.*—A man does not resort subsequently to the same coaxing words and actions as done in privacy with his sweet-hearts; whereas the latter embrace their dead husbands out of gratitude for the good turns done unto them, and enter their funeral pyre.

In the days of Varahamihira, Suttée must have been in great vogue. But Bana, the great poet, expresses his antipathy to this custom.

स्त्रीरत्नभोगोऽस्ति नरस्य यस्य निःस्त्रोऽपि सम्प्रत्यवनीश्वरोऽसौ ।

राज्यस्य सारोऽश्नमङ्गनाश्च तृष्णानलोद्दीपनदारु शेषम् ॥१७॥

*Sloka 17.*—A man who enjoys the gem of a damsel is for the time being, (to me) a king, though he is penniless. For the quint-essence of a kingdom consists of dainty food and damsels ; and all the rest is only fuel for kindling the fire of appetite.

कामिनीं प्रथमयौवनान्वितां मन्दबलुगुमृदुपीडितस्वनाम् ।

उत्तर्त्तनीं समवलम्ब्य या रतिः सा न धातुभवनेऽस्ति मे मतिः ॥१८॥

*Sloka 18.*—It is my firm conviction that the erotic bliss that is enjoyed by one's embracing a loving damsel in the prime of youth, with swelling bosoms, and murmuring sounds, gentle, sweet, tender and suppressed, cannot be had even in the Creator's Heaven (Brahma-loka).

This reminds one of Bhartrihari's—अधरमधु वधूनां भाग्यवन्तः पिबन्तः

तत्र देवमुनिसिद्धचारणैर्मन्यमानपितृसेव्यसेवनात् ।

ब्रूत धातुभवनेऽस्ति किं सुखं यद्रहः समवलम्ब्य न स्त्रियम् ॥१९॥

*Sloka 19.*—Tell me what pleasure is there in Brahma Loka, owing to the Gods, Sages, Siddhas and celestial bards attending upon the Manes and other Worshipful Beings, such as cannot be found in embracing a damsel in privacy.

आब्रह्मकीटान्तमिदं निबद्धं पुंस्त्रीप्रयोगेण जगत् समस्तम् ।

व्रीडात्र का यत्र चतुर्मुखत्वमीशोऽपि लोभाद्गमितो युवत्याः ॥२०॥

*Sloka 20.*—The whole universe, from Brahman to the smallest worm, is based on the union of the male

and female. Why then should we feel ashamed of it, when even Lord Siva was forced to take four faces on account of his greed to have a look at a maiden ?

The story alluded to here is that once the celestial courtesan Tilottama, was going round Lord Siva on whose lap was seated Parvati. The lord being afraid of offending Parvati created four faces for himself in order to look at the matchless beauty of the damsel.

Thus ends the 74th Adhyaya on "the Praise of Women."

### सौभाग्यकरणम् ॥७५॥ Winning of Affection.

जात्यं मनोभवसुखं सुभगस्य सर्व-  
माभासमात्रमितरस्य मनोवियोगात् ।  
चित्तेन भावयति दूरगतापि यं स्त्री  
गर्भं विभर्ति सदृशं पुरुषस्य तस्य ॥१॥

*Sloka 1.*—The man who is loved by damsels enjoys all the sexual pleasures in the most excellent manner, while others enjoy only sham pleasures ; because, the woman has her mind elsewhere. A woman develops a foetus similar to the man whom she thinks of at the time of coitus, though she be far off from him.

मत्स्वप्ना काण्डं पादपस्योत्प्लुव्या बीजं वास्यां नान्यतामेति यद्वत् ।  
एवं ह्यात्मा जायते स्त्रीषु भूयः कश्चित्तस्मिन् क्षेत्रयोगादिशेषः ॥२॥

*Sloka 2.*—Just as a branch cut off from a tree or a seed planted in the soil does not change its nature, i. e., does not grow into a different tree, even so is the soul re-born in women. But owing to the influence of the soil or 'mother,' slight difference does occur.

आत्मा सहैति मनसा मन इन्द्रियेण  
 स्वार्थेन चेन्द्रियमिति क्रम एष शीघ्रः ।  
 योगोऽयमेव मनसः किमगम्यमास्ति  
 यस्मिन्मनो व्रजति तत्र गतोऽयमात्मा ॥३॥

*Sloka 3.*—The soul combines with the mind, the mind with the senses, and the senses with their respective objects. This takes place in quick succession. The connection being such, is there anything unattainable for the mind? And whither the mind goes, thither goes the soul too !

आत्मायमात्मनि गतो हृदयेऽतिसूक्ष्मो  
 ग्राह्योऽचलेन मनसा सतताभियोगात् ।  
 यो यं विचिन्तयति याति स तन्मयत्वं  
 यस्मादतः सुभगमेव गता युवत्यः ॥४॥

*Sloka 4.*—The soul which is very subtle is immersed in the Supreme Soul in the region of the heart (हृदयगुह्यरीक). Such a soul should be comprehended by a steadfast mind through constant practice. Since every person attains the nature of one whom he constantly thinks of, young women mentally go only to their beloved ones.

दाक्षिण्यमेकं सुभगत्वहेतुर्विद्वेषणं तद्विपरीतचेष्टा ।  
 मन्त्रौषधाद्यैः कुहकप्रयोगैर्भवन्ति दोषा बहवो न शर्म ॥५॥

*Sloka 5.*—Favourableness or courtesy is the sole cause of winning the affection of the opposite sex ; a contrary conduct engenders aversion. Charms, potions and such other quack remedies produce only many harmful effects and not happiness.

आह्वयमायाति विहाय मानं दौर्भाग्यमुपादयतेऽभिमानः ।  
 कुच्छ्रेण संसाधयतेऽभिमानं कार्याण्यत्नेन वदन् प्रियाणि ॥६॥

*Sloka 6.*—Man becomes the idol of woman by forsaking pride; and arrogance produces repulsion. A haughty person accomplishes his objects with great difficulty, whereas one speaking sweetly does it easily.

तेजो न तद्यन् प्रियसाहसत्वं वाक्यं न चानिष्टमसत्प्रणीतम् ।

कार्यस्य गत्वान्तमनुद्धता ये तेजस्विनस्ते न विकथना ये ॥७॥

*Sloka 7.*—It is not valour to be fond of rash deeds; nor to speak harsh words that are generally uttered by ruffians. Those who are not arrogant, nor boastful even after accomplishing their task, are valorous.

यः सार्वजन्यं सुभगत्वमिच्छेद्गुणान् स सर्वस्य वदेत्परोक्षम् ।

प्राप्नोति दोषानसतोऽप्यनेकान् परस्य यो दोषकथां करोति ॥८॥

*Sloka 8.*—One wishing for universal love should express others' virtues behind their back; while a person referring to the faults of others gets too many unmerited charges levelled against him.

सर्वोपकारानुगतस्य लोकः सर्वोपकारानुगतो नरस्य ।

कृत्वोपकारं द्विषतां विपत्सु या कीर्तिरल्पेन न सा शुभेन ॥९॥

*Sloka 9.*—The whole world renders service to a man who is engaged in helping the people. The fame that is won by helping enemies in their distress cannot be had by a small measure of religious merit.

दूषैरिवान्निः सुतरां विवृद्धिमाच्छाद्यमानोऽपि गुणोऽभ्युपैति ।

स केवलं दुर्जनभावमेति हन्तुं गुणान् वाञ्छति यः परस्य ॥१०॥

*Sloka 10.*—The virtues of the good, though suppressed by the wicked, attain great eminence, just as fire blazes forth, though covered with grass. The person who wishes to spoil another's virtues has his own wickedness proclaimed.

Thus ends the 75 Adhyaya on the "Winning of Affection."

### कान्दार्पिकम् ॥७६॥ Erotic Remedies.

रक्तेऽधिके स्त्री पुरुषस्तु शुके नपुंसकं शोणितशुक्रसाम्ये ।

यस्मादतः शुक्रविष्टुद्धिदानि निषेवितव्यानि रसायनानि ॥१॥

*Sloka 1.*—When (at the time of coitus) the blood (of the woman) exceeds the sperm (of man), a female will be born ; when the sperm exceeds the blood, a male ; when both are equal, a hermaphrodite. Hence, one ought to take tonics that increase one's sperm.

१ हर्म्यपृष्ठमुडुनाथरश्मयः सौत्पलं मधु मृदालसा प्रिया ।

२ वल्लकी सरकथा रहः स्रजो वर्ग एष मदनस्य वागुरा ॥२॥

*Sloka 2.*—Cupid's snare consists of the following group : viz., a terrace, the Moon's rays, lilies, wine, an intoxicated sweet-heart, a lute, amatory talk, privacy and garlands.

This is reminiscent of the Sloka :

चन्दनभिन्दुमहश्च सुगन्धिर्मलयमरुन्मदिरा च मनोज्ञा ।

वामदशां च वपुः सविलासं मनसिजपौष्टिकयोगविशेषः ॥

सैकानि विंशतिरहानि जरान्वितोऽपि

सोऽशीतिकोऽपि रमयत्यवलां युवेव ॥३॥

*Sloka 3.*—A man who eats for 21 days a mixture of equal quantities of माक्षीकधातु (mineral honey), honey, mercury, iron-dust, हरीतकी (yellow myrobalan), शिलाजतु (bitumen), and ghee, though he be very old or an octogenarian, will be able to please a damsel, as though he were a young man.

क्षीरं शृतं यः कपिकच्छुमूलैः पिबेत् क्षयं स्त्रीषु न सोऽभ्युपैति ।

माषान् पयःसर्पिषि वा विपकान् षट्प्रासमात्रांश्च पयोनुपानम् ॥४॥

*Sloka 4.*—If one drinks milk boiled with Kapikachu roots or eats only six morsels of black-gram boiled in milk and ghee (in ghee prepared from milk itself), followed by a drink of milk, one will not be exhausted by women.

विदारिकायाः खरसेन चूर्णं मुहुर्मुहुर्भाविताशेषितं च ।

श्रुतेन दुग्धेन सशर्करेण पिबेत् स यस्य प्रमदाः प्रभृताः ॥५॥

*Sloka 5.*—A man having numerous wives should take the powder of विदारिका, boiled seven times in its own sap and then concentrated, and drink with it boiled milk mixed with sugar.

धात्रीफलानां खरसेन चूर्णं सुभावितां शौद्रसिताज्ययुक्तम् ।

लौढानु पीत्वा च पयोऽग्निशक्त्या कामं निकामं पुरुषो निषेवेत् ॥

*Sloka 6.*—Boil well the powder of myrobalan with its own juice and mix it with honey, sugar and ghee. After licking this, drink milk according to your digestion ; then you will be able to enjoy sexual pleasures to the utmost.

ध्रिरेण वस्ताण्डयुजा श्रुतेन सम्प्लाव्य कामी बहुशीतलान् यः ।

सुशेषितानन्ति पयः पिबेच्च तस्याग्रतः किं चटकः करोति ॥७॥

*Sloka 7.*—A lustful man should boil milk with goat's testes and sesamum several times and thus concentrate it. By taking that and drinking milk after that, he will put even the sparrow to shame by his exuberant virility.

माषसप्तसहितेन सर्पिषा षष्टिकौदनमदन्ति ये नराः ।

क्षीरमप्यनुपिबन्ति तासु ते शर्वरीषु मदनेन शेरते ॥८॥

*Sloka 8.*—Men who eat boiled षष्टिक-(Shastika) rice with ghee and black gram soup and then drink milk, sleep on those nights after repeated sport of love.

Shashtika rice is a kind of rice that grows in 60 days.

तिलाश्चगन्धाकपिकच्छुमूलैर्विदारिकाषष्टिकपिष्टयोगः ।

आजेन पिष्टः पयसा घृतेन पक्क भवेच्छष्कुलिकातिवृष्या ॥९॥

*Sloka 9.*—A mixture of sesamum, Aswagandha, Ka-pikachchu, Vidarika and Shashtika rice, the whole ground in goat's milk and then boiled in ghee, will be like the शष्कुली (Sashkuli) eatable and will increase sperm (be a good aphrodisiac).

क्षीरेण वा गोक्षुरक्रोपयोगं विदारिकाकन्दकभक्षणं वा ।

कुर्वन्न सीदेद्यदि जीर्यतेऽस्य मन्दाग्निता चेदिदमत्र चूर्णम् ॥१०॥

*Sloka 10.*—If the virility of a man diminishes, he should take either गोक्षुर or विदारिका roots boiled in milk. Then his sexual power will remain unimpaired. If he suffer from dullness of the digestive apparatus, he might take the following powder.

साजमोदलवणा हरितकी शृङ्गवेरसहिता च पिप्पली ।

मद्यतक्रतरलोष्णवारिभिश्चूर्णपानमुदराग्निदीपनम् ॥११॥

*Sloka 11.*—A mixture of equal quantities of Ajamoda, rock-salt, हरितकी, ginger and Pippali, soaked in liquor, butter-milk, gruel or hot-water and drunk, promotes digestion.

अत्यम्लतिक्तलवणानि कटुनि वात्ति

### गन्धयुक्तिः ॥७७॥ Preparation of Perfumes.

*Sloka 1.*—Since garlands, perfumes, fine raiment, ornaments and the like do not shine in a man of grey hair, one ought to try to dye the hair, just as one does regarding unguents for the eyes and ornaments.

In the beginning of the Chapter the commentator quotes extensively from a निषण्डु or lexicon, which gives the synonyms of various materials used in the preparation of perfumes.

लोहे पात्रे तण्डुलान् कोद्रवाणां शुक्ले पक्काह्लोहचूर्णेन साकम् ।

*Slokas 2-3.*—Put into an iron vessel grains of कोद्रव-

Apply this to the head after washing the hair with acid-gruel, and covering the head with green leaves, remain for six hours. After that period, remove the paste from the head and apply a paste of myrobalan. Cover it with green leaves and keep it for another six hours. On being washed, the hair will become black.

*Sloka 6.*—Hair oil of the scent of Champaka is made from equal quantities of the powder of madder, cuttle fish bone, Nakhi, (shell perfume), cassia bark, costus and Rasa, which being mixed with gingelly oil should be heated in the Sun's rays.

*Sloka 7.*—From equal quantities of Patra, juice of Sihla, Vala and Tagara, an oil called Smaroddeepana- 'kindler of passion' is made. The same with Vyamaka and fumigated with Katuka, asafoetida, yields a perfume called 'Bakula scent'. The same with costus is termed "lotus-scent," and with sandal, 'Champaka scent'. With nutmeg, cassia bark and coriander, it goes by the name of 'Jasmine scent'.

*Sloka 8.*—Take one-fourth of Sathapushpa and Kunduruka, one-half of Nakha and Sihla, and one-fourth of Sandal and Priyangu. These make a perfume which should be fumigated with jaggery and Nakha.

The commentator states: before fumigating with Guda, it should be done with Hareethaki.

*Slokas 10.*—Many delightful perfumes are made from Haritaka, Sankha, Ghana, Rasa, Valaka, Jaggery, costus, Saileya and Musta seeds by mixing them in proportions indicated by multiples of  $\frac{1}{3}$ th.

The words in the 3rd quarter have to be construed thus: the succeeding constituents should be  $\frac{1}{3}$ th in excess of the preceding one, the first one being  $\frac{1}{3}$ th and the last  $\frac{2}{3}$ . पाद here is interpreted as a part in general and not as a quarter. By the usage of the word 'many', it is evident that the 9 constituents may be mixed in any order, taking care to see that no two are mixed in the same proportion. For example, by mixing one part of Hareetaka two parts of Sankha, three of Ghana, etc., the other constituents being increased in this order, one kind of perfume is formed. Since it is not necessary that the order of the constituents should be the same,  $\frac{1}{9}$  or 362880 perfumes can be prepared.

One Iswara has written a work in Prakrit on the art of preparing perfumes. The commentator quotes the following verse from him.

ओल्लंभि ओल्लभो जो दिज्जइ वेह इति सो भणिओ ।

**Slokas 13-14.**—The Gandharnava or perfume ocean is prepared from sixteen substances, if every four of them are permuted variously at will and that in one, two, three, or four parts. The substances are :—घ्न, बालक, शैलेय, कर्चूर

डशीर, नागपुष्प, व्याघ्रनख, स्पृक्षा, अगुरु, मदनक, नख, तगर, coriander, कर्पूर, चोल, and sandal.

Here, altogether 96 varieties are got. Each set of four has 24 permutations and so the four

sets together have  $24 \times 4$  or 96. See the diagram in the margin.

*Sloka 19.*—As in this manner four substances combined in different proportions yield 24 perfumes ; so too the other tetrads. Hence the sum will be 96.

षोडशके द्रव्यगणे चतुर्विकल्पेन भिद्यमानानाम् ।

*Sloka 20.*—Out of a collection of sixteen kinds of substances, the number of perfumes that can be made by selecting any four will be 1820.

षण्णवतिभेदभिन्नश्चतुर्विकल्पो गणो यतस्तस्मात् ।

षण्णवतिगुणः कार्यः सा संख्या भवति गन्धानाम् ॥२१॥

*Sloka 21.*—Since this quantity combined in four different ways admits of 96 variations, this number 1820 must be multiplied by 96. The product will be the total of possible combinations of perfumes.

पूर्वेण पूर्वेण गतेन युक्तं स्थानं विनान्त्यं प्रवदन्ति संख्याम् ।

इच्छाविकल्पैः क्रमशोऽभिनीय नीते निवृत्तिः पुनरन्यनीतिः ॥२२॥

*Sloka 22.*—Write in a vertical column the numbers 1 to 16 upwards ; in a second column by its side write one, and then write above that the sum of the first two figures of the first column, *viz*, 3 ; add this result to the third number and write it above that ; continue this process until you reach the penultimate number, *i. e.*, 15. Repeat this process in the third and fourth

columns also. The last number of the last column will reveal the number 1820. (See figure in the margin).

The numbers 1, 2, 3.....16 in the first column represent respectively the 16 substances mentioned in slokas 13-14, *supra* (pp. 606-607). Firstly, let the first 3 substances be considered as constant and any one of the remaining as variable. The number of perfumes formed will be 13. Next, taking substances 1, 3, and 4 as constant and one of the rest as variable, we get 12 varieties. Proceeding further in the same manner, we get 11, 10, 9, 8, 7, 6, 5, 4, 3, 2, 1 varieties, or 91 in all.

Now let the substances 1, 2 and 4 be considered as constants and one of the remaining as variable, we get 12 perfumes. By taking 1, 3 and 5 as constants, the number will be 11, and so on. The total will thus be 78.

Similarly making 1, 2, 5; 1, 3, 6; 1, 4, 7 etc., as constants, we shall get 11, 10, 9, 8, 7, 6, 5, 4, 3, 2, 1 or a total of 66 varieties.

Thus we shall get 91, 78, 66, 55, 45, 36, 28, 21, 15, 10, 6, 3, 1 or 455 in all. Proceeding in the same way with other combinations, the several totals will be 364, 286, 220, 165, 120, 84, 56, 35, 20, 10, 4, 1 or a grand total of 1820.

The process to get at the above figures as enunciated by Bhattotpala in his commentary is circuitous and confusing. This is only the number of combinations of 16 things taken 4 at a time ( $^{16}C_4$ ) of 1820.

*Slokas 16-18.*—Those women who have a wicked nature, and who are impatient during coitus, ought to be shunned. Inauspicious are those whose blood is dark, blue, yellow, or slightly copper-red. A woman that is sleepy, has too much blood and bile, has a dripping (burning) organ, is of a rheumatic and phlegmatic constitution, gluttonous, sweaty, with deformed limbs, short-haired, and with (prematurely) grey hair; further, one whose muscles are flaccid, who has a pot-belly and who pro-

duces indistinct sounds, besides those who in the Chapter on the signs of women have been declared sinful: with none of the above women should a man play the act of Cupid.

From the above remarks, it is quite clear that this is meant only for kings to follow.

*Slokas 19-20.*—The menstrual blood is sound if it is tinged like hare's blood, or lac, and fades after washing. (That is, fit for impregnation). Such blood not attended with noise and pain, and ceasing to flow after three days, will undoubtedly develop into an embryo after union with man.

*Slokas 21-22.*—A woman in menses should not bathe, not wear wreaths of flowers, nor anoint her body. She should bathe on the fourth day according to the mandates of the Sastras. She should use for her bath the herbs enumerated in the Chapter on 'Royal ablutions' (Ch. 48) mixed with water, and the same hymn mentioned there will have to be used here too.

युग्मासु किल मनुष्या निशासु नार्यो भवन्ति विषमासु ।  
दीर्घायुषः सुरूपाः सुखिनश्च विकृष्टयुग्मासु ॥२३॥

*Sloka 23.*—They say that sexual union on even nights (after menses) procreates males, while on odd nights, females. On distant even nights, it leads to the birth of children who will be long-lived, handsome and happy.

Probably the second half gives the author's own opinion in which distant even nights are good for future issue.

*Sloka 24.*—A foetus situated in the right side of the womb will be a male ; while one on the left, a female. One situated on both the sides will be twins and one in the middle is to be understood to be a eunuch.

*Sloka 25.*—A man ought to have sexual union with his wife when the Kendras and the Trikona houses are occupied by benefics, when the Moon and the Lagna are conjoined with benefics, when malefics are posited in the 3rd, 6th and 11th houses and when there are planetary combinations ensuring the birth of a male.

For पुंजन्मयोग, *vide* वृ. जा. IV-11.

*Sloka 26.*—A man should on no account make marks on his wife's body with his nails and teeth during her period of impregnation. Such a period lasts for sixteen days, of which the first three nights are unfit for union.

These ideas are described at length in works on Ayurveda such as अष्टाङ्गहृदय.

Thus ends the 78th Adhyaya on "the Union of Man and Woman."

### ✓ शय्यासनलक्षणम् ॥७९॥ Signs of Couches and Seats.

सर्वस्य सर्वकालं यस्मादुपयोगमेति शास्त्रमिदम् ।

*Slokas 3-4.*—Inauspicious are those trees that are thrown down by thunder-bolts, water; wind and elephants; those in which bees and birds have taken up their abode; those growing in sacred spots, burial grounds or roads; those that are withered at the top, and those that are entwined with creepers; so also are thorny trees; those growing at the confluence of great rivers,

or near temples and those that have fallen down in a westerly or southerly direction.

*Sloka 8.*—A practical digit is the distance covered by eight husked barely grains touching one another. A great couch of kings' measuring one hundred digits is made for (ensuring) victory.

नवतिः सैव षड्ना द्वादशहीना त्रिषट्हीना च ।

*Sloka 9.*—The couches of the prince royal, minister, commander-in-chief of the army and royal preceptor measure in order 90 digits, 84, 78, and 72 digits.

*Sloka 10.*—The width of a couch prescribed by Viswakarma is  $\frac{1}{8}$ th less than half the length (i. e.,  $\frac{7}{8}$ ths of the total length). The height of the legs including the swelling part (middle) and top is equal to a third of the length of the couch.

*Slokas 11-14.*—A cot constructed wholly of Sri-  
parni will bestow wealth; one of Asana, destroys diseases;  
one of the pith of ebony, gives money; one of Simsapa  
bestows all-round prosperity; one of Sandalwood des-  
troys enemies and bestows religious merit, renown and  
long life; one of Padmaka gives long life, prosperity,  
learning and money; one of Sal tree or Saka gives  
happiness. A king, reposing on a cot made entirely of  
sandalwood and covered with gold and decked with  
wonderful gems, will be honoured even by the Gods.

*Sloka 15-18.*—A couch made of Tinduki or Simsupa with some other timber will not yield good results ; so too is one of Deodar or Asana with Sriparna. Sal and Saka on the one hand and Haridraka and Kadamba on the other, are good, whether used jointly or separately. A cot wholly made of Spandana or Amba tree is not auspicious, since it destroys life ; one of Asana coupled with other timber produces immediately various troubles. It is beneficial to have the legs of Spandana tree for couches made of Amba, Spandana and Chandana. Couches and seats made of any fruit-tree will have favourable effect.

गजदन्तः सर्वेषां प्रोक्ततरुणां प्रशस्यते योगे ।

*Sloka 19.*—Elephant's tusk is highly commended for use in the construction of couches, etc. in combination with any of the above trees ; so that decorations may be made with good ivory.

दन्तस्य मूलपरिधिं द्विरायतं प्रोज्झ्य कल्पयेच्छेषम् ।  
 अधिकमनूपचराणां न्यूनं गिरिचारिणां किञ्चित् ॥२०॥

*Sloka 20.*—Cut off a length (from the bottom) equal to twice the circumference of the tusk at the bottom and use the remainder for purposes of embellishment. A little more of it will have to be cut off in the case of elephants haunting marshy places, and a little less in the case of those haunting mountainous tracts.

कृष्णे श्यावे रूक्षे दुर्गन्धे चाशुर्भ भवति ॥२५॥

*Slokas 21-25.*—When cutting the tusk, if figures resembling Bilwa trees, Vardhamana, umbrella, banner and chowries appear, sound health, victory, increase of wealth and happiness are to be expected. A figure similar to a weapon gives victory ; one like a spiral turning to the right, recovery of lost lands ; one like a clod, complete possession of a country conquered before ; one like a woman, loss of wealth ; one like a vase, birth of a son ; one like a pot, acquisition of a treasure ; one like a rod, obstacle to a journey ; those like chameleons, monkeys and serpents, famine, disease, and oppression by a foe ; those like eagles, owls, crows and hawks, pestilence ; one like a noose or a truncated body, bodes the king's death.

If blood comes out from the cut, there will be calamity to the people ; if the cut be dark, grey, rough and bad-smelling, disaster is near.

शुक्लः समः सुगन्धिः स्निग्धश्च शुभावहो भवेच्छेदः ।

अशुभशुभच्छेदा ये शयनेष्वपि ते तथा फलदाः ॥२६॥

*Sloka 26.*—A cut that is white, even, fine-smelling, and glossy leads to prosperity ; just as auspicious and inauspicious cuts produce good and bad results, even so do the trees used for couches.

ईषायोगे दारु प्रदक्षिणाग्रं प्रशस्तमाचार्यैः ।

अपसव्यैकदिगग्रे भवति भयं भूतसञ्जनितम् ॥२७॥

*Sloka 27.*—In fitting up the frame of the couch, the tips of the beams should be laid in a direction from left to right ; so say the ancient seers. If they be laid contrariwise, or all turned to one direction, there would be danger from devils.

ईषा is the frame consisting of two short beams, one on the headside, and the other on the footside, and two others on the two sides. The side beams are fixed into the two other smaller beams. In doing so take the head side where the foot of the beam faces north and tip, the south, the foot of this southern beam should be fixed into the tip of the first beam, and so on, This is called प्रदक्षिणाग्र. The tips of both the beams should not be put together.

द्वाभ्यां न जीर्यतेऽन्नं त्रिचतुर्भिः क्लेशवधबन्धाः ॥२८॥

*Sloka 28.*—If one of the legs is put topsy-turvy, the owner will have one of his feet crippled ; If two, he cannot digest his food ; and if three or four, he will have misery, death and captivity,

Here 'topsy-turvy' is used in respect of the timber and not the leg as such.

 ईषाशीर्षण्योश्च त्रिभागसंस्थो भवेन्न शुभः ॥३१॥

*Slokas 29-31.*—If there is a hollow or a discoloured knot in the upper part of the leg, the owner will have cerebral disease. If there is such a knot in its pot, he will have stomach trouble ; if in the shank-like part below the pot, danger to his shanks ; if in the support beneath that, loss of wealth ; if in the hoof, trouble to the hoofed animals. Inauspicious also is a knot occurring at a third of the length of the side-beams and cross-beams.

निष्कुटमथ कोलाक्षं सूकरनयनं च वत्सनाभं च ।  
 कालकमन्यधुन्धुकमिति कथितश्छिद्रसङ्क्षेपः ॥३२॥

*Sloka 32.*—The different kinds of blemishes (holes) in the wood may be summed up in the following list :—Nishkuta (cavity), Kolaksha (boar's eye), Sukaranayana (hog's eye), Vatsanabha (calf's navel), Kalaka (dark spot) and Dhundhuka (cut dark spot).

 दारुसवर्णं छिद्रं न तथा पापं सम्रादिष्टम् ॥३५॥

*Slokas 33-35.*—The blemish called Nishkuta (cavity) is like a pot, hollow in the middle and narrow at the mouth ; the second, Kolaksha is blue and like a grain of black gram ; the third, Sukaranayana, is uneven, discoloured and extending over one joint and a half ; the fourth—Vatsanabha—is a spot running from left to right, broken and extending over one joint; the fifth, Kalaka, is a black spot ; and the sixth (धुन्धुक) is also dark, but cut. A faulty spot having the same colour as the wood itself is not deemed so harmful.

 कालकधुन्धुकसञ्ज्ञं कीटैर्विद्धं च न शुभदं छिद्रम् ।  
 सर्वं ग्रन्थिप्रचुरं सर्वत्र न शोभनं दारु ॥३७॥

*Slokas 36-37.*—The blemish going by the name of Nishkuta causes loss of wealth ; Kolaksha, ruin of the family ; Sukara, danger from weapons ; Vatsanabha, danger from disease. The last two blemishes and a spot bored by insects are not auspicious. In general, timber full of knots is never good.

*Slokas 38-39.*—A couch or seat made from one kind of timber is blessed ; more blessed is the one made from two kinds of timber ; one of three kinds leads to the prosperity of one's children ; one of four kinds, to wealth and foremost, renown. One made from five kinds

of timber causes the death of the person who sleeps on it ; and one of six, seven or eight kinds, the ruin of the family.

Thus ends the 79th Adhyaya on " Signs of Couches and Seats."

*Slokas 1-2.*—Rubies are born of sulphur, Kuruvinda and crystal. Those produced from sulphur show the lustre of bees, antimony, lily, rose-apple or Rasa (myrrh). Those that arise from Kuruvinda are grey, of pale lustre and mixed with mineral substances; those coming from crystal are lustrous, multi-coloured and pure.

*Slokas 7-11.*—The price of a single ruby weighing a Pala (= 4 Karshas) is, we are taught, 26,000 silver

pieces (*i. e.*, Karsha panas); one of three Karshas is worth 20,000 pieces silver ; one of half a Pala, 12,000 pieces silver; one of one Karsha, 6,000 pieces silver ; one of eight Retties, 3,000 pieces silver ; one of four Retties, 1,000 pieces silver ; one of two Retties, 500 pieces silver. The price of rubies of intermediate weight must be calculated proportionally, and with due regard to their being of inferior or superior quality. A stone deficient in colour fetches half the usual price ; one lacking brilliance, an eighth part ; one with few good and many bad qualities fetches  $\frac{1}{10}$ th of the standard price. A stone somewhat dusky, with many scratches and few good features will fetch  $\frac{1}{10}$ . Such is the price of rubies as stated by the ancient seers.

*Sloka 9.*—Auspicious is a tooth-stick that falls, when thrown away, towards the user and in a tranquil (unscorched) direction; it is especially good, if it occu-

pies an elevated place. One contrary to the above is declared to be inauspicious ; whereas one that falls down after standing erect for awhile, brings sumptuous food.

Thus ends the 85th Adhyaya on “ Tokens of Tooth-sticks ”.

### शाकुनम् ॥८६॥ Omens through Birds and Beasts.

तानि दृष्ट्वा चकोरमं सर्वशाकुनसङ्ग्रहम् ।

वराहमिहिरः प्रीत्या शिष्याणां ज्ञानमुत्तमम् ॥४॥

*Sloka 1-4.*—For the delectation of his disciples has Varahamihira written this science, the source of super knowledge abridging all the existing works on this science of Omens, having read the works of Rishabha who incorporated in his work the teachings of Indra, Sukra, Brihaspati, Sage Kapisthala and Garuda, of Bhaguri, of Devala, of the blessed king Dravyavardhana, ruler of Avanti, and born of the family of great emperors who followed the work of Sage Bharadwaja, of the seven Seers, of Garga and other sages, of several authors on the subject of ‘ Journey ’ and other works in Sanskrit and Prakrit.

Who is this king Sri Dravyavardhana ? Was he a descendant of Harsha Vardhana ? Was he a Buddhist ? Was Avanti

included in the Kingdom of Magadha? For, the Commentator says that Varahamihira was a Magadha Brahmana.

शकुन is the adjectival form of शकुन = Omen. This शकुन is based upon the word शकुनि, a bird. This chapter should not be confounded with the one on "Portents."

अन्यजन्मान्तरकृतं कर्म पुंसां शुभाशुभम् ।

यत्तत्सञ्चकुनः पाकं निवेदयतिगच्छताम् ॥५॥

*Sloka 5.*—During a man's journey, an omen reveals the fruition of his deeds, good and bad, done in a previous birth.

This shows that the omens are not superstitious beliefs. They indicate one's belief in the rebirth of the soul and thus reveal effects of past deeds, good or bad.

ग्रामाण्याम्बुभूव्योमद्युनिशोभयचारिणः ।

रुतयातेक्षितोक्तेषु ग्राह्याः पुंस्त्रीनपुंसकाः ॥६॥

*Sloka 6.*—Omens are of various kinds, as those through beings that are rural, wild, aquatic, terrestrial, heavenly, diurnal, nocturnal and diurnal-nocturnal. The sex of the creatures is to be determined from their cry, gait, look and speech.

Rural beings are men, horses, elephants and dogs; wild ones, lions, tigers, boars, deer, etc.; aquatic ones, swans and the like; terrestrial ones, dogs and the like, mongooses, serpents, etc. For the explanation of diurnal, etc., cf. Chap. 88 *infra*. According to the Commentator when there is a doubt as to whether a certain bird crying is male, female or eunuch, it is to be guessed from the sex of a person talking near by.

पृथग्जात्यनवस्थानादेषां व्यक्तिर्न लक्ष्यते ।

सामान्यलक्षणोद्देशे श्लोकावृत्तिविमुक्तौ ॥७॥

*Sloka 7.*—Since it is very difficult to distinguish their sex owing to the multiplicity of their genera and the

absence of a fixed habitat, Sage Garga, the senior, has written the following two verses explaining their general characteristics.

पीनोन्नतविकृष्टांसाः पृथुग्रीवाः सुवक्षसः ।  
 स्वल्पगम्भीरविरुताः पुमांसः स्थिरविक्रमाः ॥८॥  
 तनूरस्कशिरोग्रीवाः सूक्ष्मास्यपदविक्रमाः ।  
 प्रसक्तमृदुभाषिण्यः स्त्रियोऽतोऽन्यन्नपुंसकम् ॥९॥

*Slokas 8-9.*—"The male creatures have fleshy, high and large shoulders, broad necks, a fine breast, small but deep sound and great valour (or firm gait ?); whereas the female ones have slender breast, head and neck, small face and feet, little courage and harmonious and melodious voice. Those that are possessed of characteristics different from these are eunuchs."

Eunuch will have masculine as well as feminine characteristics combined in them.

ग्रामारण्यप्रचाराद्यं लोकादेवोपलक्षयेत् ।  
 सञ्चिक्षिप्सुरहं वच्मि यात्रामात्रप्रयोजनम् ॥१०॥

*Sloka 10.*—The creatures that live in villages, forests, etc., are to be understood only from conventional knowledge. Here I should like to delineate in brief only those that are relevant to journeys.

पंथ्यात्मानं नृपं सैन्ये पुरे चोद्दिश्य देवताम् ।  
 सार्थे प्रधानं साम्ये स्याज्जातिविद्यावयोऽधिकम् ॥११॥

*Sloka 11.*—A man going on a journey ought to consider the omens, good or bad, as relating to his own person; in a marching army, they relate to the sovereign; in a city, to the tutelary deity (or to the Mayor); in an assembly, to the chieftain. When there are many

chieftains of the same rank in a concourse, they refer to one who is seniormost; by virtue of his birth, learning and age.

मुक्तप्राप्तैश्वर्यासु फलं दिक्षु तथाविधम् ।

अङ्गारदीप्तधूमिन्यस्ताश्च शान्तास्ततोऽपराः ॥१२॥

*Sloka 12.*—For three hours after Sunrise the North-east is called Mukta Surya (*i. e.*, one that has abandoned the Sun), the East, Prapta-Surya (*i. e.*, one that has attained the Sun) and the South-east, Eshyat Surya (one that is going to get the Sun); for the second watch of the day, the East, South-east and South respectively get those names; for the third watch, the South-east, South, and South-west; for the fourth watch, South, South-west and West; for the first watch of the night, South-west, West and North-west; for the 2nd watch, West, North-west and North; for the third watch, North-west, North and North-east; and for the fourth watch, North, North-east and East. The effects of omens in the respective directions are as signified by their names given above, *i. e.*, in the Mukta-Surya quarter, the effect of the omen is already spent up; in the next quarter, it is to be experienced the same day; and in the next, it is impending. The three quarters named above, *viz.* Mukta, Prapta and Eshya (abandoned, prevailing and coming) are severally termed Angara (charcoal), Deepta (burning) and Dhumini (smoking), and the remaining quarters, tranquil.

The commentator refutes the statement of some scholars who hold that the East is प्राप्तदीप्त or दीप्त during the three hours made up of the last half watch of the night and the first half-watch of the day, and quotes Garga in support of his contention.

*N. B.*—In the light of this view, we have to make some

additions in some previous chapters. We have to refer to this Sloka while commenting upon the term दीप्त occurring previously.

तत्पञ्चमदिशां तुल्यं शुभं त्रैकाल्यमादिशेत् ।  
परिशेषदिशोर्वाच्यं यथासन्नं शुभाशुभम् ॥१३॥

*Sloka 13*—Omens occurring in the 5th directions from these three—Charcoal, Burning and Smoking—augur well equally for the past, present and future. The good or bad effects of omens occurring in the remaining two quarters will have to be judged from their proximity to the particular Tranquil quarter.

To make this clear :—It has been already stated that 3 quarters at a time get the appellations of Charcoal, Burning and Smoking and that the remaining 5, of Tranquil. Here the author speaks of the 5th quarter counted from any one of these three. If we take the first triad N. E., E and S. E. (Charcoal, Burning and Smoking) we get as the 5th ones to these : S. W., W and N. W. respectively. Similarly in the case of other triads. So of these 5 Tranquil quarters, only one is very beneficial to the particular member of the triad ; *e. g.*, a good omen in the 5th quarter from 'Charcoal' indicates some good thing that has already occurred ; from the 'Burning', a good thing that takes place the same day ; and from the 'Smoking' a good thing that is going to take place in the near future. Similarly a bad omen in these indicates only very slight harm. Suppose an omen takes place not in the 5th quarter from any member of the triad, but one place this side or that ; then we will have to see to which of the Tranquil quarters it is proximate and then predict the results ; *e. g.*, let us take the 'Burning' direction. Suppose an evil omen occurs not in the 5th from this, but near the 5th from 'Charcoal' ; then the bad effect which had been already felt was slight ; similarly, if a good omen takes place, there was some good effect : but if there is a good omen near the 5th from 'Smoking', the evil effect in the future will be moderate ; if it is a bad one, the same in the future will be very great.

शीघ्रमासन्ननिम्नस्थैश्चिरादुन्नतदूरगैः ।

स्थानवृष्ट्युपघाताच्च तद्वद्ब्रूयात्फलं पुनः ॥१४॥

*Sloka 14.*—Omens occurring near by and at a lower level bear fruit (good or bad) immediately ; whereas those far off and at a higher place, in distant future. Moreover the predictions will have to be made suitably after a consideration of the growing or diminishing nature of the place on which the omen is perched.

Suppose a bad omen is seen on a growing thing (say, a tree); then the malefic effect will not be excessive ; similarly, if there is a good one there, the beneficial effect will be very great and increasing gradually. Suppose there is a bad omen in a dying tree ; the bad effects will be extreme ; so also a good one there will produce very little good effect. Parasara gives another set of दार्ष्ट and शान्त objects as omens.

क्षणातिथ्युद्भवात्तार्कैर्देवदीप्तो यथोत्तरम् ।

क्रियादीप्तो गतिस्थानभावस्वरविचेष्टितैः ॥१५॥

*Sloka 15.*—An omen is said to be *blasted* by a divine agency when it occurs in a malefic Muhurta, lunar day and lunar mansion, when the wind blows foul and the Sun is in opposition ; whereas it is *blasted* by action, when it has untoward gait, position, disposition, sound and movements of limbs. In both the sets, the power of each element is greater than its predecessor.

In the Muhurtas of dreadful and cruel asterisms an omen is 'blasted'; so too in the 4th, 6th, 8th, 9th and 14th lunar days ; in the stars Mula, Jyeshtha, Aslesha, Ardra, Bharani, Visakha, Magha, Krittika and Purvaphalguni (and other Parvas); during the wind which is fierce, rough, strong and unfavourable; in a direction opposite the Sun, and in one where there\* is such a wind as given above. Thus there are five varieties of Blasting an omen through a divine agency. There are five other varieties called 'Blasting of

**Action.** When an omen runs against lightning, comet, the Sun or wind, it is **Blasted** by 'Gait'; when it is stationed in a cut, broken, crooked, smeared पाणिजग्धा, dilapidated or withered, or dirty support, it is, by 'position,' an omen in the form of a lifeless or unconscious or partially conscious creature, is blasted in 'feelings or life'; when it utters a word whose letters are ill-pronounced and lengthened, the voice being feeble and broken, it is called 'blasted in voice': when a bird flaps its wings, shakes its beak, is about to fall down, cries hoarse and pecks at trees, it is 'blasted by movement.' (The commentator quotes Rishiputra who in his turn quotes Lord Indra).

दशधैवं प्रशान्तोऽपि सौम्यस्त्वणफलाशनः ।

मांसामेध्याशने रौद्रो विमिश्रोऽन्नाशनः स्मृतः ॥१६॥

*Sloka 16* —In the same manner there are ten varieties of omens that are 'Tranquil'. One eating grass and fruits is a 'Tranquil' or benefic omen, while one eating meat and ordure is 'blasted' (malefic). One eating cooked food is supposed to be of a mixed kind, *i. e.* "Tranquil cum blasted,"

चिरकालेन दीप्राद्यास्त्रागमो दिक्षु तन्मृणाम् । ६८॥

*Sloka 68.*—If an omen is standing in any of the eight quarters beginning with the 'Burning', men will meet in order cruel, hot-tempered, sinful and wicked persons, ministers, kings, preachers and old men.

Bhattotpala gives another interpretation:—in the four directions, viz., Burning, Smoking, Tranquil and Charcoal, meeting with cruel persons, those who are corrupted by some fell sins, historians of great ancient kings and antiquated men respectively. He says that this interpretation is better.

*Sloka 69.*—If an omen be strong and accompanied by some substance, there would be the arrival of a person with something in his hand. If the omen be

lustrous and looking down, though auspicious, the person arriving would be a perpetrator of heinous crimes.

Another meaning for the 2nd half :—If the omen be lustrous, the person arriving would be one of a peaceful temperament ; if it looks down, he will be a doer of heinous crimes.

**विदिकथ्यः शकुनो दीप्तो वामस्थेनानुवाशितः ।**

**स्त्रियाः सङ्ग्रहणं प्राह तद्दिगाख्यातयोनितः ॥७०॥**

*Sloka 70.*—If the cry of an omen stationed in a ' Burning ' corner be followed by another to its left, it indicates a man's marital alliance with a woman of the type indicated by that direction.

This idea may be stretched to the case of a woman also.

**शान्तः पञ्चमदीप्तेन विरुतो विजयावहः ।**

**दिग्भरागमकारी वा दोषकृत्तद्विपर्यये ॥७१॥**

*Sloka 71.*—The cry of an omen standing in a ' Tranquil ' quarter being followed by another stationed in a ' Burning ' one that is fifth from the ' Tranquil ' quarter, bestows victory, or indicates the arrival of the person assigned to that quarter. If it be otherwise, (one cry in a ' burning ' quarter followed by another in a ' tranquil ' quarter fifth from it), troubles will arise.

Another meaning is possible —An omen standing in a ' tranquil ' quarter and crying along with another in another ' tranquil ' quarter which happens to be the fifth from the ' Burning ' quarter at the time, etc. In this case तद्विपर्यये is to be interpreted as दीप्तः शान्तपञ्चमेन—one staying in a ' Burning ' quarter crying with another in another quarter which is fifth from one of the ' Tranquil ' quarters.

**वामसङ्ख्यगतो मध्यः प्राह स्वपरयोर्भयम् ।**

**मरणं कथयन्त्येते सर्वे समविराविणः ॥७२॥**

*Sloka 72.*—An omen standing between two others to its left and right with its cry being reciprocated by

them indicates severally peril to a person from his own kith and kin and foes. (If both the flanking omens cry after it, then there will be trouble for both the quarters.) All the three crying simultaneously portend death.

*Sloka 73.*—An omen standing at the top, middle or foot of a tree, indicates severally the arrival of a person riding an elephant, horse or chariot; one standing on a long substance, a lotus or the like of it or something whose top is chopped off, indicates severally the arrival of a man carried by another man, by a ship or by a sedan chair.

**शकटेनोन्नतस्ये वा छायास्ये छत्रसंयुते ।**

*Sloka 74.*—An omen situated on a lofty height (such as a mountain) indicates the arrival of a person in a cart; one in the shadow, of a person holding an umbrella. Whatever good or bad consequences are indicated by the omens situated in the four quarters, East etc. or in the other corners, South-east, etc., will come to be felt in order in one, three, five and seven days.

**सुरपतिहुतवहयमनिर्ऋतिवरुणपवनेन्दुशङ्कराः क्रमशः ।**

*Sloka 75.*—The lords of the eight quarters, East, South-east, South, South-west, West, North-west, North, and North-east are respectively Indra, Agni, Yama, Nirriti (King of evil Spirits), Varuna, Vayu, the Moon and Siva. The four prime quarters are masculine, while the corners, feminine.

This knowledge helps one to find out the name (synonym of Indra, etc.) of the person that has arrived or is going to arrive ; or his tutelary deity. In queries regarding theft or the missing of an article, the omen good or bad indicates the direction of thief and article, possibility of recovery, etc. The worship of the particular deity will allay the fears of a person who has seen a bad omen in that direction. Similarly the sex can be found out in the above cases.

Sloka 76.—In the circle of quarters divided into 32

parts, if there be an omen in the eight directions beginning with the East, the respective materials on which writing may exist are a tree, palm-leaf, a worthless fragment of leaf, cloth, water-product (lotus-leaf), reed, leather and silk. The effects of the omens will be felt in the respective divisions.

*Sloka 77.*—If omens are found in the eight quarters, their effects will be felt severally near a place of military exercise, near a fire-place, where some sound is heard, where a quarrel takes place, near water, where fetters and the like are kept, where Veda is chanted and where the bellowing of cows is heard. The colours of things that may be found as a result of omens in the prime quarters beginning with the East are in order, red, yellow, black and white ; but in the corners, they are mixed.

In the S. E., it is yellowish red; in S. W., dark-yellow; in N. W., grey and in N. E., pale-red. The use of this is—suppose an omen has some substance with it; the person will get some object of the colour assigned to the particular quarter. This knowledge may be made use of in cases of theft and missing articles, or colours of cloths, or devotion to deities presiding over the colours.

**चिह्नं ध्वजो दग्धमथ श्मशानं दरी जलं पर्वतयज्ञघोषाः ।

*Sloka 78.*—The signs of the eight quarters beginning with the East are: a banner, something burnt, a burial ground, a cave, water, a mountain, a sacrifice and a hamlet of cow-herds (or proclamation ?). Good or bad omens stationed on these signs augur a meeting with

some good person or danger respectively. Other things *viz.*, good or bad doings (presaged by omens) take place in auspicious or inauspicious quarters.

*Sloka 79.*—When the question refers to women, omens appearing in the several quarters beginning with the East point to a buxom woman, a virgin, a woman of defective limbs, one that is stinking, one of blue-saree, a wicked woman, a tall one, and a widow respectively. These are useful in questions pertaining to meetings.

There is another interpretation, since women are assigned to the corners. The four corners N. E., S. E., S. W., and N. W., indicate severally a buxom virgin, a crippled and a stinking woman a wicked woman of blue cloth and a tall widow.

*Sloka 80.*—When at a query the querist or an omen stands in any of the eight quarters, the question refers severally to silver, gold, a sick person, a charming damsel, a goat or sheep, a vehicle (or journey), a sacrifice or a cow-shed. Similarly the trees corresponding to these quarters are in order, the banyan, a red tree, Lodhra, bamboo, mango, Khadira, Bilwa and Arjuna.

When there is a good omen in the above quarters, one may get the articles belonging to them; otherwise, one will lose them. It refers to loss or theft of the several articles.

The latter half gives us a clue as to which tree will flourish in each of the quarters.

Thus ends the 86th Adhyaya on "Omens through Birds and Beasts."

बृह्मरुतान्ते परतश्च टाटा पूर्णः स्वरोऽन्ये कथिताः प्रदीप्ताः ॥१॥

*Sloka 1.*—Jackals are similar to dogs in effect with the difference that the former get passion for mating in the 'Sisira' season (months of Magha and Phalguna). The sounds 'बृह्' at the end of their howling and 'टाटा' at other times are 'full'; all other sounds are said to be 'Burning'.

[Since Sisira is the season for the jackals to be intoxicated, their cries then are of no value.]

लोमाशिकायाः खलु ककशब्दः पूर्णः स्वभावप्रभवः स तस्याः ।

येऽन्ये स्वरास्ते प्रकृतेरपेताः सर्वे च दीप्ता इति सम्प्रदिष्टाः ॥२॥

*Sloka 2.*—And the sound "Kakka" of the Loma-sika (Hair-eater) is 'Full', for, that is its natural cry; all other sounds being opposed to the natural one are termed "Burning."

धूमिताभिमुखी हन्ति स्वरदीप्ता दिगीश्वरान् ॥३॥

*Sloka 3.*—The jackal is commendable in the east and the north; one stationed in a 'Tranquil' quarter and having a pleasant sound is always highly favourable; one facing the 'Smoking' quarter and 'Burning' in respect of voice destroys the rulers of that direction.

अर्काद्यनलवत् तस्या वक्त्रं लालास्त्रभावतः ॥७॥

*Sloka 7.*—Some sages (such as Kasyapa) do not declare the dreadful nature of the flaming jackal. For; on account of the intrinsic nature of its saliva, its mouth is fiery like the Sun and other luminaries.

Another reading is आक्रान्तानलवत्—like a burning log or like the circle of fire caused by the revolution of a burning stick.

अन्यप्रतिरुता याम्या सोद्गन्धमृतशंसिनी ।

वारुण्यनुरुता सैव शंसते सलिले मृतम् ॥८॥

*Sloka 8.*—The cry of a jackal stationed in the South being re-echoed by another, indicates the death of a relative by hanging ; but in the West, by drowning.

*Slokas 9-10*—When a jackal howls once, twice, thrice, four times, five times, six times or seven times, the

effects will severally be freedom from distress, hearing pleasant news gain of wealth, arrival of a beloved person, turmoil, dissension among the king's ministers (or breaking of a valuable article ?) or prosperity of vehicles. If it cries more times, no heed is to be given to that ; but if it cries in the South, the above effects of the frequency will be just the contrary, save for the fifth or the sixth. (The respective effects in the South will be—distress, hearing unpleasant news, loss of wealth, separation from a beloved person, turmoil, dissension and loss of vehicles.)

शान्ता त्ववर्णात् परमारुवन्ती टाटामुदीर्णामिति वाश्यमाना ।

टेटे च पूर्वं परतश्च थे थे तस्याः स्वतुष्टिप्रभवं कृतं तत् ॥१४॥

*Sloka 14.*—If a jackal standing in a 'Tranquill' direction and having pleasant voice produces any sound beginning with अ or the harsh sound 'टटा', or first sounding like 'टेटे' produces 'थेथे' sound at the end, it is auspicious. For all these sounds are born of its heart's joy.

उच्चैर्धोरं वर्णमुच्चार्य पूर्वं पश्चात् क्रोशेत् क्रोष्टुकस्यानुरूपम् ।  
या सा क्षेमं प्राह वित्तस्य चाग्निं संयोगं वा प्रोषितेन प्रियेण ॥१५॥

*Sloka 15.*—If a jackal at first cries producing some harsh sound in a very high pitch and then howls in its natural fashion, it indicates preservation and acquisition of wealth and union with a beloved person who had gone abroad.

Thus ends the 90th Adhyaya on "The cries of Jackals".

*Sloka 11.*—At the commencement of any work, count the distance in signs from the one occupied by the Sun to the Lagna in the manner of 'Weal' and 'Woe' in order. Accordingly, wealth or misery will have to be predicted.

If the Lagna is an odd number from the Sun's Rasi, it is good ; if even, bad.

*Slokas 12-13.*—If the Sun is posited in the 12th place from the Lagna at the time, the person whom one will meet will be blind of the right eye ; if the Moon be there, he will be blind of the left eye ; if the Sun be in the Lagna itself and be aspected by malefics, he will be completely blind. If the Sun in the above condition be in his own Rasi, he will be hunch-backed, deaf or an imbecile. If the 6th house from the Lagna be occupied and aspected by malefics, the person will have ulcer in the limb indicated by that sign. In this way, whatever marks or forms (colours) have been expounded by me in connection with the time of births, will have to be adopted here too.

This shows clearly that Brihatjataka was written first and then only this book.

अथाऽऽगतस्याख्याज्ञानमाचार्यः करोति । तच्चाल्पबहुलं स्वल्पग्रन्थं

व्याख्यायते-

अतः परं लोकनिरूपितानि द्रव्येषु नानाक्षरसङ्ग्रहाणि ।

इष्टप्रणीतानि विभाजितानि नामानि केन्द्रक्रमशः प्रवक्ष्ये ॥१॥

1. Hereafter I shall explain in the order of the Kendras the names that are held by the objects of the world, viz., mineral, vegetables and animals with multifarious distinctions made a will and composed of various syllables.

So far Yavaneswara has been treating of the method of guessing the query.

लग्नान्बुधसंस्थास्तनमःस्थितेषु क्षेत्रेषु ये लग्नगता गृहांशाः ।

तेभ्योऽक्षराण्यात्मगृहाश्रयाणि विन्याद्ग्रहाणां स्वगणक्रमेण ॥२॥

2. The syllables belonging to the signs in accordance with their respective classes of sounds will have to be gathered from the Navamsas of the signs signifying the Lagna, the 4th, the 7th. and the 10th houses.

कवर्गपूर्वान् कुशुकचान्द्रिनीवार्कजानां प्रवदन्ति वर्गान् ।

यकारपूर्वाः शशिनो निरुक्ता वर्णास्त्वकारप्रमवा रवेः स्युः ॥३॥

3. The guttural, palatal, lingual, dental and labial class of consonants belong severally to Mars, Venus, Mercury, Jupiter and Saturn; the eight letters beginning with य-ya belong to the Moon and the vowels to the Sun.

द्रेकाणवृद्धाः प्रवदन्ति नाम त्रिपञ्चमसाक्षरमोजराशौ ।

सुरमे तु विन्याद् द्विचतुष्कषट्कं नामाक्षराणि ग्रहद्विवृद्धाः ॥४॥

4. The number of letters constituting a name is to be deduced from the decanate that is rising. In an odd sign, the numbers will be three, five and seven respectively, in the first, second and third decanates; and in an even sign, they will in order be 2, 4 and 6. They are also ascertained from the strength of the aspect of planets.

वर्गोत्तमे व्यक्षरकं चरांशे स्थिरक्षभागे चतुरक्षरं तत् ।

ओजेषु चैभ्यो विषमाक्षराणि स्युर्द्विस्वभावेषु तु राशिवच्च ॥५॥

5. If the Vargottama Navamsa of a Rasi be signified by an even and a moveable one, the name consists of two syllables; if by an even and at the same time a fixed sign, four syllables. If the Vargottama Navamsa be an odd as well as a moveable Rasi, there will be three letters; if by a fixed sign, five. If the Lagna be a dual sign, the name will consist of as many letters as correspond to the number signified by the Rasi (when counted, from Mesha).

द्विमूर्तिसञ्ज्ञे तु वदेद्विनाम सौम्येक्षिते द्विप्रकृतौ च राशौ ।

यावान् गणः स्वोदयगोशकानां तावान् ग्रहः संग्रहकेऽक्षराणाम् ॥६॥

6. In the case of a dual sign, two names will have to be declared; when it is aspected by benefics, then too, the same result. The particular Navamsa rising at the time, gives the number of letters constituting the name.

संयोगमादौ बहुलेषु विन्ध्यात् कूटेषु संयोगपरं वदन्ति ।

स्वोच्चांशके द्विष्कृतमृक्षयोगाद्गुर्वक्षरं तद्भवनांशके स्यात् ॥७॥

7. If the rising sign be odd, the name will begin with a conjunct consonant; if an even one, with a letter followed by a conjunct consonant. When the planet (contributing a letter to the name) is posited in his highest exaltation, the letter is repeated according to the nature of the particular sign (odd or even); a name will have a long syllable गुरु in the particular place signified by the Navamsa rising at the time.

श्रीधर, क्षीर, स्मर are the examples for the first. पञ्च, धर्म, वसुदत्त, etc. for the second; if odd. दरद, दामोदर, if even, देवदेव, धराधर etc.

मात्रादियुक् स्याद्ग्रहयुक्त्रिकोणे द्रेष्काणपर्यायवदक्षरेषु ।

नभोबलेषूर्ध्वमधोऽम्बुजेषु ज्ञेयो विसर्गोऽस्तबलान्वितेषु ॥८॥

8. When the 5th or the 9th house is occupied by planets, there will be an extra syllabic instant in the name in the letter signified by the decanate. When the 10th house is strong, there will be the upper sign of long syllable; when the 4th, lower sign; when the 7th, a Visarga.

शीर्षोदयेषूर्ध्वमुशन्ति मात्रामधश्च पृष्ठोदयशब्दितेषु ।

तिर्यक् च विन्ध्यादुभयोदये तां दीर्घेषु दीर्घामितरेषु चान्याम् ॥९॥

9. When a Seershodaya Rasi is rising, the मात्रा (syllable instant) will be upwards; when it is a Prishtodaya one, the मात्रा will be downwards. In the case of a dual sign rising, it is across; when it is a long sign, there is a long syllable; when it is medium or short, it will be short.

प्राग्भ्रततोयास्तनमःस्थितेषु भेष्वंशकेभ्योऽक्षरसंप्रहः स्यात् ।

कूरोऽक्षरं हन्ति चतुष्टयस्यो दृष्ट्यापि मात्रां च त्रिकोणगो वा ॥१०॥

10. The letters of a name are contributed by the Navamsas of the signs that are the 1st, 4th, 7th and 10th houses. A malefic posited in a Kendra house destroys a syllable, while in a triangular one, destroys a मात्रा. The same result will arise even by aspect.

शुभग्रहस्तूर्जितवी र्यमागी स्यानांशतुल्याक्षरदः स चोक्तः ।

पश्यन् स्थितः केन्द्रत्रिकोणयोर्वा स्वोच्चेऽपि वर्णद्वयमात्मभागे ॥११॥

11. A strong benefic is said to contribute as many syllables as the Navamsas travelled by him ; or when he is posited in a Kendra, Kona, in his exaltation or own Navamsa and aspects the Lagna, he gives two letters.

क्षेत्रेश्वरे क्षीणचर्लेऽशके च मात्राक्षरं नाशमुपैति तज्जम् ।

असम्भवेऽप्युद्भवमेति तस्मिन् वर्गाद्यमुच्चांशयुजीशदृष्टे ॥१२॥

12. When the lord of the sign rising as also its Navamsa are weak, the syllabic instant मात्रा as well as the syllable caused by that is destroyed ; still, in its stead, the first letter of the particular class comes into being provided the said lord is posited in the Navamsa that is owned by his exaltation sign and the Navamsa Rasi aspected by its own lord (or, and aspected by the lord of that Rasi or Navamsa Rasi ?)

केन्द्रे यथास्थानचलप्रकर्षे क्षेत्रस्य तत्क्षेत्रपतेश्च बुद्धा ।

कार्योऽक्षराणामनुपूर्वयोगो मात्रादिसंयोगविकल्पना च ॥१३॥

13. The order of the letters as well as the existence of the Matras, conjunct consonants at the beginning or the end should be fixed only after ascertaining fully the extent of the positional strength of the Kendra house and its lord.

तत्रादिराश्यादिचतुर्विंशमाद्यंशकादिक्रमपर्ययेण ।

प्राग्भ्रततोयास्तनमःस्थितेषु भेष्वंशकेभ्यः स्वगणाक्षराणामन्वर्थने प्राप्तिरियं विचार्या ॥१४॥

14. In reconstructing a name, the method to be adopted is the following: Take the four Kendras beginning with the first sign (*i. e.*, Aries, Cancer, Libra and Capricorn) and their Navamsas in regular order for the first; then take the letters of the classes belonging to the respective planets owing to their position in the Navamsas identical with the above ones.

मेघे ककारो हिबुके यकारस्तुले चकारो मकरे पकारः ।

मेघे छकारो हिबुकेऽप्यकारस्तुले खकारो मकरे फकारः ॥१९॥

15. When the first Navamsa of Mesha is rising, the letter is क ; for Karkataka, the 4th, य ; for Tula, the 7th, च ; for Makara, the 10th, प ; similarly for the second Navamsas of these four, the letters indicated are in order छ, अ, ख and फ.

[It has been explained above that the letters are to be deduced from the Navamsas of the 1st, 4th, 7th and 10th houses according to their being owned by the several planets. Now when Mesha happens to be rising, the first Navamsas of this and the other Kendras are respectively Mesha, Kataka, Tula and Makara. These are owned by Mars, the Moon, Venus and Saturn respectively. Since they are the first Navamsas, we have to take the first letters of the classes belonging to the planets, *viz.* क, य, च and प. When the second Navamsas of Mesha, Kataka, etc are rising, the letters will be for the same reason the second letters of the respective classes, according to their ownership; *e.g.* in Mesha, the 2nd Navamsa belongs to Venus, so the second letter of चवर्ग *i.e.*, छ and so on.]

मेघे टकारो हिबुके ठकारस्तुले तकारो मकरे थकारः ।

मेघे तु रेफो हिबुके जकारस्तुले बकारो मकरे गकारः ॥१६॥

16. When the 3rd Navamsa of Mesha is rising, the letter for it is ढ; for the fourth house Karkataka, it is ढ; for the seventh Tula, त; for Makara, it is थ; for the 4th Navamsa of Mesha, Kataka, Tula and Makara, they are respectively र, ज, व and ग.

[Though the Navamsa is the 3rd, still the letter taken, is the first of the class ढ, it is the first time that Mercury gets his chance.]

आकारमाद्येऽम्बुगते घकारमस्ते भकारं मकरे झकारम् ।

लघे डकारं हिबुके दकारमस्ते धकारं मकरे ढकारम् ॥१७॥

17. When the 5th Navamsas of Mesha is rising, the letters for the four houses are आ, घ, भ and झ respectively ; similarly for the sixth Navamsas of these 4 houses, the letters are in order ड, द, ध and ढ.

लघे नकारो हिबुके मकारः तुले डकारो मकरे लकारः ।

लघे ककारो हिबुके पकारस्तुले चकारो मकरे इकारः ॥१८॥

18. When the 7th Navamsa of Mesha is rising, the letters for the four Kendras houses are न, म, ड. and ल respectively ; for the 8th Navamsa, the corresponding letters are क, प, च and इ respectively.

लघे नकारो हिबुके तकारस्तुले णकारो मकरे टकारः ।

इत्येतदुक्तं चरसंज्ञकस्य वक्ष्ये स्थिराख्यस्य चतुष्टयस्य ॥१९॥

19. When the 9th Navamsa of Mesha is rising, the letters for the four Kendras are respectively न, त, ण and ट. Thus have I explained the letters for the Kendras that are moveable signs. Now I shall explain the same for those that are fixed signs.

वृषे फकारो हिबुके खकारः कीटे वकारो नृषटे छकारः ।

आद्यांशकेभ्यो मतिमान्विदध्यादनुक्रमेण स्थिरसंज्ञकेषु ॥२०॥

20. When the first Navamsa of Vrishabha is rising, the letters for the four Kendras are फ, ख, व and छ. In this manner, are to be got the letters for the first Navamsas, in regular order, of the fixed signs by a wise man.

लघे बकारो हिबुके जकारः ईकारमस्तेऽम्बरगे गकारः ।

वृषे थकारो हिबुके टकारः कीटे डकारो नृषटे दकारः ॥२१॥

21. When the second Navamsa of Taurus is rising, the letters for the four Kendras are ब, ज, ई and ग; for the third Navamsas of these, the letters are थ, ट, ड and द respectively.

वृषे घकारो हिबुके शकारः कीटे झकारो नृषटे भकारः ।

लघे नकारो हिबुके उकारः कीटे डकारो नृषटे मकारः ॥२२॥

22. When the 4th Navamsa of Vrishabha is rising, the letters for the four Kendras are व, श, झ and भ; for the fifth Navamsa, the correspondding letters are ज, ड, ढ, and म.

लग्ने दकारोऽथ जले णकारश्चास्ते षकारोऽम्बरगे मकारः ।

वृषे षकारो हिवुके चकारः कीटे पकारो नृघटे ककारः ॥२३॥

23. When the 6th Navamsa of Vrishabha is rising, the letters for the four Kendras are ढ, ण, ध and न; for the 7th Navamsa, व, च, प and क respectively.

उकारमाहुर्वृषमे जले खमस्ते फकारो नृघटे छकारः ।

अमृत्ये वृषे टं तमुशन्ति सिंहे थं सप्तगे ठं प्रवदन्ति कुम्भे ॥२४॥

24. When the 8th Navamsa is rising, the letters for the four Kendras are ऊ, ख, फ and छ respectively; for the 9th Navamsa, they are ट, त, थ and ठ respectively.

द्विमूर्तिसंज्ञे मिथुने जकारः षष्ठे बकारः प्रथमांशके स्यात् ।

घनुर्धरेऽस्तोपगते गकारो मीनद्वये चाम्बरगे सकारः ॥२५॥

25. When the first Navamsa of Mithuna, a dual sign, is rising, the letters for the Kendras are ज, व, ग and स respectively.

लग्ने षकारो हिवुके भकारश्चास्ते झकारोऽम्बरमध्यगे ई ।

लग्ने दकारो हिवुके षकारमस्ते डकारं विदुरम्बरे ढम् ॥२६॥

26. When the second Navamsa of Mithuna is rising, the letters for the Kendras are व, भ, झ and ई respectively; for the 3rd Navamsa, they are द, ध, ढ and ढ respectively.

लग्ने मकारो हिवुके डकारश्चास्ते हकारोऽम्बरगे अकारः ।

लग्ने पकारो जलगे चकार ऐकारमस्तेऽम्बरगे ककारः ॥२७॥

27. When the 4th Navamsa of Gemini is rising, the letters for the four Kendras are म, ड, ढ and य respectively; for the 5th Navamsa, they are प, च, ऐ and क.

प्रागलग्नगे नं जलगे णमाहुरस्तं गते टं नमसि स्थिते तम् ।

प्रागलग्नगे खं जलगे यमाहुरस्तं गते छं नमसि स्थिते कम् ॥२८॥

28. When the 6th Navamsa of Gemini is rising, the letters for the Kendras are न, ण, ट and त respectively; for the 7th Navamsa, they are ख, य, छ and फ respectively.

लगने जमोकारमथाम्बुसंस्थे गमस्त संस्थे विदुरम्बरे बम् ।

ठं लगनोऽन्त्ये हिब्रकाश्रिते डं यमस्तगे दं नभमिस्थिते वै ॥२९॥

29. When the 8th Navamsa of Gemini is rising, the letters for the Kendras are ज, ओ, ग and व respectively; for the 9th Navamsa, they are ठ, ड, थ and द respectively.

एवं विकल्पोऽक्षरसङ्ग्रहोऽयं नाम्नां निरुद्दिष्टविधान उक्तः ।

सर्वेषु लगनेषु च केचिदेवमिच्छन्ति पूर्वोक्तविधानवत्तु ॥३०॥

30. Thus has been explained the given method of gathering the letters constituting names. Some sages have thus opined as given above for all the signs rising at the time.

केन्द्राणि वा केन्द्रगतांशकैः स्वैः पृथक्पृथक् सङ्गुणितानि कृत्वा ।

त्रिकृद्विभक्तं विदुरक्षरं तत् क्षेत्रेश्वरस्यांशपरिक्रमस्वम् ॥३१॥

31. Or, multiply separately the several Kendra houses by their corresponding rising Navamsas and divide the result by 9. The quotient will reveal the letter required belonging to the Navamsa of the planet.

मेव	वृष	मिथु	कट	सिंह	कन्या	तुला	वृश्चि	धनु	मक	कुम्भ	मीन
क	फ	ज	य	ख	ब	च	व	ग	प	छ	स
छ	बं	घ	अ	ज	भ	ख	ई	झ	फ	ग	ई
ट	बं	द	ठ	ट	ध	त	ड	ड	थ	द	ड
र	घ	म	ज	श	ह	ब	झ	इ	ग	भ	ज
भा	ज	प	घ	उ	च	भ	ह	ऐ	झ	म	क
ह	ठ	न	द	ण	ण	ध	ध	ट	ड	न	त
ज	ब	ख	म	च	प	ह	प	छ	ह	क	फ
क	ऊ	ज	प	ख	ओ	च	ठ	ग	इ	छ	ब
न	ट	ठ	त	त	ड	ण	थ	थ	ट	ठ	क

[Multiply the number representing the sign of each Kendra house by the number of its Navamsas (owned by the planets) and divide the product by nine; the remainder gives a particular Navamsa, from whose lord the letter is to be deduced.

Suppose Mesha to be rising; then multiply 1 by the Navamsas contained in it, *i.e.* 6, (the nine Navamsas being owned by six planets) and divide by 9, thus;  $1 \times 6 \div 9$ . The remainder is 6. The letter indicated will be that of Mercury, *i.e.* ड and so on.]

सञ्चिन्तितप्रार्थितनिर्गतेषु नष्टस्तस्त्रीरतिभोजनेषु ।

स्वप्नर्क्षचिन्तापुरुषादिवर्गेष्वेतेषु नामान्युपलस्येन ॥३२॥

32. One ought to find out the names in connection with the following things: (1) Things thought of (2) things wished for (3) departures; (4) lost objects, (5) damaged things, (6) women; (7) sports (8) dishes (or food) (9) dreams (10) stars (11) cares and (12) men; and so on from the four Kendras in order.

The commentator interprets the 12 subjects beginning with सञ्चिन्तित (thought of) as referring to the 4 Kendras from the Lagna in order, in three sets of 4 each; *i.e.*, the names of numbers 1, 5 and 9 should be deduced from the Lagna Kendra; those of 2, 6 and 10 from the fourth Kendra; those of 3, 7 and 11 from the 7th Kendra; and those of 4, 8 and 12, from the 10th Kendra.

Here ends Yavaneswara's Akshara Kosa-

व्यक्षरं चरगृहांशकोदये नाम चास्य चतुरक्षरं स्थिरं ।

नामयुग्ममपि च द्विमूर्तिषु त्र्यक्षरं भवति चास्य पञ्चभिः ॥१४॥

*Sloka 14.*—If at the time of a query or some body's arrival the rising sign (or Navamsa) is moveable, the name of the person concerned will consist of two syllables; if it is a fixed one, four syllables; if a dual Rasi, he will have a double name, of which the first will have 3 syllables and the second 5.

*Slokas 15-16.*—The guttural, palatal, lingual, dental and labial classes respectively belong to Mars, Venus, Mercury, Jupiter and Saturn; the eight letters beginning with 'ब' to the Moon; and the vowels from 'अ', to the Sun. For the planets beginning with the Sun (owning the rising sign or Navamsa), the names will be synonymous with those of Fire, Water, Subrahmanya, Vishnu, Indra, Sachi and Brahman respectively, and they will have to be reconstructed as consisting of two, three, four or five syllables, by one's own intelligence.

[A strong planet will have a 'tall' syllable, (such as को) one of medium strength, a short one (such as कू); and a weak one, a downward syllable. About the allotment of syllables, some hold that for every 150 minutes traversed by the Sun in the sign occupied there should be one syllable belonging to him for the first letter of the name; for every 225', in the Moon; and for every 200 in other planets.]

वयांसि तेषां स्तनपानबाल्यव्रतस्थिता यौवनमध्यवृद्धाः ।  
अतीव वृद्धा इति चन्द्रमौमङ्गशुक्रजीवार्कशनेश्वराणाम् ॥१७॥

*Sloka 17.*—The age of persons will have to be ascertained from the planets, the Moon, Mars, Mercury, Venus, Jupiter, the Sun and Saturn, as that of a baby fed by breast-milk, a child (between 2 and 6 years), a celibate (7 to 16 years), a youth (17 to 30), a middle-aged person (from 31 to 50 years), an old man (51 to 80 years) and a very old man (81 to 100 years) respectively.

Thus ends the 96th Adhyaya on "Further Omens".

*Sloka 16.*—The asterisms beginning with Sravana make their effects felt in seven, eight, one and a half, three, three and five months respectively.

[The portents whose times of fruition have not been mentioned here are mentioned in *Sloka 30* of *Adhyaya 32 supra*.]

निगदितसमये न हस्यते चेदधिककर्म विमुषे प्रपञ्चते तद् ।

यदि न कनकस्वमोषरत्नैश्चमिर्त्तं विधिवद् द्विवैधं कान्ध्या ॥

*Sloka 17.*—If the effects of the portents mentioned above do not come to pass at the time fixed, they will do.

so with greater vehemence at double the time, if they are not warded off by expiatory ceremonies performed according to the precepts of the Sastras by Brahmins along with gifts of gold, gems and cows.

Thus ends the 97th Adhyaya on "The time of Fruition of Effects".

*Slokas 1-3.*—The number of stars constituting the constellations from Aswini are 3, 3, 6, 5, 3, 1, 5, 3, 6, 5, 8, 15, 5, 1, 1, 5, 4, 3, 11, 2, 8, 3, 5, 100, 15, 8 and 32 respectively. The periods also of these constellations are represented by the number of stars. The effect—good or bad—of an asterism on marriage will come to pass in as many years as there are stars in it. A fever or some other illness will disappear in so many days.

*Sloka 6.*—Among the 28 constellations, the four, *viz.*, the three Uttaras and Rohini are called Dhruva or fixed ones. Coronations, expiatory ceremonies, planting of trees, laying the foundation of towns, commencement of meritorious deeds, sowing seeds and other permanent things should be undertaken when the Moon passes through these asterisms.

*Sloka 7.*—The asterisms Mula, Ardra, Jyeshtha and Ashlesha are known as Teekshna or sharp. During these succeed attacks, incantations, raising of goblins, imprisonment of others, murders, separation of friends and alliance with kings and the like.

All infernal and nefarious acts succeed when these stars rule.

*Sloka 8.*—The five asterisms, *viz.*, three Purvas, (Purvaphalguni, Purvashadha and Purvabhadra), Bharani and Magha are termed 'Ugra' or dreadful. These are to be used with success in ruining enemies, destruction, deceit, imprisonment, poisoning, setting fire and striking with weapons and the like.

*Sloka 10.*—The four asterisms Anuradha, Chitra, Revati and Mrigasiras are known to belong to the class of 'Tender' ones. These yield beneficial results in making friends, sexual union, use of garments and ornaments, performance of auspicious ceremonies and singing.

*Sloka 11.*—The two asterisms Kritika and Visakha are known as मृदुतीक्ष्ण—Tender-sharp and give mixed results. The five asterisms Sravana, Dhanishta, Satabhishak, Punarvasu and Swati are termed चर Chara or 'Temporary' and are good for ephemeral things.

*Sloka 12.*—The asterisms recommended for shave are Hasta, Chitra, Swati, Mrigasiras, Sravana, Dhanishta, Satabhishak, Revati, Aswini, Jyeshtha, Pushya and Punarvasu. It is to be had when these asterisms rise, or when

the Muhurtas bearing the names of the deities presiding over them rise, when the Moon is auspicious, *i. e.*, in conjunction with the 1st, 3rd, 6th, 7th, 10th or 11th with respect to the Janma Rasi, and also when there is favourableness of the asterism, *i. e.*, 2nd, 4th, 6th or 8th.

*Sloka 15.*—When the Moon travels through the asterisms Hasta, Moola, Sravana, Punarvasu, Mrigashirsha and Pushya, it is auspicious for doing all actions that are termed or tend towards 'male'.

This Sloka is not found in some editions.

*Sloka 16.*—Sacraments, undertaking a religious act such as a sacrifice, observance of a vow, tying the sacred girdle (*i. e.*, Upanayana) and such other things should be performed on a Thursday, Friday, Wednesday or Monday, when the Moon is in conjunction with any of the asterisms, Hasta, Revati, Swati, Anuradha, Pushya, Chitra and Mrigasiras.

*Sloka 17.*—All undertakings are crowned with success when the 12th, 8th and the Kendra houses are uncontaminated (occupied by benefics and without malefics) the malefics in the 3rd, 6th or the 11th, and Jupiter or Venus in the Lagna or in a Kendra. A house should be constructed or entered when the Lagna at the time is beneficial to the owner (*i. e.*, when it does not happen to be the 12th or 8th from his Janma Rasi) and happens to be a rural as well as a fixed sign.

Thus ends the 98th Adhyaya on the "Functions and Properties of the Asterisms."

तिथिकर्मगुणम् ॥९९॥ On the Functions and  
Properties of Tithis or Lunar days.

करणमुद्दृत्तैष्वपि तत् सिद्धिकरं देवतासदृशम् ॥३॥

*Slokas 1-3.* — The lords of the lunar days are in their order : Brahman, Vidhata, Vishnu, Yama, the Moon, Subrahmanya, Indra, the Vasus, Serpent, Dharma, Rudra, Aditya, Manmatha, Kali and the Visvedevas ; those of the New Moon are the Manes. Functions appropriate to the deities must be performed on their respective days. These are further divided into five classes of 3 days each. 1, 6 and 11—Nandas ; 2, 7 and 12—Bhadras ; 3, 8 and 13—Jayas ; 4, 9 and 14—Rikthas ; and 5, 10 and 15—Purnas. Works that are prescribed for the several asterisms should be done on the lunar days that are owned by the same deities. In the same way, they should be done with reference to the Karanas and Muhurthas by the identity of the presiding deities for ensuring success.

On the 1st Tithi Brahminic ceremonies such as marriage may be performed ; on the 2nd, laying foundation for houses, etc. ; on the 3rd, tonsure, etc ; on the 4th, destruction of enemies may be undertaken ; on the 5th, emetics, tonics, etc. ; on the 6th, getting new friends, coronation, etc ; on the 7th, construction of vehicles, journey, etc. ; on the 8th, taking up of arms, fortification, etc. ; on the 9th, ruining and killing enemies ; on the 10th, meritorious deeds, worship of Brahmins, etc. ; on the 11th, permanent and temporary delicate work ; on the 12th, fire-worship ; on the 13th, making friendship, enjoyment of sensual pleasures,

etc. ; on the 14th, administration of poison, mercury, etc.; on the 15th, propitiation of the Manes.

According to Parasara, all the 15 Tithis have separate names as नन्दा, भद्रा, जया, रिक्ता, पूर्णा, मासा, मित्रा, महाबला, उग्रसेना, सुधन्वा, सुनन्दा, यमा, जया, उग्रा and सिद्धि. Since Rohini and Pratipat have the same presiding deity Brahman, all Brahma Karmas should be performed on a day that has both Rohini and Pratipat. Similarly 2nd and Abhijit; 3rd and Sravana; 4th and Bharani; 5th and Mrigasiras; 6th and Krittika; 7th and Jyeshtha; 12th and Hasta; 13th and Purvaphalguni; 14th and Aslesha; 15th and Uttarashadha; 30th and Magha.

बव and ज्येष्ठा have the same presiding deity ; so also बालव and रोहिणी ; कौलव and अनूराधा ; तैतिल and उत्तरफल्गुनी ; गर and ज्येष्ठा ; वणिज and श्रवण ; विष्टि and भरणी ; शकुनि and आश्लेषा ; चतुष्पात् and रोहिणी ; नाग and आश्लेषा ; किंस्तुभ and स्वाति.

The शिव (सुहृत्) and आर्द्रा have the same deity ; so also भुजग and आश्लेषा ; मित्र and अनूराधा ; पितृ and मघा ; वसु and धनिष्ठा ; जल and पूर्वाषाढा ; विश्व and उत्तराषाढा ; विराञ्चि and अभिजित् ; पङ्कजभव and रोहिणी ; ऐन्द्राग्नी and विशाखा ; नैर्ऋत and मूला ; वारुण and शतभिषक् ; अर्यमा and उत्तरफल्गुनी ; भाग्य and पूर्वफल्गुनी ; अजैकपात् and पूर्वाभाद्रा ; अहिर्बुध्न्य and उत्तराभाद्रा ; एषा and रेवती ; दत्त and अश्विनी ; अन्तक and भरणी ; आग्नेय and कृत्तिका ; मृगशिरस् and इन्दु ; अदिति and पुनर्वसु ; गुरु and पुष्य ; हरि and श्रवण ; त्वष्टा and मित्रा ; अनिल and स्वाति. A Muhurta is a period of 48 minutes. Parasara's names differ from those given by Varaha. During the Sandhyas nothing should be done ; in the West and S. E., one should not enter the house, nor eat, nor have sexual intercourse.

It should also be noted that the Janma Rasis of the bride and the bridegroom are not 2nd and 12th, 5th and 9th, or 6th and 8th from each other (i. e., they may be in opposition, 3rd and 11th, the same Rasi, or 4th and 10th), that the Sun and the Moon for the bridegroom and the bride respectively are favourable in their Gochara (Transit), that the Moon is not in conjunction with the Sun, Mars, Saturn or Venus (she may be in conjunction with Jupiter or Mercury or both), that she is not hemmed in between malefics, that the day chosen is without Vyatipata or Vaidhriti, or Vishti, or is not a Rikta-Tithi, that the day is presided over by a benefic planet, that the season chosen is the northern solstice, that the month is any one but Chaitra and Pousha, (even in Dakshinayana the month of Kartika and Margasira are to be adopted), and that the rising Navamsa is owned by a biped sign.

## नक्षत्रजातकाध्यायः ॥१०१॥ On the Effects of Birth in the Asterisms.

This Adhyaya is a mere repetition of Chapter XVI of Brihat Jataka.

The several effects described in this chapter for the 27 asterisms may be classified as either good or bad for purposes of convenience as shown in the following statement.

Nakshatra		Effect		Ruler of the योगतारा-Yogatara
Aswini	...	Good		Ketu
Bharani	...	Good		Venus
Krittika	...	Good	...	Sun
Rohini	...	Good	...	Moon
Mrigasiras	...	Good	...	Mars
Ardra	...	Bad	...	Rahu
Punarvasu	...	Not very good	...	Jupiter
Pushya	...	Good	...	Saturn
Aslesha	...	Bad	...	Mercury
Magha	...	Good	...	Ketu
Purvaphalguni	...	Good	...	Venus
Uttaraphalguni	...	Good	...	Sun
Hasta	...	Bad	...	Moon
Chitra	...	Good	...	Mars
Swati	...	Good	...	Rahu
Visakha	...	Bad	...	Jupiter
Anuradha	...	Bad	...	Saturn
Jyeshtha	...	Bad	...	Mercury
Mula	...	Good	...	Ketu
Purvashadha	...	Good	...	Venus
Uttarashadha	...	Good	...	Sun
Sravana	...	Good	...	Moon
Dhanishta	...	Good	...	Mars
Satabhishak	...	Good	...	Rahu
Purvabhadrapada	...	Good	...	Jupiter
Uttarabhadrapada	...	Good	...	Saturn
Revati	...	Good	...	Mercury

✓ The Nakshatras that are in the 8th sign (i.e., वृश्चिक Vrischika) where the Moon is in depression are the 16th, the 17th and the 18th.

*viz.*, Hasta is also bad. Among the ऋक्षसन्धि (Risksha Sandhi) Nakshatras, *viz.*, आश्लेषा (Aslesha), ज्येष्ठा (Jyeshta) and रेवती (Revati), the last is good, because it is in Jupiter's sign. आर्द्रा (Ardra) is a रुद्र (Rudra) Nakshatra of fire. Therefore the Moon, a watery planet in आर्द्रा (Ardra) is bad (except for fiery planets like the Sun, Mars, etc.).

All Nakshatras that are bad for the Moon are in अवरोह (Avaroha) position for the Moon, that is, away from the exaltation. Again, all stars that are bad for the Moon are in the 4th, 6th and 8th signs of the zodiac with the notable exception of आर्द्रा (Ardra).

The 8th sign (Vrischika) is throughout bad for the Moon. Similar results should be expected if the Moon is progressed to the 8th house as per any system. The middle of the 6th sign (*viz.*, हस्ता Hasta) is bad when the Moon progresses there. The end of the 4th sign (आश्लेषा Aslesha) is similarly bad. A fiery star like आर्द्रा (Ardra) is bad for a watery planet like the Moon. The Moon progressing to the end of the 4th sign (कटक Kataka), the middle of the 6th sign (कन्या Kanya) and the 8th sign (वृश्चिक Vrischika) in any horoscope is bad.

Varahamihira has considered that the Moon is good or capable of giving good results in the Nakshatras ruled (according to विंशोत्तरी Vimsottari system) by 'benefics' (including Nakshatras ruled by herself) and also the Nakshatras ruled by her friend the Sun. Next, the Nakshatras ruled by Mars are a little beneficial. The Nakshatras ruled by malefics, though good, are not capable of much improvement for finance. The above analysis is with respect to finance, subject to what has been stated already with respect to the 6 Nakshatras, *viz.*, विशाखा (Visakha), अनुराधा (Anuradha), ज्येष्ठा (Jyeshta), हस्ता (Hasta), आश्लेषा (Aslesha) and आर्द्रा (Ardra).

It should further be noted that Nakshatras in the signs Makara and Kumbha (Saturn's), though they are ruled by benefics according to the rule given above, are not capable of making the native generous. Because, the Nakshatras are in the houses owned by Saturn, a conservative, stingy planet. *Cf.* अदाता (Adata) for पूर्वभाद्रपदा (Purvabhadrapada) and दुर्गाह्य (Durgahya) for शतभिषक्

The Moon is good generally in the signs or Nakshatras ruled by benefics.

If, at a person's birth, the Moon be in the star भरणी (Bharani), he will carry out his purpose to the end, will be truthful, free from malady, clever and happy.

Thus ends the 103rd Adhyaya on the "Effects of Planetary Combination at the Time of Marriage".

ग्रहगोचराध्यायः ॥१०४॥ On Transits of Planets.

प्रायेण सूत्रेण विनाकृतानि प्रकाशरन्ध्राणि चिरन्तनानि ।

रत्नानि शास्त्राणि च योजितानि नवैर्गुणैर्भूषयितुं क्षमाणि ॥१॥

*Sloka 1.*—Generally, ancient gems and Sastras which are without strings (unstrung) and a metrical form (respectively), whose bores are quite visible and faults apparent (respectively), become fit to be worn as ornaments and to be held in high esteem (respectively), when they are combined with new strings and excellent ideas couched in fine metres (respectively).

प्रायेण गोचरो व्यवहार्योऽस्तत्फलानि वक्ष्यामि ।

नानावृत्तरायां मुखचपलत्वं क्षमञ्चं नः ॥२॥

*Sloka 2.*—Generally, the transit of planets comes within the purview of our daily experience. Hence I shall expound its effects, O noble persons in varied metres. Kindly excuse my volubility.

This verse is composed in the आर्या metre known as मुखचपल. Here the author steps into the realm of Prosody too. Primarily, metres are classified under two heads, *viz.*, वृत्त and जाति. The former is based upon groups of three syllables called अक्षरगण, while the latter, upon groups of four Matras or syllabic instants. आर्या belongs to the latter class. Most of the verses in this work are in the आर्या metre, whose construction is as follows:— The first and third quarters must have 12 Matras each of three Ganas, the second, 18 and the fourth 15. In the second, there will be four Ganas and a final long syllable. In the 4th, the 9th Matra will be considered as a group by itself. Thus in both the halves, there will be 7 groups and a long syllable (2 Matras). It is a rule that the odd groups ought not to have जगण (ॐ—ॐ) and the sixth ought to have जगण or four Laghus (ॐ ॐ ॐ ॐ). Let us take the above verse itself and see if it satisfies these conditions.

$\frac{1}{-} \rightarrow, \frac{2}{\text{—}} \rightarrow, \frac{3}{\text{—}} \rightarrow, \frac{4}{-} \rightarrow, \frac{5}{-} \rightarrow, \frac{6}{\text{—}} \rightarrow, \frac{7}{-} \rightarrow, \text{—} (12+18)$   
 $- \rightarrow, \text{—} \rightarrow, - \rightarrow, \text{—} \rightarrow \rightarrow \rightarrow, - \rightarrow, \rightarrow, - \rightarrow, \text{—} (12+15).$

In addition to this, the above is मुखचपल आर्या; *i. e.*, the 2nd and 4th Ganas of the first half should necessarily be जगण having a long syllable on either side; the second half follows the rules of an ordinary आर्या. In the above example the 4th गण is not ज.

माण्डव्यगिरं श्रुत्वा न मदीया रोचतेऽथवा नैवम् ।

साध्वी तथा न पुंसां प्रिया यथा स्याज्जघनचपला ॥३॥

*Sloka 3.*—Or, my statements on this subject will surely be admired by the learned who have heard those of Mandavya, for men do not love their devout and chaste wives so much as they do courtesans.

This verse is composed in the जघनचपल kind of आर्या whose characteristics are that the first half is like that of the ordinary आर्या and the second like that of मुखचपल. Mandavya's statements,

though containing the truth, are not couched in fine words and metres. So, the author says that his will be loved and appreciated by the cultured. This Mandavya is mentioned by Pingalacharya as an author on Prosody.

**सूर्यः षट्त्रिदशस्थितस्त्रिदशषट्सप्ताद्यगश्चन्द्रमा**

**जीवः सप्तनवद्विपञ्चमगतो वक्रार्कजौ षट्त्रिगौ ।**

**शुक्रः सप्तमषड्दशर्क्षसहितः शार्दूलवत् त्रासकृत् ॥४॥**

*Sloka 4.*—The Sun in his transit is beneficial in the 6th, 3rd and 10th places from the Janma Rasi; the Moon in the Janma Rasi, the 3rd, 6th, 7th and the 10th houses; Jupiter, in the 2nd, 5th, 7th and 9th; Mars and Saturn, in the 3rd and 6th; Mercury, in the 2nd, 4th, 6th, 8th and 10th; all the planets are beneficial when they transit the 11th place. Venus causes dread like the tiger in the 6th, 7th and 10th; (in other places, he confers beneficial results).

A knowledge of वेध is quite necessary for ascertaining, the correct results of transit. See जा-पा Adhyaya XIII-60 and ऊ-री, Adhyaya XXVI.

This verse is composed in the शार्दूलविक्रीडितवृत्त whose definition is सूर्याश्चैर्मसजास्तताः सगुरवः शार्दूलविक्रीडितम्-

**जन्मन्यायासदोऽर्कः क्षपयति विभवान् कोष्ठरोगाध्वदाता**

**वित्तभ्रंशं द्वितीये दिशति च न सुखं वञ्चनां द्युजं च ।**

**स्थानप्राप्तिं तृतीये धननिचयमुदा कल्यकुचारिहर्ता**

**रोगान् दत्ते चतुर्थे जनयति च मुहुः स्रग्धरा भोगविघ्नम् ॥५॥**

*Sloka 5.*—The Sun passing through the Janma Rasi causes fatigue, reduces wealth, brings on bowel-disease and wearisome travelling. When he transits the 2nd house, there will be loss of wealth and the person will be unhappy. He will be duped and suffer from eye-trouble.

In the 3rd house, acquisition of a new position, advent of moneys, happiness, freedom from sickness and destruction of enemies will be the result. In the 4th house, the Sun causes diseases, and there will often arise impediments to the native in the matter of his sexual enjoyments.

This Sloka is in स्रग्धरा metre which is defined as अग्नेर्यानां त्वयेण विमुनियतियुता स्रग्धरा कीर्तितेयम्.

पीडाः स्युः पञ्चमस्थे सवितरि बहुशो रोगारिजनिताः

*Sloka 6.*—When the Sun transits the 5th house, there will be multifarious troubles arising from illness and enemies ; in the 6th, he puts an end to illness, enemies and grief ; in the 7th, there will be wearisome travelling, diseases of the stomach and humiliation ; in the 8th, he will suffer from fear and diseases ; and even his own wife will speak harshly to him.

This verse is called सुवदना. This consists of 20 letters ; the definition is

त्रेया सप्ताश्वध्विर्मरभनययुता स्लौ गः सुवदना ।

रवावापदैर्न्यं रुगिति नवमे वित्तचेष्टाविरोधो

*Sloka 7.*—The Sun in the 9th causes danger, humiliation, disease and impediments to wealth and undertakings ; in the 10th house, a very mighty undertaking will

be successfully completed. A new position, honour, wealth and freedom from disease will be the effect of the Sun's transit in the 11th house. When the Sun passes through the 12th, the activities of only those that have a bright character will be successful and not of others. ॐ

The metre is वितान-विसृजैरपि विद्धि वितानम् । .

When these planets are pleased, there will be no trouble to the person, even if he falls down from a great height or enters the midst of sporting snakes.

*Sloka 49.*—The Sun and Mars yield results, good or bad, in the first half of the sign travelled, while the Moon

and Saturn, in the latter half. The गीति-Giti and उपगीति-Upagiti varieties of the Arya follow respectively the first half and second half of the ordinary Arya in both the halves.

*Of.* वृ. जा. XXII-6.

आदौ यादृक् सौम्यः पश्चादपि तादृशो भवति ।

उपगीतिर्मात्राणां गणवत् सत्सम्प्रयोगो वा ॥५०॥

*Sloka 50.*—Mercury causes the same effects at the end of a Rasi as in its beginning (that is, the same effects throughout the sign), just as the number of groups of Matras is the same in both the halves of the Upagiti, or as friendship with the virtuous.

*Of.* वृ. जा. - शशितनयः फलदस्तु सर्वकालम् ।

आर्याणामपि कुरुते विनाशमन्तर्गुरुर्विषमसंस्थः ।

गण इव षष्ठे दृष्टः स सर्वलघुतां जनं नयति ॥५१॥

*Sloka 51.*—Jupiter passing through the middle of odd houses produces disasters even to the righteous, and when through the 6th house, reduces the person to abject slavery or degradation, just as all varieties of the आर्या are spoiled by the presence of the जगण in the odd places, but it should be found in the 6th group, or it should consist of four short syllables,

Here the author gives the rule about the use of जगण in Arya metre. This has been already given in our notes on the 2nd Sloka of this Chapter.

अशुभनिरीक्षितः शुभफलो बलिना बलवा-

*Sloka 52.*—When a strong benefic is aspected by a strong malefic, or when a strong malefic is aspected by a strong benefic, his benefic or malefic effects will be neutralised, just as the (Prakrit) Geetaka and (Sanskrit) Narkutaka are equal in all respects.

The metre is नकुटक—नजभजजा लगौ च यदि नकुटकं तु तदा—

नीचेऽरिभेस्ते चारिदृष्टस्य सर्वं वृथा यत् परिकीर्तितम् ।

पुरतोऽन्धस्येव कामिन्याः सविलासकटाक्षनिरीक्षणम् ॥५३॥

*Sloka 53.*—All the good effects enumerated above will be nullified, when the planet under consideration is in depression, in an inimical house, is eclipsed, or is aspected by an enemy, just as the amorous side-long glances of a loving damsel are futile on a blind man.

The metre is विलास-

तो मो यगौ यस्याद्यपादे स्यात्तौ उगौ तथा यत्र च दृश्यते ।

तदनु सौ मश्चतुर्थे स्यात् ससखा लु विलासमुदाहृतम् ॥

This is a विषमवृत्त- all the four feet are dissimilar.

सूर्यसुतोऽर्कफलसमश्चन्द्रसुतश्छन्दतः समनुयाति यथा ।

स्कन्धक्रमार्यागीतिवैतालीयं च मागधीगाथाऽऽर्याम् ॥५४॥

*Sloka 54.*—Saturn gives the same effects as the Sun does in his transit, while Mercury resembles in effect the planet he conjoins with, just as the (Prakrit) Skandhaka, follows (Sanskrit) Geeti, Magadhi Vaitaliya and Gatha, Arya in metrical feet.

सौरोऽर्करश्मियोगात् सविकारो लब्धवृद्धिरधिकतरम् ।

पित्तवदाचरति नृणां पथ्यकृता न तु तथाऽऽर्याणाम् ॥५५॥

*Sloka 55.*—When Saturn is eclipsed by the Sun's rays, his power to do harm to human beings increases greatly, except in the case of those noble persons who act

righteously, just as bile being greatly vitiated (made powerful) by men basking in the Sun, tortures them, leaving out those careful men who have a regulated diet.

This is in पथ्या metre, a kind of आर्या.

ले लात् पदं द्वितीयात् प्रथमात् परकेऽथ विषमयुजि चरमे ।

*Sloka 56.*—The nature of the Moon varies according to the planet she conjoins with, just as the facial expression does according to the mental frame.

The Moon is the mind of कालगुरुषः. The metre is वक्त्र-

रौ यदा गौ तु वक्त्रं स्यात् औ गावन्यत्र दृश्यते ।

तृतीय चरणे यूसौ गौ जसौ गुरुस्थो गः स्यात् ॥

पञ्चमं लघु सर्वेषु सप्तमं द्विचतुर्थयोः ।

यद्वच्छ्लोकाक्षरं तद्वल्लघुतां याति दुःस्थितैः ॥५७॥

*Sloka 57.*—When planets are ill-placed, a man is belittled, just as the 5th syllable in all the quarters and the 7th in the 2nd and 4th are short in the श्लोक metre.

प्रकृत्यापि लघुर्यश्च वृत्तबाह्ये व्यवस्थितः ।

स याति गुरुतां लोके यदा स्युः सुस्थिता ग्रहाः ॥५८॥

*Sloka 58.*—A person, though low-born and of reprehensible conduct, becomes respectable in the world, when the planets are well-placed in transit, just as a short syllable occurring at the end of a foot comes to be treated as long.

प्रारब्धमसुस्थितैर्ग्रहैर्यत् कर्मात्मनिवृद्धये बुधैः ।

विनिहन्ति तदेव कर्म तान् वैतालीयमिवायथाकृतम् ॥५९॥

*Sloka 59.*—If the wise begin a work for achieving prosperity when the planets are ill-placed, that itself will destroy them, just as the ceremony for raising a goblin, done improperly, destroys the doer himself.

The metre is वैताल्य- This is an अर्द्धसमवृत्त where the first and third quarters are similar. while the second and fourth are of a different type. In the odd quarters, there are 14 Matras, and in each of the even ones, they are 16 in number. All the four quarters are similar in one respect, viz., they end in र Gana plus a short syllable and a long one. In the odd quarters, there will be 6 Matras remaining outside the Ganas, while in the even ones, there will be 8 Matras.

*Sloka 60.*—A king, though endowed with little prowess, starting on an expedition at the proper time, in view of the good positions of the planets, (See XVI-40 *supra*) achieves greatness that is eulogised in the scriptures.

The metre is औषच्छन्दसिक- It is formed by the addition of a long syllable to each of the quarters of the वैताल्य.

with advantage: gold, copper, horse, wood, bones, skin, woollen articles, mountain, tree, a perfume called त्वक्, shell, serpent, thief, weapons, forest, cruel deeds, service of kings, coronation of kings, medicine, silk, trade (jungle products), cowherd, physician, stone, fraud, spotless ones, famous ones, heroic, famous in battle, one on march and fire.

*Dandaka 61.—d.* When Mercury is in the Lagna or presides over the day, all work undertaken in connection with the following things will be crowned with success :—Green articles, gems, lands, perfumes, garments, things that are both harsh and mild, drama, Sastra, science, poetry, all fine arts, preparation of compounds, mixtures, etc., achieving a Mantra, alchemy, arguments, skill, meritorious deeds, observance of vows, messenger, tonics (that prolong life), feigned talk, lies, bath, things done in a short, moderate and long interval (or short, medium and long articles ?) as are the foot-prints on the earth during a heavy rain.

These four pieces of Dandaka are based upon the चण्डवृष्टिप्रयात and its longer forms which ordinarily has two न Ganas in the beginning followed by six र Ganas. The number of र Ganas can be increased at will. So, here we have 32 र Ganas. In this connection Pingalacharya says that रात and माण्डव्य give a different name to चण्डवृष्टिप्रयात. According to them, this variety is termed सुवर्ण; and the others are चण्डवेग, प्लव, जीमूत, बलाहक, मुजङ्ग and समुद्र. There are thus 7 kinds of Dandaka. There are no special names for

*Dandakas* which have more than 14 र *Ganas*. The names according to Pingalacharya are अर्ण, अर्णव, व्याल, जीमूत, लीलाकर, उद्दाम and शंख. in addition to the basic *Dandaka* called चण्डवृष्टिप्रयात. As the *Dandaka* gradually increases from 7 र *Ganas*, it is also called प्रचित.

The metre is वर्णकदण्डक of four feet - न न and 7 म *Ganas*.

*Dandaka 63.—b.* On the day presided over by Saturn, one ought to do work pertaining to the following things in order to achieve success:—She-buffalo, goat, camel, dark metal (iron); slaves, old persons, low-born persons, birds, thieves, hunters, the immodest, broken pots, elephant-catching and obstructionist-activities. Otherwise, one will not get even a drop of water in the ocean.

This whole is in समुद्रदण्डक, which is जनरजरजरजरलु-gie., five र Gaugas having जगण in their middle and ल and लु at the end.

विपुलामपि बुद्ध्वा छन्दोविचितिं भवति कार्यमेतावत् ।

श्रुतिसुखदवृत्तसङ्ग्रहमिममाह वराहमिहिरोऽतः ॥६४॥

*Sloka 64.*—Although one knows the extensive ramifications of the science of Prosody, one cannot do more than this (cannot employ other varieties of metres). Hence Varahamihira has given this summary or essence of metres that are pleasant to hear.

This is in विपुला, a kind of आर्या, which is of 3 kinds—(1) मुखविपुला, (2) जघनविपुला and (3) महाविपुला. (1) When, in the first half (i. e. between the first quarter and the 2nd) a word is broken (2) when such a breaking occurs in the second half; (3) when the break is in both the halves.

एकैव भवति पथ्या तिष्ठो विपुलाश्चतस्र एवैताः ।

गीतिचतुष्टयमित्थं प्रत्येकं षोडशप्रकारं स्यात् ।

साकश्येनार्याणामशीतिरेवं विकल्पाः स्युः ॥

According to the commentator, Varahamihira has simplified the rules of Prosody and made them easily intelligible; besides

that he has made them attractive. Here Varahamihira shows his erudite scholarship in other branches of science as well.

In this connection, the reader's attention is drawn to the following examples quoted by हलायुधभट्ट, the commentator of the छन्दःशास्त्र of Pingalacharya, where a remarkable knowledge of कन्यालक्षण is exhibited :

अतिदारुणा द्विजिह्वा परस्य रन्ध्रानुचारिणी कुटिला ।  
 दूरात्परिहरणीया नारी नागीव मुखचपला ॥  
 यस्या विलोचने पिङ्गले भ्रुवौ सङ्गते मुखं दीर्घम् ।

This commentator belonged to the 12th century A. D. and was a minister of king Lakshmanasena of Bengal.

Thus ends the 104th Adhyaya on the "Effects of the Transits of Planets".

In this manner, the form of the stellar deity has to be constituted by those who wish for good physical features.

It is a well-known rule that in the description of the form of divine beings, we have to begin with their feet, and in the case of human beings, with the head.

चैत्रस्य बहुलपक्षे द्वाष्टम्यां मूलसंयुते चन्द्रे ।

सुपवासः कर्तव्यो विष्णुं सम्पूज्य विष्णुं च ॥६॥

*Sloka 6.*—One ought to worship Lord Vishnu and the नक्षत्रपुरुष and then observe fast on the 8th day of the dark fortnight in the month of Chaitra, when the Moon passes through the asterism of Mula.

It is much better if it (the day) also happens to be Monday. The above worship itself is called Rupa-Satra (formal sacrifice).

*Sloka 8.*—A person who wishes for beautiful features shall worship and feed Brahmins with food abounding in milk and ghee, mixed with jaggery ; he should also present them with gold, cloths, and silver. Then he should fast regularly on the days when the Moon passes through the several asterisms beginning with Mula and representing the various limbs of the नक्षत्रपुरुष, and also worship in accordance with Vedic rules both Lord Hari and the नक्षत्रपुरुष.

knees), broad and muscular breast, moon-like face, white and beautiful teeth, the gait of a lordly elephant, long eyes resembling the lotus, an appearance captivating the hearts of damsels and a body verily like that of Cupid.

*Slokas 10-12.*—A woman who performs the worship as prescribed above will be born with a face as bright and spotless as the autumnal full Moon, eyes like the petals of lotus, beautiful (and sparkling) teeth, fine ears, hairs resembling the belly of the bees, a voice as sweet as that of an intoxicated cuckoo, red lips, hands and feet as tender and charming as lotus-petals, a slender waist bending under the weight of the bosoms, a navel with turns from left to right, thighs similar to plantain trees, fine buttocks and excellent loins. She will win the love of her husband, and have well-knit toes. She may also be born a man.

in the sky till the end of the creator's day, i. e., Kalpa. And when the universe is recreated, the person will become an intelligent monarch ; and will be reborn in the world as a king or a wealthy Brahmin.

Sloka 15, last quarter—मासेषाः स्युर्यथासंख्यम् is another reading

केशवं समभिपूज्य तत्पदं याति यत्र न हि जन्मजं भयम् ॥१६॥

*Sloka 16.*—One who fasts on the 12th days of the several months and worships Lord Kesava with his respective names attains His position, where there is absolutely no fear of re-birth. (He becomes one with Him or attains emancipation).

Thus ends the 105th Adhyaya on the "Worship of the Stellar or Deity."

*Sloka 1.*—Having churned the ocean of Astrology with the मन्दर mountain of my intelligence, I have taken out the Moon of Science (correct knowledge) that affords light to the world.

The idea is brought out here beautifully through a metaphor. This means that this संहिता contains the quint-essence of the whole science of Astrology-cum-Astronomy.

*Sloka 3.*—Or, a good man finding some excellence (virtue), though slender, in an ocean of faults, proclaims that (virtue), while a mean-minded man does contrariwise (finding a small fault in an ocean of excellences, he proclaims the fault alone). This is the nature of the good and the wicked.

Hence I make obeisance to the ancient authors.

Thus ends the 10th Adhyaya on "Conclusion".
